**From Caxton to Beckett** New Africa Books

In a cruel and arbitrary world, where disturbing lapses in logic are commonplace, five orphans must face their traumatic origins. Gabriella is a crippled angel, haunted by her inability to interpret prophecies. Cur is the rabid leader of a sect of dogs, desperate to escape his inheritance. Cuckoo is a gambler with a wax face determined to find a fixed identity before his luck runs out. Maggie is a thief in search of the perfect photographic subject, but terrified of going blind. Crow is a leper trying to distil the essence of death as an antidote to dying. Each of them is deformed; each has a special ability; each is connected to all of the others. And each gets exactly what they deserve. Or do they?

Many saints have borne the stigmata - wounds resembling those of Christ's crucifixion. While some of those saints have written about their experience, little is known of the personal experience of the first of all saints to brandish this extraordinary sign, Francis of Assisi. They were and have remained his carefully guarded secret. In *The Five Wounds of Saint Francis*, author Fr. Solanus Benfatti, CFR, explores the significance of this miraculous event in the Saint's life through careful analysis of pertinent medieval literature and recent scholarly studies. He establishes the historicity of the event, which has been called into question, and draws surprising and inspiring conclusions, leaving the reader with a afresh understanding of Saint Francis's spiritual experience.

*Seeing Through the Veil* Europa Editions

Francis of Assisi's reported reception of the stigmata on Mount La Verna in 1224 is almost universally considered to be the first documented account of an individual miraculously and physically receiving the five wounds of Christ. The early thirteenth-century appearance of this miracle, however, is not as unexpected as it first seems. Interpretations of Galatians 6:17—I bear the marks of the Lord Jesus Christ in my body—had been circulating since the early Middle Ages in biblical commentaries. These works perceived those with the stigmata as metaphorical representations of martyrs bearing the marks of persecution in order to spread the teaching of Christ in the face of resistance. By the seventh century, the meaning of Galatians 6:17 had been appropriated by bishops and priests as a sign or mark of Christ that they received invisibly at their ordination. Priests and bishops came to be compared to soldiers of Christ, who bore the brand (stigmata) of God on their bodies, just like Roman soldiers who were branded with the name of their

emperor. By the early twelfth century, crusaders were said to bear the actual marks of the passion in death and even sometimes as they entered into battle. The Stigmata in Late Medieval and Early Modern Europe traces the birth and evolution of religious stigmata and particularly of stigmatic theology, as understood through the ensemble of theological discussions and devotional practices. Carolyn Muessig assesses the role stigmatics played in medieval and early modern religious culture, and the way their contemporaries reacted to them. The period studied covers the dominant discourse of stigmatic theology: that is, from Peter Damian's eleventh-century theological writings to 1630 when the papacy officially recognised the authenticity of Catherine of Siena's stigmata.

Devotion to the Five Wounds of Jesus has long been one of the most popular forms of Catholic spirituality. David Williams traces the roots of this devotion in Holy Scripture: the words of the prophets foretell the suffering Christ, while the New Testament witnesses to the victorious scars borne by the risen Lord. The Sacred Wounds of Jesus remained a persistent theme in the writings of the Desert Fathers and Doctors of the Church, a theme that was to be more fully developed in the devotional practice of the mediaeval period and on into modern times. Detailing the several forms of devotion to the Five Wounds has taken (both mediaeval and modern) - in art, liturgy and poetry - David Williams recalls those holy people favoured by visions of the suffering Lord, as well as those who themselves came to bear the stigmata of Christ. He outlines the history of devotion to the specific wound in the Side - later seen as the Sacred Heart of Jesus, and describes the 'gift of tears' given to some from their reflection upon the Passion of their Master. David Williams is the author of *The Cistercians on the Early Middle Ages* and *The Welsh Cistercians*, both published by Gracewing. [Of the Five Wounds of the Holy Church](#) W. W. Norton & Company

If the turn of the twenty-first century was characterised by the 'history wars' in which bitter internecine battles raged between different historical schools, Jonathan Steinberg was noteworthy for his methodological pluralism. His own historical work spanned diplomatic history, military history, the social history of war, biography, social history, banking history, political culture and genocide studies. He often employed a comparative historical approach, which teased out deep historical explanations by examining personalities, nations and traditions simultaneously. This book offers a critical appreciation of his contribution to modern historical practice with contributions by former students and colleagues, whose own interests are as diverse as those of Steinberg himself. "Masterly...Quade has created a world bristling with compassion and humanity. The characters and the challenges they face are wholly realized and moving; their journeys span a wide spectrum of emotion and it is impossible not to root for [them]." —Alexandra Chang, *New York Times Book Review* It's Holy Week in the small town of Las Penas, New Mexico, and thirty-three-year-old unemployed Amadeo Padilla has been given the part of Jesus in the Good Friday procession. He is preparing feverishly for this role when his fifteen-year-old daughter Angel shows up pregnant on his doorstep and disrupts his plans for personal redemption. With weeks to go until her due date, tough, ebullient Angel has fled her mother's house, setting her life on a startling new path. Vivid, tender, funny, and beautifully rendered, *The Five Wounds* spans the baby's first year as five generations of the Padilla family converge: Amadeo's mother, Yolanda, reeling from a recent discovery; Angel's mother, Marissa, whom Angel isn't speaking to; and disapproving Tive, Yolanda's uncle and keeper of the family's history. Each brings expectations that Amadeo, who often solves his problems with a beer in his hand, doesn't think he can live up to. *The Five Wounds* is a miraculous debut novel from a writer whose stories have been hailed as "legitimate masterpieces" (*New York Times*). Kirstin Valdez Quade conjures characters that will linger long after the final page, bringing to life their struggles to parent children they may not be equipped to save.

In *Transmitted Wounds*, Amit Pinchevski explores the ways media technology and logic shape the social life of trauma both clinically and culturally. Bringing media theory to bear on trauma theory, Pinchevski reveals the technical operations that inform the conception and experience of traumatic impact and memory. He offers a bold thesis about the deep association of media and trauma: media bear witness to the human failure to bear witness, making the traumatic technologically transmissible and reproducible. Taking up a number of case studies--the radio broadcasts of the Eichmann trial; the videotaping of Holocaust testimonies; recent psychiatric debates about trauma through media following the 9/11 attacks; current controversy surrounding drone operators' post-trauma; and digital platforms of algorithmic-holographic witnessing and virtual reality exposure therapy for PTSD--Pinchevski demonstrates how the technological mediation of trauma feeds into the traumatic condition itself. The result is a novel understanding of media as constituting the material conditions for trauma to appear as something that cannot be fully approached and yet somehow must be. While drawing on contemporary materialist media theory, especially the work of Friedrich Kittler and his followers, Pinchevski goes beyond the anti-humanistic tendency characterizing the materialist approach, discovering media as bearing out the human vulnerability epitomized in trauma, and finding therein a basis for moral concern in the face of violence and atrocity. *Transmitted Wounds* unfolds the ethical and political stakes involved in the technological transmission of mental wounds across clinical, literary, and cultural contexts.
