Market\_Desc: Consultants, IS managers, and project team members for FI/CO systems. Also, end users who have been left to maintain a system after a project's conclusion. Special Features: " Only book on the market for SAP team members who need to configure and customize the FI/CO module. Covers configuration issues in far more depth than other books, which focus on the theory of FI/CO and functionality from only an end-user perspective." The book's approach is ideally suited to the needs of the audience. The emphasis is on teaching people how to configure the system to deliver functionality. The authors use case studies and detailed tables to explore the variations in setup depending on the environment the module is being used in." FI and CO are the most widely used of the SAP modules, both domestically and abroad. About The Book: SAP is the leading ERP (Enterprise Resource Planning) product in the market, with more than 30 percent market share. FI/CO, the Financial and Controlling modules, are the most popular modules in the package and are used by thousands of SAP customers in various industries. (20,000 companies have installed SAP; more than half have the financial package). Configuring and customizing the SAP modules is still one of the most expensive and time-consuming parts of the implementation, because consultants are expensive and support from SAP is slow. This book is valid for both versions 3.x and 4.x of R/3.

The post implementation or SAP FICO Audit Comprises of a widespread listing of important business process perils, along with commonly acknowledged information technology objectives and recommended regulators to meet the objectives. Finally, a set of step by step functions performed by End User exercise are provided for practice. The Book is Unique in the sense that it deals with all three types of training needed for a SAP FICO Professional. Without having a clear idea of Settings in FICO other Modules Learning is ineffective. The book provides Implementation guidance through Explanation of why each task is performed and the key tables in SAP associated with each step. What you will learn? 1. The Book Initially takes you through Logistics Management which is the base of all Business Process and since

almost everything comes under Logistics. 2. Further It Gives You Clear Understanding of ERP and ALL the SAP functionalities available in simple layman's Language. 3. Provides you with a virtual firm's SAP R/3 FICO Step by Step Full Implementation Guide. 4. Most of the Materials do not help you in implementation in a sequential method. This book carries you with a sequential step such as in a particular order. 5. The Book also helps you to practice exercise at end of almost every sessions. 6. Most of the tutorials that exist in online do not explain the concepts. 7. It guides you with End User Training in FICO. POST IMPLEMENTATION SAMPLE Control Objective Company codes employed in the system should be set to productive Control Description In case of post go-live actions, there are some configurations that must be turned on to replicate that the SAP system is active for use and to protect the data that has been transferred to the production system. In a normal SAP recommends, the functioning company codes should be marked as productive, as soon as the implementation happens. This configuration specifies and endorses the active status of the company code and by default would limit the unsanctioned changes, comprising data deletion in the production server. Risk Here the risk is mistaken deletion of master & transactional data, which will unfavorably influence the system reliability. Test Steps Here we check the global company code configuration to confirm if the appropriate company codes are marked as Productive. For This Follow Step 15.1.1. We can see that Company code B100 is not Productive as such to make it productive follow the steps in 15.1.2.
