Eigen richting massa terhadap tersangka pelaku tindak pidana
merupakan tindak pidana, yang menjadi masalah sosial, yang

harus dapat dicegah dan/atau ditanggulangi melalui kebijakan
kriminal. Goal yang diharapkan adalah memberikan kebijakan
kriminal yang mendukung terciptanya perlindungan hukum demi
kesejahteraan masyarakat, tercapainya tujuan hukum, tujuan
pidanaan, pencegahan dan penanggulangan eigen richting
massa terhadap tersangka pelaku tindak pidana. Eigen richting
massa terhadap tersangka pelaku tindak pidana, merupakan
masalah yang tidak dapat diatasi semata-mata dengan kebijakan
kriminal secara penal. Dengan demikian, harus ada kebijakan
kriminal secara non penal, yang salah satu jalur mengatasi
berbagai masalah sosial adalah lewat kebijakan sosial, yang
sesuai dengan pendapat G.P. Hoefnagels, termasuk dalam jalur

pencegahan tanpa pidana. Pemikiran hukum yang dianggap penting dalam buku ini adalah adanya berbagai usul ide kebijakan kriminal secara penal dan secara non penal (yang dikaitkan dengan unsur sistem hukum) perihal eigen richting massa terhadap tersangka pelaku tindak pidana, untuk masa yang akan datang.

An Introduction to the International Law of Armed Conflicts

Oxford University Press

"Vivam" is the very last word of Ovid's masterpiece, the *Metamorphoses*: "I shall live." If we're still reading it two millennia after Ovid's death, this is by definition a remarkably accurate prophecy. Ovid was not the only ancient author with aspirations to be read for eternity, but no poet of the Greco-Roman world has had a deeper or more lasting impact on subsequent literature and art than he can claim. In the present day no Greek or Roman poet is as accessible, to artists, writers, or the general reader: Ovid's voice remains a compellingly contemporary one, as modern as it seemed to his contemporaries in Augustan Rome. But Ovid was also a man of his time, his own story fatally entwined with that of the first emperor Augustus, and the poetry he wrote channels in its own way the cultural and political upheavals of the contemporary city, its public life, sexual mores, religion, and urban landscape, while also exploiting the superbly rich store of poetic convention that Greek literature and his Roman predecessors had bequeathed to him. This Very Short Introduction explains Ovid's background, social and literary, and introduces his poetry, on love, metamorphosis, Roman festivals, and his own exile, a restlessly innovative oeuvre driven by the irrepressible ingenuity or wit for which he was famous. Llewelyn

Morgan also explores Ovid's immense influence on later literature and art, spanning from Shakespeare to Bernini. Throughout, Ovid's poetry is revealed as enduringly scintillating, his personal story compelling, and the issues his life and poetry raise of continuing relevance and interest. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Muhammad: A Very Short Introduction Bloomsbury Publishing

From a war-torn and famine-plagued country at the beginning of the 1990s, Ethiopia is today emerging as one of the fastest-growing economies in Africa. Growth in Ethiopia has surpassed that of every other sub-Saharan country over the past decade and is forecast by the International Monetary Fund to exceed 8 percent over the next two years. The government has set its eyes on transforming the country into a middle-income country by 2025, and into a leading manufacturing hub in Africa. The Oxford Handbook of the Ethiopian Economy studies this country's unique model of development, where the state plays a central role, and where a successful industrialization drive has challenged the long-held erroneous assumption that industrial policy will never work in poor African countries. While much of the volume is focused on post-1991 economic development policy and strategy, the analysis is set against the background of the long history of Ethiopia, and more specifically on the Imperial period that ended in 1974, the socialist development experiment of the Derg

regime between 1974 and 1991, and the policies and strategies of the current EPRDF government that assumed power in 1991. Including a range of contributions from both academic and professional standpoints, this volume is a key reference work on the economy of Ethiopia.

Thinking About Clinical Legal Education OUP Oxford

A significant introduction to the study of comparative law and a notable scholarly work, *Major Legal Systems in the World Today* analyzes the general characteristics which lie behind the development of the four principal legal systems of the world: the Civil law, the Common law, the Socialist law (primarily Soviet), and those based on religious or philosophical principles (Muslim, Hindu, Chinese, Japanese, and African). Providing unique insights into the spirit of each legal family, the book presents a total view of the historical foundation and the sources and structure of the law in each system.

Violence at work, ranging from bullying and mobbing, to threats by psychologically unstable co-workers, sexual harassment and homicide, is increasing worldwide and has reached epidemic levels in some countries. This updated and revised edition looks at the full range of aggressive acts, offers new information on their occurrence and identifies occupations and situations at particular risk. It is organised in three sections: understanding violence at work; responding to violence at work; future action.

The Theory of State Penerbit EnamMedia

A Theory of African Constitutionalism asks and seeks to answer why we need a new theoretical framework for African constitutionalism and how this could offer us better theoretical and practical tools with which to understand, improve, and assess African constitutionalism on its own terms. By locating constitutional studies in Africa within the experiences, interactions, and contestations of power and governance beginning in precolonial times, the book presents the development and transformation of African constitutional systems across time and place, along with the attendant constitutional designs and practices ranging from the nature and operation of the African state to its vertical and horizontal government structures, to its constitutional rights regime. This title offers both a theoretically and comparatively rich, historically and contextually informed, and temporally and spatially extensive account of the nature, travails, and incremental successes of African constitutionalism with detailed case studies from Nigeria, Ethiopia, and South Africa. A Theory of African Constitutionalism provides scholars, policymakers, governments,

and constitution builders in Africa and beyond with new insights for reimagining the purpose, substance, and scope of constitutions and constitutionalism.

Thinking About Clinical Legal Education provides a range of philosophical and theoretical frameworks that can serve to enrich the teaching and practice of Clinical Legal Education (CLE). CLE has become an increasingly common feature of the curriculum in law schools across the globe. However, there has been relatively little attention paid to the theoretical and philosophical dimensions of this approach. This edited collection seeks to address this gap by bringing together contributions from the clinical community, to analyse their CLE practice using the framework of a clearly articulated philosophical or theoretical approach. Contributions include insights from a range of jurisdictions including: Brazil, Canada, Croatia, Ethiopia, Israel, Spain, UK and the US. This book will be of interest to CLE academics and clinic supervisors, practitioners, and students.

This book explores the interlinkages between copyright and tertiary education regimes, and their complementary roles for sustainable human development. Emphasizing issues that are not addressed in-depth in the existing works, this book employs a new theoretical perspective in order to inform the exploration of the interlinkages through the lens of human development. To this effect, the book adopts the capabilities approach (CA) as an inclusive development framework that is suitable for examining the interfaces among copyright, tertiary education, and human development in Ethiopia.

Violence at Work DigiCat

At a time when policies are increasingly against it, international migration has become the subject of great public and academic attention. This book departs from the dominant approach of studying international migration at macro level, and from the perspective of destination countries. The contributors here seek to do more than 'scratch the surface' of the migration process, by foregrounding the voices and views of Ethiopian youth-potential migrants and returnees-and of their sending communities. The volume focuses on the perspective and agency of these young people, both potential migrants and returnees, to better understand migration decision-making, experiences and

outcomes. It brings together rarely documented cases of young men and women from several communities across Ethiopia, migrating to the Gulf and South Africa. Explaining the agency of local actors-prospective migrants, brokers and sending families- Youth on the Move illuminates the pervasive, persistent failure of state attempts to regulate migration. Moreover, it examines the financing of migration and the sharing of remittances, within a culturally situated moral economy. While accounts centered on economics and political violence are important, the contributors demonstrate compellingly that these factors alone cannot provide a full understanding of migration's complexity, nor of its social realities.
