Once Upon A Virus National Geographic Books

Features a new Afterword for this edition. A controversial look at today's sexual hook-up culture, and "[a] book...you won't

stop talking about."-Patricia Cornwell From the front lines of today's sexual battlefield comes an eye-opening examination of the hookup culture, seen through the personal experiences of the teenage girls and young women who live it-and who are left unprepared for its consequences. The Pulitzer Prize-winning author presents a disturbing and enlightening indictment of the hookup culture, the social forces that contribute to it, and what can be done to change it.

Building Open Relationships Springer Nature

Hydrogen exchange mass spectrometry is widely recognized for its ability to probe the structure and dynamics of proteins. The application of this technique is becoming widespread due to its versatility for providing structural information about challenging biological macromolecules such as antibodies, flexible proteins and glycoproteins. Although the technique has been around for 25 years, this is the first definitive book devoted entirely to the topic. Hydrogen Exchange Mass Spectrometry of Proteins: Fundamentals, Methods and Applications brings into one

comprehensive volume the theory, instrumentation and applications of Hydrogen Exchange Mass Spectrometry (HX-MS) - a technique relevant to bioanalytical chemistry, protein science and pharmaceuticals. The book provides a solid foundation in the basics of the technique and data interpretation to inform readers of current research in the method, and provides illustrative examples of its use in bio- and pharmaceutical chemistry and biophysics. In-depth chapters on the fundamental theory of hydrogen exchange, and tutorial chapters on measurement and data analysis provide the essential background for those ready to adopt HX-MS. Expert users may advance their current understanding through chapters on methods including membrane protein analysis, alternative proteases, millisecond hydrogen exchange, top-down mass spectrometry, histidine exchange and method validation. All readers can explore the diversity of HX-MS applications in areas such as ligand binding, membrane proteins, drug discovery, therapeutic protein formulation, biocomparability, and intrinsically disordered proteins.

This Book of Abstracts is the main publication of the 71st Annual Meeting of the European Federation of Animal Science (EAAP). It contains abstracts of the invited papers and contributed presentations of the sessions of EAAP's eleven Commissions: Animal Genetics, Animal Nutrition, Animal Management and Health, Animal Physiology, Cattle Production, Sheep and Goat Production, Pig Production, Horse Production and Livestock Farming Systems, Insects and Precision Livestock Farming.

The Criminalisation of HIV Transmission in Australia New York : C. Scribner's Sons ; Toronto : Maxwell Macmillan Canada
Simon Cooke returns to the city he previously swore to protect, but now that he has retired from his "alternative lifestyle" he has to find a new place in the world.

SEX. BRILL

This monograph addresses the issue of criminal prosecution of people who transmit HIV in Australia, examining the legal, moral and ethical justification for laws criminalising HIV transmission and

the impacts of criminalisation on people with HIV.

Unhooked Riba Publications Limited
Updated Edition of a Best Seller!
Dimensions of Human Behavior: Person and Environment presents a current and comprehensive examination of human behavior using a multidimensional framework. Author Elizabeth D. Hutchison explores the biological dimension and the social factors that affect human development and behavior, encouraging readers to connect their own personal experiences with social trends in order to recognize the unity of person and environment. Aligned with the 2015 curriculum guidelines set forth by the Council on Social Work Education (CSWE), the substantially updated Sixth Edition includes a greater emphasis on culture and diversity, immigration, neuroscience, and the impact of technology. Twelve new case studies illustrate a balanced breadth and depth of coverage to help readers apply theory and general social work knowledge to unique practice situations. The companion volume, *Dimensions of Human Behavior: The Changing Life Course*, Sixth Edition, builds on the

dimensions of person and environment with the dimension of time and demonstrates how they work together to produce patterns in life course journeys. The ISCC-NBS Method of Designating Colors and a Dictionary of Color Names United Nations Publications

Where did we come from? What were our ancestors like? Why do we differ from other animals? How do scientists trace and construct our evolutionary history? *The Evolution of Our Tribe: Hominini* provides answers to these questions and more. The book explores the field of paleoanthropology past and present. Beginning over 65 million years ago, Welker traces the evolution of our species, the environments and selective forces that shaped our ancestors, their physical and cultural adaptations, and the people and places involved with their discovery and study. It is designed as a textbook for a course on Human Evolution but can also serve as an introductory text for relevant sections of courses in Biological or General Anthropology or general interest. It is both a comprehensive technical reference for relevant terms, theories, methods, and species and an overview of the people,

places, and discoveries that have imbued paleoanthropology with such fascination, romance, and mystery. Explorer's Guide to Wildemount (D&D Campaign Setting and Adventure Book) (Dungeons & Dragons) Hogsrefe Publishing

Have you read "that book" on non-monogamy and still wondered "But how do you actually DO this?" Are you totally great on the theory of open relationships, but feel like you don't know how it works in practice? Join Dr. Liz Powell, psychologist, speaker, and coach, as she draws from her education, research, and life experience to bring you *Building Open Relationships*. This new book is an all-inclusive guide to beginning and maintaining your non-monogamous life, no matter where you fall under the non-monogamous umbrella. Complete with worksheets, discussion starters, examples, and hard-won lessons (i.e. my mistakes), this book will give you all the tools you need to be more successful in non-monogamy. *Book of Abstracts of the 71st Annual Meeting of the European Federation of Animal Science* Brill Wageningen Academic

Discover the secrets to successful open relationships. *A Happy Life in an Open Relationship* is a handbook to healthy nonmonogamous relationships. For anyone curious about open relationships, here is a valuable handbook from an expert in love, sex, and communication. Relationship therapist Susan Wenzel—who is in an open marriage herself—delivers skillful advice on how to navigate the complex emotional landscape of multi-partner relationships, from polyamory to swinging. • Filled with of compelling personal stories, anecdotes from clients, and practical exercises • A guide to cultivating harmonious and fulfilling open relationships • Author Susan Wenzel is a sex and relationship therapist with years of experience counseling patients on issues related to monogamy, intimacy, and trust. *A Happy Life in an Open Relationship* will help you develop your trust and communication skills, explore sexuality and desire, build your confidence and self-worth, set healthy boundaries, overcome jealousy, and so much more. People interested in making changes in their relationships will appreciate the positive tone, helpful advice, and expert

wisdom from an accomplished relationship therapist who has gone through the experience herself. • A great gift for anyone interested in testing the boundaries of monogamy and exploring the world of polyamory • An accessible and inviting guide for couples to build an open relationship that is strong and lasting • Perfect for fans of *Mating in Captivity: Unlocking Erotic Intelligence* and *The State of Affairs: Rethinking Infidelity* by Esther Perel, *The Commitment: Love, Sex, Marriage, and My Family* by Dan Savage, and *Sex at Dawn: How We Mate, Why We Stray, and What It Means for Modern Relationships* by Christopher Ryan

This is the official publication for members and member firms of the Incorporated Society of Valuers and Auctioneers (ISVA). The Directory contains the names and addresses of every member, and a complete list of practising firms and commercial concerns with member partners. Each firm entry lists the partners, telecommunications information, their specialisations and a general description of work carried out and history

of the firm. There are 3500 firms listed worldwide.

The History of Our Tribe Penguin

The 2007 issue of the Report on the World Social Situation focuses on the key role of productive employment and decent work in reducing poverty and promoting social development. It surveys the global trends in employment and work, as well as the socio-economic context within which the world of work has evolved in the last two decades. It recommends that policies and strategies to promote full employment and decent work take into account demographic and social changes. The report emphasizes that political reforms and legal provisions are necessary to prevent discrimination in the workplace and in society in order to promote productive employment. The report also points to the need to ensure universality of some form of social protection coverage in view of the fact that more and more workers are in employment situations that are casual, informal and out of standard collective contracts, by choice or by necessity.--Publisher's description.

Lost Sex Springer Science & Business Media

This revised edition of Carolyn Merchant's classic *Reinventing Eden* has been updated with a new foreword and afterword. Visionary quests to return to the Garden of Eden have shaped Western Culture. This book traces the idea of rebuilding the primeval garden from its origins to its latest incarnations and offers a bold new way to think about the earth.

P&S 2 Frb04 Mark and Gert (Manuf)
Springer Science & Business Media

The topics covered by this volume include: protein destabilization at low temperatures; engineering the stability and function of Gene V Protein; free energy balance in protein folding; modelling protein stability as a heteropolymer collapse; stability of alpha helices; protein stability with T4 Lysozyme.

The Golden Wheel Dream-book and Fortune-teller Pearson Educación

Selection of the works of Hrotsvit, the first-known woman dramatist, containing legends, dramas, and epics. Hrotsvit of Gandersheim (c.935 - c.975), almost certainly of noble Saxon parentage, was a canoness of the Saxon imperial abbey of Gandersheim, living and working there during its time of greatest material

prosperity and cultural and intellectual pre-eminence. Her importance cannot be overestimated: she is the first poet of Saxony; the first known dramatist of Christianity (indeed the first known woman dramatist of any time); and a woman displaying erudition and wit in an essentially patriarchal age, a female author in a literary field dominated by men who insisted on re-evaluating and redrawing the literary depiction of women. Discovered in the late fifteenth century, her extraordinary oeuvre, written in medieval Latin, comprises a wide variety of genres: eight legends, six dramas, and two epics, organised into three books. The present volume contains a selection of Hrotsvit's works in English translation, together with an interpretative essay, critical introduction, and scholarly apparatus. Professor KATHARINA WILSON teaches at the University of Georgia.

DigiCat Publishing presents to you this special edition of "The Golden Wheel Dream-book and Fortune-teller" by Felix

Fontaine. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature. *History of Woman Suffrage: 1900-1920* DigiCat

This open access book explores ways to leverage information technology and machine learning to combat disease and promote health, especially in resource-constrained settings. It focuses on digital disease surveillance through the application of machine learning to non-traditional data sources. Developing countries are uniquely prone to large-scale emerging infectious disease outbreaks due to disruption of ecosystems, civil unrest, and poor healthcare infrastructure – and without comprehensive surveillance, delays in outbreak identification, resource deployment, and case management can be catastrophic. In combination with context-informed analytics, students will learn how non-traditional digital disease

data sources – including news media, social media, Google Trends, and Google Street View – can fill critical knowledge gaps and help inform on-the-ground decision-making when formal surveillance systems are insufficient.

Encyclopedia of the North American Colonies John Wiley & Sons

Appropriate for one- or two-semester Advanced Engineering Mathematics courses in departments of Mathematics and Engineering. This clear, pedagogically rich book develops a strong understanding of the mathematical principles and practices that today's engineers and scientists need to know. Equally effective as either a textbook or reference manual, it approaches mathematical concepts from a practical-use perspective making physical applications more vivid and substantial. Its comprehensive instructional framework supports a conversational, down-to-earth narrative style offering easy accessibility and frequent opportunities for application and reinforcement.

Modern Pavement Management SAGE Publications

This second, much enlarged edition by

Lehmann and Casella of Lehmann's classic text on point estimation maintains the outlook and general style of the first edition. All of the topics are updated, while an entirely new chapter on Bayesian and hierarchical Bayesian approaches is provided, and there is much new material on simultaneous estimation. Each chapter concludes with a Notes section which contains suggestions for further study. This is a companion volume to the second edition of Lehmann's "Testing Statistical Hypotheses".

Hrotsvit of Gandersheim University of Chicago Press

"Proofs and Fundamentals: A First Course in Abstract Mathematics" 2nd edition is designed as a "transition" course to introduce undergraduates to the writing of rigorous mathematical proofs, and to such fundamental mathematical ideas as sets, functions, relations, and cardinality. The text serves as a bridge between computational courses such as calculus, and more theoretical, proofs-oriented courses such as linear algebra, abstract algebra and real analysis. This 3-part work carefully balances Proofs, Fundamentals, and Extras. Part 1 presents logic and basic

proof techniques; Part 2 thoroughly covers fundamental material such as sets, functions and relations; and Part 3 introduces a variety of extra topics such as groups, combinatorics and sequences. A gentle, friendly style is used, in which motivation and informal discussion play a key role, and yet high standards in rigor and in writing are never compromised. New to the second edition: 1) A new section about the foundations of set theory has been added at the end of the chapter about sets. This section includes a very informal discussion of the Zermelo-Fraenkel Axioms for set theory. We do not make use of these axioms subsequently in the text, but it is valuable for any mathematician to be aware that an axiomatic basis for set theory exists. Also included in this new section is a slightly expanded discussion of the Axiom of Choice, and new discussion of Zorn's Lemma, which is used later in the text. 2) The chapter about the cardinality of sets has been rearranged and expanded. There is a new section at the start of the chapter that summarizes various properties of the set of natural numbers; these properties play important roles subsequently in the

chapter. The sections on induction and recursion have been slightly expanded, and have been relocated to an earlier place in the chapter (following the new section), both because they are more concrete than the material found in the other sections of the chapter, and because ideas from the sections on induction and recursion are used in the other sections. Next comes the section on the cardinality of sets (which was originally the first section of the chapter); this section gained proofs of the Schroeder-Bernstein theorem and the Trichotomy Law for Sets, and lost most of the material about finite and countable sets, which has now been moved to a new section devoted to those two types of sets. The chapter concludes with the section on the cardinality of the number systems. 3) The chapter on the construction of the natural numbers, integers and rational numbers from the Peano Postulates was removed entirely. That material was originally included to provide the needed background about the number systems, particularly for the discussion of the cardinality of sets, but it was always somewhat out of place given the level and scope of this text. The

background material about the natural numbers needed for the cardinality of sets has now been summarized in a new section at the start of that chapter, making the chapter both self-contained and more accessible than it previously was. 4) The section on families of sets has been thoroughly revised, with the focus being on families of sets in general, not necessarily thought of as indexed. 5) A

new section about the convergence of sequences has been added to the chapter on selected topics. This new section, which treats a topic from real analysis, adds some diversity to the chapter, which had hitherto contained selected topics of only an algebraic or combinatorial nature. 6) A new section called ``You Are the Professor'' has been added to the end of the last chapter. This new section, which includes a number of attempted proofs

taken from actual homework exercises submitted by students, offers the reader the opportunity to solidify her facility for writing proofs by critiquing these submissions as if she were the instructor for the course. 7) All known errors have been corrected. 8) Many minor adjustments of wording have been made throughout the text, with the hope of improving the exposition.
