HARDY CUNNINGHAM

The Big Book of Farts Orient Blackswan

"An illustrated guide to whether or not various animals pass gas, infused with humor and scientific facts."--

Underground Houghton Mifflin Harcourt

Blast off on an exploration of outer space with this colorful solar system book for kids 3-5 Get little astronomers excited about the cosmos—from the bright and burning sun, to our own blue Earth, stormy Neptune, and every planet in between. With this incredible exploration of planets for preschool and kindergarten kids, curious learners will discover the ultimate solar system book, featuring amazing pictures and fascinating facts about what makes each planet so special, including its size, distance from the sun, what the surface is like, how many moons it has, and more! Go beyond other planet books for kids with: BIG, BEAUTIFUL IMAGES: Vibrant photos and illustrations will take kids deep into space—no telescope required. ASTRONOMY FOR KIDS: Learn all about the eight planets in our solar system, plus dwarf planets Ceres, Pluto, Eris, Haumea, and Makemake. FUN SPACE FACTS: Did you know the bubbles in soda are the same gas that's on Venus? Out of this world facts will make this toddler space book a hit! Show kids the amazing universe that surrounds them with My First Book of Planets.

Command Of The Air Icon Books Ltd

This volume analyzes and summarizes recent developments in several key interfacial electrochemical systems in the areas of fuel cell electrocatalysis, electrosynthesis and electrodeposition. The six Chapters are written by internationally recognized experts in these areas and address both fundamental and practical aspects of several existing or emerging key electrochemical technologies. The Chapter by R. Adzic, N. Marinkovic and M. Vukmirovic provides a lucid and authoritative treatment of the electrochemistry and electrocatalysis of Ruthenium, a key element for the development of efficient electrodes for polymer electrolyte (PEM) fuel cells. Starting from fundamental surface

science studies and interfacial considerations, this up-to-date review by some of the pioneers in this field, provides a deep insight in the complex catalytic-electrocatalytic phenomena occurring at the interfaces of PEM fuel cell electrodes and a comprehensive treatment of recent developments in this extremely important field. Several recent breakthroughs in the design of solid oxide fuel cell (SOFC) anodes and cathodes are described in the Chapter of H. Uchida and M. Watanabe. The authors, who have pioneered several of these developments, provide a lucid presentation describing how careful fundamental investigations of interfacial electrocatalytic anode and cathode phenomena lead to novel electrode compositions and microstructures and to significant practical advances of SOFC anode and cathode stability and enhanced electrocatalysis.

Global Trends 2040 Cosimo Reports

This book presents WHO guidelines for the protection of public health from risks due to a number of chemicals commonly present in indoor air. The substances considered in this review, i.e. benzene, carbon monoxide, formaldehyde, naphthalene, nitrogen dioxide, polycyclic aromatic hydrocarbons (especially benzo[a]pyrene), radon, trichloroethylene and tetrachloroethylene, have indoor sources, are known in respect of their hazardousness to health and are often found indoors in concentrations of health concern. The guidelines are targeted at public health professionals involved in preventing health risks of environmental exposures, as well as specialists and authorities involved in the design and use of buildings, indoor materials and products. They provide a scientific basis for legally enforceable standards.

The Antiques Magpie Springer Science & Business Media

In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the

point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

The Biscuit Becker & Mayer

From the mythical artefacts of the ancient world to saucy seaside postcards, *The Antiques Magpie* explores the wonderful world of antiques and collectables. With *Antiques Roadshow* regular Marc Allum as your guide, go in search of stolen masterpieces, explore the first museums, learn the secrets of the forgers and brush up on your auction technique. Meet the garden gnome insured for £1 million, track down Napoleon's toothbrush, find out how to spot a corpse in a Victorian photograph - and much more. This book is for anyone who's ever been fascinated by what relics of the past tell us about history - and what they are worth today.

Does It Fart? Simon and Schuster

This book presents in detail a pair of models of the economics of climate change. The models, called RICE-99 (for the Regional Dynamic Integrated model of Climate and the Economy) and DICE-99 (for the Dynamic Integrated Model of Climate and the Economy) build on the authors' earlier work, particularly their RICE and DICE models of the early 1990s. Humanity is risking the health of the natural environment through a myriad of interventions, including the atmospheric emission of trace gases such as carbon dioxide, the use of ozone-depleting chemicals, the engineering of massive land-use changes, and the destruction of the habitats of many species. It is imperative that we learn to

protect our common geophysical and biological resources. Although scientists have studied greenhouse warming for decades, it is only recently that society has begun to consider the economic, political, and institutional aspects of environmental intervention. To do so raises formidable challenges of data modeling, uncertainty, international coordination, and institutional design. Attempts to deal with complex scientific and economic issues have increasingly involved the use of models to help analysts and decision makers understand likely future outcomes as well as the implications of alternative policies. This book presents in detail a pair of models of the economics of climate change. The models, called RICE-99 (for the Regional Dynamic Integrated model of Climate and the Economy) and DICE-99 (for the Dynamic Integrated Model of Climate and the Economy) build on the authors' earlier work, particularly their RICE and DICE models of the early 1990s. They can help policy makers design better economic and environmental policies.

Making the Modern World Random House

This presentation describes various aspects of the regulation of tissue oxygenation, including the roles of the circulatory system, respiratory system, and blood, the carrier of oxygen within these components of the cardiorespiratory system. The respiratory system takes oxygen from the atmosphere and transports it by diffusion from the air in the alveoli to the blood flowing through the pulmonary capillaries. The cardiovascular system then moves the oxygenated blood from the heart to the microcirculation of the various organs by convection, where oxygen is released from hemoglobin in the red blood cells and moves to the parenchymal cells of each tissue by diffusion. Oxygen that has diffused into cells is then utilized in the mitochondria to produce adenosine triphosphate (ATP), the energy currency of all cells. The mitochondria are able to produce ATP until the oxygen tension or PO₂ on the cell surface falls to a critical level of about 4-5 mm Hg. Thus, in order to meet the energetic needs of cells, it is important to maintain a continuous supply of oxygen to the mitochondria at or above the critical PO₂. In order to accomplish this desired outcome, the cardiorespiratory system, including the blood, must be capable of regulation to ensure survival of all tissues under a wide range of circumstances. The purpose of this presentation is to provide basic information about the operation and regulation of the cardiovascular and respiratory systems, as

well as the properties of the blood and parenchymal cells, so that a fundamental understanding of the regulation of tissue oxygenation is achieved.

True Facts That Sound Like Bull\$#!t Simon and Schuster

We all do it! It's a fact. And there are so many more facts about farting you probably don't know. Here's the book that will astonish, amaze and not at least give you a good laugh. 99 Facts About Farts is an easy to read astonishing book of facts for all ages. Explore this fun and smelly gas we all produce. You will not regret it!

Farty Pants Sourcebooks, Inc.

Attention merchant: an industrial-scale harvester of human attention. A firm whose business model is the mass capture of attention for resale to advertisers. In nearly every moment of our waking lives, we face a barrage of advertising enticements, branding efforts, sponsored social media, commercials and other efforts to harvest our attention. Over the last century, few times or spaces have remained uncultivated by the 'attention merchants', contributing to the distracted, unfocused tenor of our times. Tim Wu argues that this is not simply the byproduct of recent inventions but the end result of more than a century's growth and expansion in the industries that feed on human attention. From the pre-Madison Avenue birth of advertising to TV's golden age to our present age of radically individualized choices, the business model of 'attention merchants' has always been the same. He describes the revolts that have risen against these relentless attempts to influence our consumption, from the remote control to FDA regulations to Apple's ad-blocking OS. But he makes clear that attention merchants grow ever-new heads, and their means of harvesting our attention have given rise to the defining industries of our time, changing our nature - cognitive, social, and otherwise - in ways unimaginable even a generation ago.

The Tooth Book Atlantic Books

A book all about your pearly whites and their enemy - cavities! What crazy T-word will come out of Booth's gap in his teeth? Before you turn the page, have your child make a guess. Will it be a tooth or something else? Later your child will learn about baby and adult teeth, the different kinds of teeth, the anatomy of a tooth, fillings, crowns, and cavities and how to prevent them from forming. Just remember one thing - if you think

something strange is happening with your teeth, tell a parent!

A Confederacy of Dunces Penguin

Presents fascinating, unusual, and gross facts about excrement.

The Martian Pickle Partners Publishing

One of the BBC's '100 Novels That Shaped Our World' 'My favourite book of all time... it stays with you long after you have read it - for your whole life, in fact' Billy Connolly A monument to sloth, rant and contempt, a behemoth of fat, flatulence and furious suspicion of anything modern - this is Ignatius J. Reilly of New Orleans, noble crusader against a world of dunces. The ordinary folk of New Orleans seem to think he is unhinged. Ignatius ignores them, heaving his vast bulk through the city's fleshpots in a noble crusade against vice, modernity and ignorance. But his momma has a nasty surprise in store for him: Ignatius must get a job. Undaunted, he uses his new-found employment to further his mission - and now he has a pirate costume and a hot-dog cart to do it with... Never published during his lifetime, John Kennedy Toole's hilarious satire, *A Confederacy of Dunces* is a Don Quixote for the modern age, and this Penguin Modern Classics edition includes a foreword by Walker Percy. 'A pungent work of slapstick, satire and intellectual incongruities ... it is nothing less than a grand comic fugue' *The New York Times* *Fart Proudly* Frog Books

"Vaclav Smil is my favorite author... Numbers Don't Lie takes everything that makes his writing great and boils it down into an easy-to-read format. I unabashedly recommend this book to anyone who loves learning."--Bill Gates, GatesNotes From the author of *How the World Really Works*, an essential guide to understanding how numbers reveal the true state of our world--exploring a wide range of topics including energy, the environment, technology, transportation, and food production. Vaclav Smil's mission is to make facts matter. An environmental scientist, policy analyst, and a hugely prolific author, he is Bill Gates' go-to guy for making sense of our world. In *Numbers Don't Lie*, Smil answers questions such as: What's worse for the environment--your car or your phone? How much do the world's cows weigh (and what does it matter)? And what makes people happy? From data about our societies and populations, through measures of the fuels and foods that energize them, to the impact of transportation and inventions of our modern world--and how all of this affects the planet itself--in *Numbers Don't Lie*, Vaclav Smil

takes us on a fact-finding adventure, using surprising statistics and illuminating graphs to challenge conventional thinking. Packed with fascinating information and memorable examples, *Numbers Don't Lie* reveals how the US is leading a rising worldwide trend in chicken consumption, that vaccination yields the best return on investment, and why electric cars aren't as great as we think (yet). Urgent and essential, with a mix of science, history, and wit--all in bite-sized chapters on a broad range of topics--*Numbers Don't Lie* inspires readers to interrogate what they take to be true.

Everyone Poops John Wiley & Sons

An colorfully illustrated encyclopedia of fart facts, jokes, riddles, and more! Flatulently funny and perfect for ages 7-12! With humorous entries that include types of farts, food items that cause gas, what farts are called in different countries, jokes and riddles, sidebars, science, rules, advice, how to's, and more, this book is the gassiest gift for the fart fan in any family. It contains a mishmash of information, perfect for bathroom reading and rippin' jokes with your pals. Entries include: Dog, the: Who you blame when you pass gas at the dinner table. How to save a fart for later. Fart in a glass Mason jar. Quickly put the lid on and screw it tightly. Have a friend open it later. Once you've done this, send us a note telling us whether or not it worked. "Hoof Hearted Ice Melted." Say it out loud five times. You'll get it. Pull my finger: What someone says to a friend when they have a fart locked and loaded. Once the friend pulls the finger, the fart is unleashed. Great trick that only works once. Silent but deadly (SBD): A fart that comes out with barely a whisper but then knocks everyone out with its noxious stench.

The Negro Motorist Green Book Alex Gibbons

PRE-ORDER FUNNY YOU SHOULD ASK . . . AGAIN: MORE OF YOUR QUESTIONS ANSWERED BY THE QI ELVES NOW The perfect gift for all those big and little kids in your life who ask 'why...?'. WITH AN INTRODUCTION BY ZOE BALL Pre-order the next book in this series, 222 QI Answers to Your Quite Ingenious Questions, published in paperback on 3rd November. 'QI have outdone themselves!' ALAN DAVIES 'Fabulous . . . A cracker of a book!' SUE PERKINS 'The QI Elves are barnstormingly brilliant.' ZOE BALL 'Genuinely useful and endlessly fascinating.' THE SPECTATOR 'Hilarious.' DAILY MAIL The QI Elves are the brains behind the enduringly popular BBC TV panel show QI. Every

Wednesday the Elves appear on The Zoe Ball Breakfast Show where they answer the ponderings and wonderings of BBC Radio 2's most inquisitive listeners. Dive into this splendid collection of listeners' unusual questions and some unexpected answers that are sure to make your head spin on topics ranging from goosebumps to grapefruit, pizza to pirates and everything in-between. Generously sprinkled with extra facts and questions from the Elves, *Funny You Should Ask . . .* is essential reading for the incurably curious. How much water would you need to put out the Sun? If spiders can walk on the ceiling, why can't they get out of the bath? Why do dads make such bad jokes? Why does red mean 'stop' and green mean 'go'? Can I dig a tunnel to the other side of the Earth? How do plant seeds know which way is up? Can you fill up a black hole? Who popularised the recorder, and where can I get hold of them? You can also follow QI's fact-filled Twitter account @qikipedia and listen to their weekly podcast at nosuchthingasafish.com For more mind-boggling nuggets of wisdom check out the QI FACTS SERIES

My First Book of Planets Simon and Schuster

Prove you are the smartest schmuck in the room with 500 true trivia facts that sound absurd. These facts are so absurd some might even say that they sound like bull\$#*t! Knowledge is power! Crush the competition at trivia night, or start the most interesting conversation ever with real facts that are hard to believe. This book is loaded with mind-blowing facts that are sure to keep you wondering, "How are these even true?" while equipping you to outsmart everyone around and blow their minds. Topics include: Science American Sports History Pop Culture Nature Put your game face on, and prove once and for all that you are the real know-it-all! Gather your friends and family 'round and get ready to learn some wild and crazy trivia and facts such as: True or False? A chicken once survived almost two years after having its head cut off. True or False? The dog that played Toto in *The Wizard of Oz* was paid a salary. How many baseballs does the MLB use every season? What state has jousting as its official sport? True or False? Most Canadians live south of Seattle. Stump everyone with True Facts That Sound Like Bull\$#*t!

Numbers Don't Lie Cider Mill Press

The bestselling author of *Hair of the Dog to Paint the Town Red* share more than 150 baffling, bizarre, and enlightening facts in

the fun trivia collection. This curious, captivating collection of trivia will surprise and intrigue readers with amazing answers to questions like: • Is Jurassic Park possible? • What causes "the shakes" after drinking a lot of alcohol? • Why do dogs walk in circles before lying down? • What makes popcorn pop? The follow-up to the bestselling *What Did We Use Before Toilet Paper?*, *Can Holding in a Fart Kill You?* has even more fun and fascinating trivia. Perfect for the ever-curious trivia lover, this book is the ultimate in truly extraordinary information. From silly to serious to outright bizarre, this expansive collection offers surprising answers and unexpected facts on everything from history and science to pop culture and nature. From the everyday to the fantastical—it's all here. "A very handy book that could honestly, save their life—or just answer all those questions they're maybe too embarrassed to even google." —Buzzfeed

The Fantastic Flatulent Fart Brothers Save the World

Random House

A Fascinating Book about Flatulencels your fart like a car, a truck, or perhaps a submarine?! Join Dr. Butts as he hilariously shows you different farts, then follow along as he answers these stinky questions: Where do farts come from? Why do farts stink? How many times do you fart every day? Is farting bad? Just remember one thing---you can enjoy your farts!

WHO Guidelines for Indoor Air Quality World Health Organization

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) *Global Trends 2040-A More Contested World* (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life.

Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.
