 The purpose of this monthly digest is to help to encourage and assist in the daily reading of the ministry in the Lord's recovery. Its two specific goals are: (1) to help the saints to enter into the riches of The Collected Works of Witness Lee and

(2) to provide ministry content for the churches in their corporate weekly pursuit. The Collected Works of Witness Lee comprises one hundred thirty-nine volumes arranged chronologically by year. In this digest we will focus primarily on specific topics from many of these volumes and introduce selected readings on these topics to saints who do not have access to the printed volumes. It is our desire to help the saints get into the riches contained in The Collected Works of Witness Lee topic by topic. This publication will help the saints and churches develop a taste and deepen the desire for reading the ministry in a consistent way. It is intended to supplement and not replace the Recovery Version of the Bible, the Life-study messages, The Holy Word for Morning Revival, and The Ministry of the Word

magazine. Each issue of Ministry Digest will be divided into four sections with four messages in each section. The first issue begins the following four sections: 1. The History of the Lord's Recovery 2. Words for New Believers 3. Maturing in Life 4. The High Peak of the Divine Revelation

 This report, from the Select Committee on Modernisation of the House of Commons, presents the first inquiry into the Governance of Britain, all issued as Command Papers and published in 2007:

It considers Parliament's role in scrutinising the proposed legislative programme, including arrangements for publication and debate as well as wider consultative strategies. The Committee has set out a number of conclusions and recommendations, including: the Committee believes that the use of plain English in the Draft Legislative Programme is to be commended, and the Government should consider extending the approach to programmed Bills on a trial basis; that the Government's main non-legislative plans should be included in the Draft Legislative Programme, alongside the list of proposed bills, in order that a full programme of government is available for scrutiny; that there is a benefit to be derived from the presentation of the Government's legislative programme as a whole and that the Draft Legislative Programme should be published earlier in the year, preferably before Easter, so that select committee scrutiny and public consultation can be carried out more effectively; that the Draft Legislative Programme should be the subject of a separate debate in Parliament.

Letters of Note, the book based on the beloved website of the same name, became an instant classic on publication in 2013, selling hundreds of thousands of copies. This new edition sees the collection of the world's most entertaining, inspiring and unusual letters updated with fourteen riveting new missives and a new introduction from curator Shaun Usher. From Virginia Woolf's heart-breaking suicide letter to Queen Elizabeth II's recipe for drop scones sent to President Eisenhower; from the first recorded use of the expression 'OMG' in a letter to Winston Churchill, to Gandhi's appeal for calm to Hitler; and from Iggy Pop's beautiful letter of advice to a troubled young fan, to Leonardo da Vinci's remarkable job application letter, Letters of Note is a celebration of the power of written correspondence which captures the humour, seriousness, sadness and brilliance that make up all of our lives.

"In 1955 a conference was held in Bandung, Indonesia that was attended by representatives from twenty-nine developing nations. Against the backdrop of crumbling European colonies, Asian and African leaders forged a new alliance and established anti-imperial principles for a new world order. The conference captured the popular imagination across the Global South. Bandung's larger significance as counterpoint to the dominant world order was both an act of collective imagination and a practical political project for decolonization that inspired a range of social movements, diplomatic efforts, institutional experiments and heterodox visions of the history and future of the world. This book explores what the spirit of Bandung has meant to people across the world over the past decades and what it means today. Experts from a wide range of fields show how, despite the complicated legacy of the conference, international law was never the same after Bandung"--

A new and provocative take on the formerly classified history of accelerating superpower military competition in space in the late Cold War and beyond. In March 1983, President Ronald Reagan shocked the world when he established the Strategic Defense Initiative (SDI), derisively known as "Star Wars," a space-

based missile defense program that aimed to protect the US from nuclear attack. In *Weapons in Space*, Aaron Bateman draws from recently declassified American, European, and Soviet documents to give an insightful account of SDI, situating it within a new phase in the militarization of space after the superpower détente fell apart in the 1970s. In doing so, Bateman reveals the largely secret role of military space technologies in late-Cold War US defense strategy and foreign relations. In contrast to existing narratives, *Weapons in Space* shows how tension over the role of military space technologies in American statecraft was a central source of SDI's controversy, even more so than questions of technical feasibility. By detailing the participation of Western European countries in SDI research and development, Bateman reframes space militarization in the 1970s and 1980s as an international phenomenon. He further reveals that even though SDI did not come to fruition, it obstructed diplomatic efforts to create new arms control limits in space. Consequently, *Weapons in Space* carries the legacy of SDI into the post-Cold War era and shows how this controversial program continues to shape the global discourse about instability in space—and the growing anxieties about a twenty-first-century space arms race.

The decision made by the United Kingdom in 2016 to leave the European Union has produced shock waves across Europe and the world. Brexit calls into question consolidated assumptions on the finality of the EU, and simultaneously sparks new challenges. These new challenges are not only in regard of the constitutional settlements reached in the UK, notably in Scotland and Northern Ireland, but also on the future of European integration. Now that Article 50 of the Treaty on the European Union has been invoked, and the path towards full withdrawal by the UK from the EU remains clouded in uncertainties, a comprehensive legal and political analysis of how Brexit impacts on UK and the EU appears of the utmost importance. This book brings together leading lawyers, economists and political scientists to discuss the constitutional implications of Brexit and propose possible solutions for the way forward. The book is structured around four main themes. First, it considers how Brexit will be implemented legally and politically, in terms of the withdrawal and the possible new relations between the UK and the EU. Second, it examines the implications of Brexit on the constitutional structure of the UK, as well as on the status of

Northern Ireland and the relations with the Republic of Ireland. Third, it examines the implications of Brexit on the constitutional structure of the EU, focusing on a number of key areas of EU policy-making, notably the Area of Freedom Security and Justice, the Single Market, and Economic and Monetary Union. Finally, the book looks to the mid to long-term future, and discusses the prospects for relaunching the EU after Brexit.

Relations between mainland China and Taiwan have improved markedly in recent years, giving rise to the key question, How far can the current rapprochement go? This book focuses on how mainland China-Taiwan relations are likely to develop in future. It considers economic relations, including the many recent trade agreements, the political sphere, where there has been little progress, the impact of increasing personal, social contacts, and the role of international actors, especially the United States. The book concludes by arguing that the present "circulatory dialogue" is likely to continue, without a transformative breakthrough.

Confronted with the complex environmental crises of the Anthropocene, scientists have moved towards an interdisciplinary approach to address challenges that are both social and ecological. Several arenas are now calling for co-production of new transdisciplinary knowledge by combining Indigenous knowledge and science. This book revisits epistemological debates on the notion of co-production and assesses the relevant methods, principles and values that enable communities to co-produce. It explores the factors that determine how indigenous-scientific knowledge can be rooted in equity, mutual respect and shared benefits. Resilience through Knowledge Co-Production includes several collective papers co-authored by Indigenous experts and scientists, with case studies involving Indigenous communities from the Arctic, Pacific islands, the Amazon, the Sahel and high altitude areas. Offering guidance to indigenous peoples, scientists, decision-makers and NGOs, this book moves towards a decolonised co-production of knowledge that unites indigenous knowledge and science to address global environmental crises.

The Routledge International Handbook of Heritage and Politics surveys the intersection of heritage and politics today and helps elucidate the political implications of heritage practices. It explicitly addresses the political and analyses tensions and struggles over the distribution of power. Including contributions from early-career scholars and more established researchers, the Handbook provides global and interdisciplinary perspectives on the political nature, significance and consequence of heritage and the various practices of management and interpretation. Taking a broad view of heritage, which includes not just tangible and intangible phenomena, but the ways in which people and societies live with, embody, experience, value and use the past, the volume provides a critical survey of political tensions over heritage in diverse social and cultural contexts. Chapters within the book consider topics such as: neoliberal dynamics; terror and mobilisations of fear and hatred; old and new nationalisms; public policy; recognition; denials; migration and refugeeism; crises; colonial and decolonial practice; communities; self- and personhood; as well as international relations, geopolitics, soft power and cooperation to address global problems. The Routledge International Handbook of Heritage and Politics makes an intervention into the theoretical debate about the nature and role of heritage as a political resource. It is essential reading for academics and students working in heritage studies, museum studies, politics, memory studies, public history, geography, urban studies and tourism.

Public diplomacy is the art of cultivating public opinion to achieve foreign policy objectives. A vital tool in contemporary statecraft, public diplomacy is also one of the most poorly understood elements of a nation's "soft power." The United States and Public Diplomacy adds historical perspective to the ongoing global conversation about public diplomacy and its proper role in foreign affairs. It highlights the fact that the United States has not only been an important sponsor of public diplomacy, it also has been a frequent target of public diplomacy initiatives sponsored by others. Many of the essays in this collection look beyond Washington to explore the ways in which foreign states, non-governmental organizations, and private citizens have used public diplomacy to influence the government and people of the United States.
