Children's Human Body Encyclopedia Parragon
 You Can Help Our Earth Live Longer! Everything we do has an impact on the world around us—from the clothes we wear and food we eat to the gardens we grow and the trash we throw away. And to take the best care of the earth—and ourselves—it's important to make smart choices. With The Everything Kids' Environment Book, you'll find out what you can do every day to help protect our planet. You'll also learn why the rainforest is so important to us, how animals go extinct, and what environmentalists can tell us about taking good care of our world. Learn how to "go green" and to: Find new uses for recycled grocery bags. Create your own greenhouse. Make acid rain—safely!--to see how it affect plants. Test organic food against foods grown with chemicals. Make your own compost pile. Re-create deforestation with the soil from timbered trees. Test your sensitivity to noise. Whether you are in the classroom, surfing the Internet, or just hanging out with your friends, you can make a difference. Start today--so our Earth can live another 4.5 billion years!

Discovery Kids Human Body Courier Corporation
From your head to your toes, this encyclopedia for children takes you on a tour of the human body and explains how each part works. On every page, discover amazing facts about the human body. Did you know that you are made up of 100 trillion cells? Learn about blood vessels (capillaries, veins, and arteries) which, if they were laid out end to end, would wrap around the Earth twice! Find out what makes a balanced diet - after all, you will eat about 20 tonnes of food in your entire life! See what part of the brain makes you appreciate music (it's the right side). There are also fun quizzes, so you can assess your own personality and test your logical and reasoning skills. An international best-seller since 2012, Human Body: A Children's Encyclopedia has now been fully updated in line with the latest research. Combining clear descriptions of human biology with awesome photographs, graphics, and CGI artworks, make your way from the skin, muscles, organs, bones, right down to your cells and DNA. From homework projects to just reading for curiosity, this comprehensive encyclopedia is filled with everything that you need to know about what makes your body tick.
