Rethinking English in Schools e-artnow sro
Why should young people study a subject
called English? This question lies at the
heart of this fascinating monograph, which
brings together the diverse perspectives of

many leading thinkers about English and
literacy education. This meticulously
researched and well-written collection
takes as its starting point the importance
of the history of the subject in the
formation of its constitution and its
boundaries. First and foremost, it proposes
that questions of aims and values have
informed these choices. Equally, it
suggests that returning to these
educational questions helps us to
understand curriculum and pedagogy in

complex ways that a simple focus on content and methods neglects. Curriculum and pedagogy bring learners, teachers, institutions and the wider society into the debate.

English as a Vocation is a history of the most influential movement in modern British literary criticism. F. R. Leavis and his collaborators on the Cambridge journal *Scrutiny* in the 1930s to the 1950s demonstrated compelling ways of reading modernist poetry, Shakespeare, and the 'texts' of advertising. Crucially, they offered a way of teaching critical reading, an approach that could be adapted for schools and adult education classes, modelled in radio talks and paperback guides to English Literature, and taken up in universities as far afield as Colombo and Sydney. This book shows how a small critical school turned into a movement with an international reach. It tracks down Leavis's students, analysing the pattern of their social origins and subsequent careers in the context of twentieth-century social change. It shows how teachers transformed *Scrutiny* approaches as they

tried to put them into practice in grammar and secondary modern schools. And it explores the complex, even contradictory politics of the movement. Champions of creative writing and enemies of 'progressive' education alike based their arguments on *Scrutiny*'s interpretation of modern culture. 'Left-Leavisites' such as Raymond Williams, Richard Hoggart, and Stuart Hall wrought influential interpretations of social class and popular culture out of arguments with the *Scrutiny* tradition. This is the first book to examine major figures such as these alongside the hundreds of other teachers and writers in the movement whose names are obscure but who wrestled with the same challenges: how do you approach a baffling poem? How do you uncover what an advertisement is trying to do? How can literature inform our everyday experiences and judgements? What does 'culture' mean in modern times?

The extraordinary story of Richard

Whittington, from his arrival in London as a young boy to his death in 1423, against a backdrop of plague, politics and war; turbulence between Crown, City and Commons; and the unrelenting financial demands of Richard II, Henry IV and Henry V, to whom Whittington was mercer, lender and fixer. A man determined to follow his own path, Whittington was a significant figure in London's ceaseless development. As a banker, Collector of the Wool Custom, King's Council member and four-time mayor, Whittington featured prominently in the rise of the capital's merchant class and powerful livery companies. Civic reformer, enemy of corruption and author of an extraordinary social legacy, he contributed to Henry V's victory at Agincourt and oversaw building works at Westminster Abbey. In London, Whittington found his 'second' family: a mentor, Sir Ivo Fitzwarin, and an inspirational wife in Fitzwarin's daughter Alice. Today's Dick Whittington pantomimes, enjoyed by millions, have a grain of truth in them, but the real story is far more compelling--minus that sadly mythical cat.

 Racism and English Football: For Club and Country analyses the contemporary manifestations, outcomes and implications of the fractious relationship between English professional football and race. Racism, we were told, had disappeared from English football. It was relegated to a distant past, and displaced onto other European countries. When its appearance could not be denied, it was said to have reappeared. This book reveals that this was not true. Racism did not go away and did not return. It was here all along. The book argues that racism is firmly embedded and historically rooted in the game's structures, cultures and institutions, and operates as a form of systemic discrimination. It addresses the ways that racism has tainted English football, and the manner in which football has, in turn, influenced racial meanings and formations in wider society. Equally, it explores how football has facilitated forms of occupational multiculturalism, black player activism and progressive fan politics that resist divisive social phenomena and offer a degree of hope for an alternative future. Focusing on a diverse range of topics, in

men's and women's football, at club and international level, Racism and English Football extends and expands our knowledge of how racism occurs and, critically, how it can be challenged. This is an essential read for scholars and students working on race, ethnicity, sport and popular culture, together with those interested in the social and organisational dynamics of English professional football more generally.

Language, Society and Power Routledge
 Our intuition on how the world works could well be wrong. We are surprised when new competitors burst on the scene, or businesses protected by large and deep moats find their defenses easily breached, or vast new markets are conjured from nothing. Trend lines resemble saw-tooth mountain ridges. The world not only feels different. The data tell us it is different. Based on years of research by the directors of the McKinsey Global Institute, *No Ordinary Disruption: The Four Forces Breaking all the Trends* is a timely and important analysis of how we need to reset our intuition as a result of four forces colliding and transforming the global economy: the rise of emerging markets,

the accelerating impact of technology on the natural forces of market competition, an aging world population, and accelerating flows of trade, capital and people. Our intuitions formed during a uniquely benign period for the world economy—often termed the Great Moderation. Asset prices were rising, cost of capital was falling, labour and resources were abundant, and generation after generation was growing up more prosperous than their parents. But the Great Moderation has gone. The cost of capital may rise. The price of everything from grain to steel may become more volatile. The world's labor force could shrink. Individuals, particularly those with low job skills, are at risk of growing up poorer than their parents. What sets *No Ordinary Disruption* apart is depth of analysis combined with lively writing informed by surprising, memorable insights that enable us to quickly grasp the disruptive forces at work. For evidence of the shift to emerging markets, consider the startling fact that, by 2025, a single regional city in China—Tianjin—will have a GDP equal to that of the Sweden, of that, in the decades ahead, half of the world's

economic growth will come from 440 cities including Kumasi in Ghana or Santa Carina in Brazil that most executives today would be hard-pressed to locate on a map. What we are now seeing is no ordinary disruption but the new facts of business life— facts that require executives and leaders at all levels to reset their operating assumptions and management intuition.

An inspiring story of one man's rise from poverty and oppression to success and fame in the international world of opera ... It is a difficult undertaking for any human to escape the cycle of poverty, but to do so from one of the world's most complex political systems, with a brutal history of segregation and deprivation, is nothing

short of a miracle. Yet Musa Ngqungwana's story doesn't end there. Not only did he manage to extricate himself from his impoverished past, but he found his way to the great opera houses of the world, attaining immense success in an affluent art form that bears no resemblance to his upbringing or culture. Musa's life and career are proof that any human can overcome the devastating effects of discrimination and poverty. *Odyssey of an African Opera Singer* chronicles Musa's journey from the townships of South Africa to the world stage. It is a story of hope, showing how humans, no matter their situation, have the opportunity to claim their gifts, develop them and use them to help others in need. A captivating story that will inspire anyone who has ever had a dream ...

Racism is an endemic feature of the Tory Party. Tracing the history of that racism, *Racism and the Tory Party* investigates the changing forms of racism in the party from the days of Empire, including the championing of imperialism at the turn of the 20th century and the ramping up of antisemitism, the imperial and 'racial' politics of Winston Churchill, the rise of Enoch Powell and Powellism, to the Margaret Thatcher years, the birth of 'racecraft' and her policies in Northern Ireland, and the hostile environment and its consolidation and expansion under Theresa May and Boris Johnson's premierships. Throughout the book, all forms of racism are addressed including the various forms of colour-coded and as well as non-colour-coded racism as they are put in their historical and economic contexts. This book should be of relevance to all interested in British politics and British history, as well as undergraduate and postgraduate students studying the sociology and politics of racism, as well as for students of the history of the development of British racism and of

imperialism and its aftermath.
