(Music First Express). Instrument Bingo is designed to improve your students' aural perceptions of the tone color and characteristic sounds produced by many familiar musical instruments. Includes 30 player cards, caller cards, a special recording (with six different sequences of sound samples of each level) and helpful instructions for using the game. Available: game/cassette pak, game/CD pak, replacement cassette and replacement CD (set of 2). For all ages.

Fake It 'Til You Make It Addison Wesley

Give your students, librarians, and teachers accurate and reliable information on climate change with Earth's Changing Environment. Written for ages 10 to 17, this comprehensive look at the environment focuses on climate, greenhouse effect, global warming, and the Kyoto Protocol while exploring the delicate web of life with articles on ecology, biogeography, biodiversity, endangered species, deforestation and desertification. The effects of environmental pollution and efforts to protect the environment and to conserve its resources are also addressed.

Stuart J. Murphy travels all over the United States talking to thousands of kids. And you'll never believe what they talk about: MATH! Stuart shows kids that they use math every day -- to share a pizza, spend their allowance, even sort socks. Stuart writes funny stories about math -- and if you read his books, you'll start to see the fun in math, too. Hamster Champs With a few blocks, a board, and a protractor to measure the angles, the hamster

champs have built a ramp that lets them fly high! But will this stunt be good enough to outwit Hector the cat?

Human Motivation Simon and Schuster

There's a whole universe out there ... and this book is your journey into space. Imagine you had a spacecraft capable of travelling through interstellar space. You climb in, blast into orbit, fly out of the solar system and keep going. Where do you end up, and what do you see along the way? The answer is: mostly nothing. Space is astonishingly, mind-blowingly empty. As you travel through the void between galaxies your spaceship encounters nothing more exciting than the odd hydrogen molecule. But when it does come across something more exotic: wow! First and most obviously, stars and planets. Some are familiar from our own backyard: yellow suns, rocky planets like Mars, gas and ice giants like Jupiter and Neptune. But there are many more: giant stars, red and white dwarfs, super-earths and hot Jupiters. Elsewhere are swirling clouds of dust giving birth to stars, and infinitely dense regions of space-time called black holes. These clump together in the star clusters we call galaxies, and the clusters of galaxies we call... galaxy clusters. And that is just the start. As we travel further we encounter ever more weird, wonderful and dangerous entities: supernovas, supermassive black holes, quasars, pulsars, neutron stars, black dwarfs, quark stars, gamma ray bursts and cosmic strings. A Journey Through The Universe is a grand tour of the most amazing celestial objects and how they fit together to build the cosmos. As for the end of the journey - nobody knows. But getting there will be fun. A Journey Through The Universe: Random House Australia
Woodblock prints, essays, and translations scratch to light the secret lives of Japan's mythological felines.

Hollywood Highbrow Ig Publishing

The entries in the journals of two sixth grade students reveal much about their personal feelings, family lives, and a growing interest in poetry sparked by their new substitute teacher.

Buyology Addison-Wesley Professional

In the 1940s it was unheard of for women to be members of a professional orchestra, let alone play "masculine" instruments like the bass or trombone. Yet despite these formidable challenges,

the Montreal Women's Symphony Orchestra (MWSO) became the only all-women orchestra in Canadian history. Formed in 1940, the MWSO became the first orchestra to represent Canada in New York City's Carnegie Hall and one of its members also became the first Canadian black woman to play in a symphony in Carnegie Hall. While the MWSO has paved the way for contemporary female musicians, the stories of these women are largely missing from historical records. From Kitchen to Carnegie Hall illuminates these revolutionary stories, including the life of the incredible Ethel Stark, the co-founder and conductor of the MWSO. Ethel's work opened doors of equal opportunity for marginalized groups and played an important role in breaking gender stereotypes in the Canadian music world.

Take Your Oxygen First Princeton University Press

Noted media pundit and author of Playing the Future Douglas Rushkoff gives a devastating critique of the influence techniques behind our culture of rampant consumerism. With a skilled analysis of how experts in the fields of marketing, advertising, retail atmospherics, and hand-selling attempt to take away our ability to make rational decisions, Rushkoff delivers a bracing account of media ecology today, consumerism in America, and why we buy what we buy, helping us recognize when we're being treated like consumers instead of human beings.

How to Keep an Alien Packt Publishing Ltd

When the queen of her bugs demands that her army march in even lines, Private Joe divides the marchers into more and more lines so that he will not be left out of the parade.

Active Galactic Nuclei and Related Phenomena Rizzoli Publications

An hilarious autobiographical tale of an Irish woman who meets an Australian woman, they fall in love, and have prove to the National Immigration Bureau that they have the right to live together in Ireland even though the Australian woman's visa is expired.

The Great House of God Nicholas Brealey

God's greatest desire is to be your dwelling place -- The home for your heart. He doesn't want to be merely a weekend getaway. He has no interest in being a Sunday bungalow or even a summer cottage. He wants to be your mailing address, your point of

reference, your home ... always. He wants you to live in the Great House of God. Using the Lord's Prayer as a floor plan, Max Lucado takes you on a tour of the home God intended for you. Warm your heart by the fire in the living room. Nourish your spirit in the kitchen. Seek fellowship in the family room. Step into the hallway and find forgiveness. It's the perfect home for you. After all, it was created with you in mind. There's only one home built just for your heart. No house more complete, no structure more solid: The roof never leaks. The walls never crack. The foundation never trembles. In God's house, you're home. So come into the house built just for you. Your Father is waiting.

Brandwashed Second Story Press

A discussion of how modern advertising attempts to control our thoughts and desires in order to make us buy the products it produces. Exploring the use of consumer motivational research and other psychological techniques, including subliminal tactics, this book shows how advertisers secretly manipulate mass desire for consumer goods and products. In addition, Packard also discusses advertising in politics, predicting the way image and personality rapidly came to overshadow real issues in the televised age.

Instrument Bingo State University of New York Press

Six months into their relationship, Bryony found out that Tim suffered from severe clinical depression. This was a secret Tim had kept for a very long time. Fake it 'til you Make it is Edinburgh Fringe First-winner Bryony Kimmings' new work about clinical depression and men, made in collaboration with her partner Tim, who works in advertising. A wickedly warming, brutally honest and powerfully heartbreaking show about the wonders of the human brain, being in love and what it takes to be a "real man". The book contains articles by Andy Field (Forest Fringe), The Vacuum Cleaner (activist and performer) and Georgie Harman (CEO of Beyond Blue), covering performance, art and mental health.

Kaibyō: the Supernatural Cats of Japan Bloomsbury Publishing

Geen departs from the conventional approach to human motivation--going beyond the traditional survey of biological, behavioral, and social bases of motivation--to capture the student's attention and focus on the problems of motivations with which we live every day. Starting from the premise that most human behavior is social behavior, Geen establishes a fundamental

model of the motivational process by integrating the concepts of motive, situation, and incentive within a framework of how people set goals for themselves.

Rhythm Dice Games John Wiley & Sons

Alan Turing was an extraordinary man who crammed into a life of only 42 years the careers of mathematician, codebreaker, computer scientist and biologist. He is widely regarded as a war hero grossly mistreated by his unappreciative country and it has become hard to disentangle the real man from the story. It is easy to cast him as a misfit, the stereotypical professor. But actually Alan Turing was never a professor, and his nickname 'Prof' was given by his codebreaking friends at Bletchley Park. Now, Alan Turing's nephew, Dermot Turing, has taken a fresh look at the influences on Alan Turing's life and creativity, and the later creation of a legend. For the first time it is possible to disclose the real character behind the cipher-text: how did Alan's childhood experiences influence the man? Who were the influential figures in Alan's formative years? How did his creative ideas evolve? Was he really a solitary, asocial genius? What was his wartime work after 1942, and why was it kept even more secret than the Enigma story? What is the truth about Alan Turing's conviction for gross indecency, and did he commit suicide? What is the significance of the Royal Pardon granted in 2013? In Dermot's own style he takes a vibrant and entertaining approach to the life and work of a true genius.

Six Weeks in Saratoga Houghton Mifflin Harcourt

NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can "cool" brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology*

is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Boyfriends and Stuff Bloomsbury Publishing

Designed for those giving care to individuals with Alzheimer's disease and other memory loss disorders, this informative and inspiring guide explores how to take care of oneself in order to meet the challenges of giving care to another. Features a comprehensive resources section and photo scrapbook of Leeza and her family.

Theory Time Red Deer, Alta. : Themes & Variations

A shocking insider's look at how global giants conspire to obscure the truth and manipulate our minds. Marketing visionary Martin Lindstrom has been on the front lines of the branding wars for over twenty years. Here, he turns the spotlight on his own industry, drawing on all he has witnessed behind closed doors, exposing for the first time the full extent of the psychological tricks and traps that companies devise to win our hard-earned dollars. Picking up from where Vance Packard's bestselling classic, *The Hidden Persuaders*, left off more than half-a-century ago, Lindstrom reveals: New findings that reveal how advertisers and marketers intentionally target children at an alarmingly young age - starting when they are still in the womb! Shocking results of an fMRI study which uncovered what heterosexual men really think about when they see sexually provocative advertising (hint: it isn't their girlfriends). How marketers and retailers stoke the flames of public panic and capitalize on paranoia over global contagions, extreme weather events, and food contamination scares. The first ever neuroscientific evidence proving how addicted we all are to our iPhones and our Blackberry's (and the shocking reality of cell phone addiction - it can be harder to shake than addictions to drugs and alcohol). How companies of all stripes are secretly mining our digital footprints to uncover some of the most intimate details of our private lives, then using that information to target us with ads and offers 'perfectly tailored' to our psychological profiles. How certain companies, like the maker of one popular lip balm, purposely adjust their formulas in order to make their products chemically addictive. What a 3-month long guerrilla marketing experiment, conducted specifically for this book, tells us about the most powerful hidden persuader of them

all. And much, much more. This searing expose introduces a new class of tricks, techniques, and seductions - the Hidden Persuaders of the 21st century- and shows why they are more

insidious and pervasive than ever.
