Corinne Hofmann describes her return to Switzerland and the difficulties that faced her there, detailing how she built a new life for herself and her daughter and overcame all obstacles, with the same courage and optimism with which she faced the demands of her life in the

Kenyan outback.

What accounts for the persistence and spread of "commoning," the irrepressible desire of people to collaborate and share to meet everyday needs? How are the more successful projects governed? And why are so many people embracing the commons as a powerful strategy for building a fair, humane and Earth-respecting social order? In more than fifty original essays, *Patterns of Commoning* addresses these questions and probes the inner complexities of this timeless social

paradigm. The book surveys some of the most notable, inspiring commons around the world, from alternative currencies and open design and manufacturing, to centuries-old community forests and co-learning commons - and dozens of others. David Bollier ([www.bollier.org](http://www.bollier.org)) is an American author, activist and independent scholar who has studied the commons for nearly twenty years. Silke Helfrich ([commonsblog.wordpress.com](http://commonsblog.wordpress.com)) is a German author and independent activist of the commons who blogs at [www.commonsblog.de](http://www.commonsblog.de), and cofounder of

the Commons-Institut in Germany. With Michel Bauwens, Bollier and Helfrich are cofounders of the Common Strategies Group. For more information, go to the book's website, Patterns of Commoning ([www.patternsofcommoning.org](http://www.patternsofcommoning.org))

The acclaimed survey of the life and works of the celebrated Italian modernist master, available again in a classic format The work of Carlo Scarpa challenged, and continues to challenge, accepted notions of modern architecture. While several books have been published on his work, none has approached the breadth and depth of this monograph by Robert McCarter, who is celebrated for his meticulously researched, experientially based, and jargon-free accounts of key figures in modern architecture. This book is the definitive study of Scarpa's many accomplishments, including such works at the Canova Museum, the Castelvechio Museum, and the Brion Cemetery, among others.

Steep verdant rice terraces, ancient rainforest and fire-breathing volcanoes create the landscape of the world's largest archipelago. Indonesia is a travellers' paradise, with cuisine as vibrant and thrilling as its scenery. For these are the original spice islands, whose fertile volcanic soil grows ingredients that once changed the flavour of food across the world. On today's noisy streets, chilli-

spiked sambals are served with rich noodle broths, and salty peanut sauce sweetens chargrilled sate sticks. In homes, shared feasts of creamy coconut curries, stir-fries and spiced rice are fragrant with ginger, tamarind, lemongrass and lime. The air hangs with the tang of chilli and burnt sugar, citrus and spice. Eleanor Ford gives a personal, intimate portrait of a country and its cooking, the recipes exotic yet achievable, and the food brought to life by stunning photography.

Line Hoven's first graphic novel explores the history of her family, with stories from the past interwoven deftly with those of the present to show how prejudices and cultural barriers have changed over time. Beginning with her Hitler youth grandfather Erich, obsessed with his radio and the music of Mendelssohn it moves to show how her parents' 'forbidden' love helped overcome cultural differences.

The Economics of Ecosystems and

Biodiversity (TEEB) study is a major international initiative drawing attention to local, national and global economic benefits of biodiversity, to highlight the growing costs of biodiversity loss and ecosystem degradation, the benefits of investing in natural capital, and to draw together expertise from the fields of science, economics and policy to enable practical actions. Drawing on a team of more than one hundred authors and reviewers, this book demonstrates the value of ecosystems and biodiversity to the economy, society and individuals. It underlines the urgency of strategic policy making and action at national and international levels, and presents a rich evidence base of policies and instruments in use around the world and a wide range of innovative solutions. It highlights the need for new public policy to reflect the appreciation that public goods and social benefits are often overlooked and that we need a transition to decision making which integrates the many values of nature across policy sectors. It explores the range of instruments to reward those offering ecosystem service benefits, such as water provision and climate regulation. It looks

at fiscal and regulatory instruments to reduce the incentives of those running down our natural capital, and at reforming subsidies such that they respond to current and future priorities. The authors also consider two major areas of investment in natural capital - protected areas and investment in restoration. Overall the book underlines the needs and ways to transform our approach to natural capital, and demonstrates how we can practically take into account the value of ecosystems and biodiversity in policy decisions - at national and international levels - to promote the protection of our environment and contribute to a sustainable economy and to the wellbeing of societies.

**The War of the Poor** Commons Strategy Group and Off the Common Press  
Detectives Jeppe Kørner and Anette Werner from the #1 international bestseller *The Tenant*—which New York Times bestselling author Kathy Reichs heralded as a “stunning debut”—return in this compulsively readable thriller as they race to solve a series of sordid murders linked to some of the most vulnerable patients in a Danish hospital. Hospitals are

supposed to be places of healing. But in the coronary care unit at one of Copenhagen's leading medical centers, a nurse fills a syringe with an overdose of heart medication and stealthily enters the room of an older male patient. Six days earlier, a paperboy on his route in central Copenhagen stumbles upon a macabre find: the naked body of a dead woman, lying in a fountain with arms marked with small incisions. Cause of death? Exsanguination—the draining of all the blood in her body. Clearly, this is no ordinary murder. Lead Investigator Jeppe Kørner, recovering from a painful divorce and in the throes of a new relationship, takes on the investigation. His partner, Anette Werner, now on maternity leave after an unexpected pregnancy, is restless at home with a demanding newborn and an equally demanding husband. While Jeppe pounds the streets looking for answers, Anette decides to do a little freelance sleuthing. But operating on her own exposes her to dangers she can't even begin to fathom. As the investigation ventures into dark corners, it uncovers the ambition and greed that festers beneath the surface of caregiving institutions—all

the more shocking for their depravity—and what Jeppe and Anette discover will turn their blood as cold as ice....

*The Economics of Ecosystems and Biodiversity in National and International Policy Making* Dorling Kindersley Ltd Human well-being is dependent upon 'ecosystem services' provided by nature for free, such as water and air purification, fisheries, timber and nutrient cycling. These are predominantly public goods with no markets and no prices, so their loss is often not detected by our current economic incentive system and therefore continues unabated. A variety of pressures resulting from population growth, changing diets, urbanisation, climate change and many other factors is causing biodiversity to decline and ecosystems to be degraded. The world's. New African Fashion Prestel Publishing Betty A. Reardon's groundbreaking work, originally authored in 1988, provides one of the first and clearest articulations of the field of peace education in theory and practice. Through reflection on her own experiences, Reardon assesses the state of peace education and offers a new comprehensive approach. She addresses

the need to help educators and citizens alike understand what peace education is, why it is needed, and how it is and should be pursued. She investigates the root causes of the violent conditions facing society so that we can better understand how education can be used to interrupt the cycles of violence and create the conditions for sustainable peace and justice. Comprehensive peace education, for the author, takes place at every level, and in every subject area, of both formal and non-formal education. In this special 2021 Edition, Reardon provides a new, reflective introduction on the emerging needs and challenges to the field for the 21st century. Formal and non-formal educators, theorists, students and activists will find practical and transformative wisdom immediately applicable to diverse conditions and contexts in *Comprehensive Peace Education*. Betty A. Reardon is acknowledged around the world as one of the founders of the field of peace education. She has been extensively involved in the international peace education movement and has been published widely in the field. She is a co-founder of both the International Institute

on Peace Education and the Global Campaign for Peace Education.

"Let's face it, just because I stick out my tongue a lot and spit fire doesn't mean I have any qualifications to advise anyone on relationship, money or career issues. I don't. Yet I've lived with a beautiful woman for twenty years with never a cross word between us, in a relationship based on honesty and full disclosure. I've amassed a fortune--and "expert business people" work for me. And for three decades I've been in KISS--a band that has scaled the heights and broken every possible record, from album sales to touring to merchandising and licensing. What I have and have always had (thanks in full to my mother's wisdom) is an abiding faith in me. Call it a "life philosophy": a philosophy about money (mine!) and happiness (mine again). It works for me. It can work for you!

The most secretive, repressive state in Africa is hemorrhaging its citizens. In some months as many Eritreans as Syrians arrive on European shores, yet the country is not convulsed by civil war. Young men

and women risk all to escape. Many do not survive - their bones littering the Sahara; their bodies floating in the Mediterranean. Still they flee, to avoid permanent military service and a future without hope. As the United Nations reported: 'Thousands of conscripts are subjected to forced labor that effectively abuses, exploits and enslaves them for years.' Eritreans fought for their freedom from Ethiopia for thirty years, only to have their revered leader turn on his own people. Independent since 1993, the country has no constitution and no parliament. No budget has ever been published. Elections have never been held and opponents languish in jail.

International organizations find it next to impossible to work in the country. Nor is it just a domestic issue. By supporting armed insurrection in neighboring states it has destabilized the Horn of Africa. Eritrea is involved in the Yemeni civil war, while the regime backs rebel movements in Somalia, Ethiopia and Djibouti. This book tells the untold story of how this tiny nation became a world pariah.

Ethiopia stands as a land apart: never colonised, the country celebrates and preserves ancient traditions. The fascinating cuisine is enriched with the different religious influences of Judaism, Christianity and Islam - a combination unique to Africa. The delicious dishes featured are Doro Wat, chicken slowly stewed with berbere spice, Yeassa Alichia, curried fish stew, and Siga Tibs, flashfried beef cubes, as well as a wealth of vegetarian dishes such as Gomen, minced collard greens with ginger and garlic and Azifa, green lentil salad. Chef Yohanis takes the reader on a journey through all the essential dishes of his native country, including the traditional Injera made from the staple grain teff and synonymous with an Ethiopian feast, along the way telling wondrous stories of the local communities and customs. Complete with photography of the country's stunning landscapes and vibrant artisans, this book demonstrates why Ethiopian food should be considered as one of the world's greatest, most enchanting cuisines.

Eritrea is located in northeast Africa on the Red Sea coast and boasts one of the oldest human settlements in the region. One-million-year-old human remains have been found in the Danakil Depression in the country, which is home to one of the oldest-written scripts in sub-Saharan Africa: Ge'ez. Eritrea was also pioneer in multi-party democracy in Africa and had a democratic constitution based on United Nations principles in 1952. But it is also home to one of the earliest armed liberation movements in Africa - a conflict that Mohamed Kheir Omer witnessed firsthand, having grown up in Eritrea as a member of the Eritrean Liberation Front (ELF). In this book, he traces the history of the country, exploring how ethnicity, religion, geography, colonialism, and other factors have shaped its fate - and what must be done to ensure its people enjoy a brighter future. The history of Eritrea is similar to others on the continent, and its people continue to struggle to build a just,

democratic, and inclusive country.

The role of HRM in developing sustainable business organizations is increasingly attracting attention. Sustainability can be used as a principle for HRM itself and the tasks of Sustainable HRM are twofold. On the one hand it fosters the conditions for individual employee sustainability and develops the ability of HRM systems to continuously attract, regenerate and develop motivated and engaged employees by making the HRM system itself sustainable. On the other hand Sustainable HRM contributes to the sustainability of the business organizations through cooperation with the top management, key stakeholders and NGOs and by realising economic, ecological, social and human sustainability goals. This book provides a comprehensive review of the new area of Sustainable HRM and of research from different disciplines like sustainable work systems, ergonomics, HRM, linking sustainability and HRM. It brings together the views of academics and practitioners and provides many ideas

for conceptual development, empirical exploration and practical implementation. This publication intends to advance the international academic and practice-based debates on the potential of sustainability for HRM and vice versa. In 19 chapters, 26 authors from five continents explore the role of HRM in developing economically, socially and ecologically sustainable organizations, the concept of Sustainable HRM and the role of HRM in developing Sustainable HRM systems and how sustainability and HRM are conceptualized and perceived in different areas of the world.
