PRISMA Biologie 7/8. Schülerbuch. Differenzierende Ausgabe Nordrhein-Westfalen ab 2018 Cambridge University Press
 Challenge and inspire your teenage learners to think beyond language. Think is a fresh, vibrant and upbeat course designed to engage teenage learners and make them think. As well as building students' language skills, it offers a holistic approach to learning: developing their thinking skills, encouraging them to reflect on values and building their self-confidence. Topics are chosen to appeal to and challenge teenagers, firing their imagination and ensuring effective learning. Exam-style exercises and tips help students prepare for Cambridge English Key, Preliminary and First. Informed by the Cambridge English Corpus, the course reflects real language usage and 'Get it right' sections help students avoid common mistakes.
 Earth Moves IGI Global
 'Metaphor in Educational Discourse is a superb piece of applied linguistics research that integrates Vygotsky's theory of concepts with current work on metaphor into a coherent framework for investigating how teachers and learners negotiate figurative language in order to promote development in the classroom setting. In what is likely to become the standard for future studies in this area, Lynne Cameron meticulously demonstrates the central role of linguistic metaphors in classroom learning - designed to lead learners to a deeper understanding of complex mathematical and scientific

concepts.' James P. Lantolf, Professor of Applied Linguistics, The Pennsylvania State University. This book reports research into metaphor in use with school students. The setting for the research is a UK school and the participants are around ten years old, with their first language well established but still developing concepts and understandings. Close examination of a corpus of classroom spoken discourse reveals how metaphor is employed by their teachers, not just in explaining ideas, but, in managing and mediating the activity of the classroom and the learning of the students. Particular issues discussed include: the problems of identifying metaphors in spoken discourse, the conventionalism of metaphors in the discourse of socio-cultural groups, and how a socio-cultural approach can account for systematicity in metaphor use.

How to Solve it Psychology Press

At a moment of great discovery, one Big Idea can change the world... Pythagoras was arguably the first 'genius' of Western culture, establishing a blend of high intellect and high lunacy, both of which have become recurrent features of this scholarly heritage. Most memorably, he created the Pythagorean Theorem, and established the concept of proofs in mathematics. Less well known was the religion he founded which forbade his disciples from eating beans or stepping over fallen poles! Pythagoras & His Theorem tells the remarkable story of the life of this poorly understood genius and the transformation his work brought about in mathematics. Pythagoras' Big Idea is presented in an accessible and enthralling way, providing an explanation of the meaning of his work, its historical and scientific context, and significance for the world in which we live. The Big Idea series is a fascinating look at the greatest advances in our scientific history, and at the men and women who made these fundamental breakthroughs.

Earth Moves, Bernard Cache's first major work, conceptualizes a series of architectural images as vehicles for two important developments. First, he offers a new understanding of the architectural image itself. Following Gilles Deleuze and Henri Bergson, he develops an account of the image that is nonrepresentational and constructive—images as constituents of a primary, image world, of which subjectivity itself is a special kind of image.

Second, Cache redefines architecture beyond building proper to include cinematic, pictorial, and other framings. Complementary to this classification, Cache offers what is to date the only Deleuzian architectural development of the "fold," a form and concept that has become important over the last few years. For Cache, as for Deleuze, what is significant about the fold is that it provides a way to rethink the relationship between interior and exterior, between past and present, and between architecture and the urban.

Metaphor in Specialist Discourse presents multiple perspectives on metaphor use in specialist and popularized discourse contexts. Using genre and register as starting parameters for deeper exploration, and pushing the boundaries further to open up new areas and possibilities, ten independent articles investigate metaphor use across a range of specialist domains of discourse, such as biology research articles, psychological counseling, soccer commentaries, workfloor communication, and penal policy documents. Framed by two theoretical chapters, the book is a contribution to the study of metaphor use in distinct discourse settings that will be of value to linguists and metaphor scholars of different persuasions, graduate students of linguistics and related disciplines, and practitioners of specialized areas with an interest in (verbal or gestural) language use in their areas of expertise. It shows that aspects of discourse variation are the beginning of, not an afterthought to, accurate empirical metaphor studies.

Prisma Biologie OUP Oxford

The articles collected in the present volume were written during a period of more than 30 years, the first having been published in 1929, the last in 1961. They are arranged here in a systematic, not a chronological, order, starting from a few articles mainly concerned with psychological matters and then passing on to phenomenology in the proper sense. Within the latter group, the sequence is from articles dealing with more general questions of principle to those in which rather special questions are discussed. The articles are reprinted or translated unchanged except for "phenomenology of Thematics and of the Pure Ego," in which a certain number of pages have been omitted because the author has long since come to consider them erroneous. Almost all of the articles are in the service of Husserlian phenomenology, which they are intended to advance and to develop further rather than merely expound. When the author made his first acquaintance with Husserl's philosophy about 40 years ago, he was overwhelmed by the spirit of uncompromising integrity and radical philosophical responsibility, by the total devotedness which made the man disappear behind his work. Soon the young beginner came to realize the fruitfulness both of what Husserl had actually accomplished and of what he had initiated, the promise of further fruitful work.

Understanding and Preventing Teacher Burnout Lulu.com

This book brings together leading scholars researching the field of gender, sexuality, schooling, queer activism, and social movements within different cultural contexts. With contributions from more than fifteen countries, the chapters bring fresh insights for students and scholars of gender and sexuality studies, education, and social movements in the Global North and South. The book draws together both theoretical and empirical contributions offering rich and multidisciplinary essays from scholars and activists in the field focusing on outreach work of QSM (Queer Social Movements) in schools, queer activism in educational settings, and the role of QSMs in supporting and informing queer youth.

From the same author as the popular first edition, the second edition of this trusted, accessible textbook is now accessible online, anytime, anywhere on Kerboodle. It breaks down content into manageable chunks to help students with the transition from GCSE to A Level study, and has been fully revised and updated for the new A Level specifications for first teaching September 2015. This online textbook provides plenty of examples and practice questions for consolidation of learning, with 'Biology at Work', 'Key Skills in Biology' and 'Study Skills' sections giving many applications of biology throughout. Suitable for AQA, OCR, WJEC and Edexcel.

Ten stories featuring perhaps the most fantastic sleuth of them all: Moris Klaw, the Dream Detective. Accompanied by his beautiful daughter Isis,

Klaw's mysterious abilities lead him to clues and answers concerning occult occurrences far beyond the ken of ordinary minds. Moris Klaw is a gifted eccentric in the Holmesian mode. The proprietor of a ramshackle antique shop in Wapping, Klaw is a tall, stoop-shouldered man, of indeterminate age and unidentifiable foreign accent, with skin the color of "dirty vellum." He wears gold pince-nez, a flat bowler hat, and an old black cape, and is not only an expert in the legends and lore of valuable historical objects, but also a master of disguise.

The Collected Works of Aron Gurwitsch (1901-1973) Springer Nature

Academic freedom is increasingly being threatened by a stifling culture of conformity in higher education that is restricting individual academics, the freedom of academic thought and the progress of knowledge – the very foundations upon which academia and universities are built. Once, scholars demanded academic freedom to critique existing knowledge and to pursue new truths. Today, while fondness for the rhetoric of academic freedom remains, it is increasingly criticised as an outdated and elitist concept by students and lecturers alike and called into question by a number of political and intellectual trends such as feminism, critical theory and identity politics. This provocative and compelling book traces the demise of academic freedom within the context of changing ideas about the purpose of the university and the nature of knowledge. The book argues that a challenge to this culture of conformity and censorship and a defence of academic free speech are needed for critique to be possible and for the intellectual project of evaluating existing knowledge and proposing new knowledge to be meaningful. This book is that challenge and a passionate call to arms for the power of academic thought today.

Researching and Applying Metaphor Springer

Curriculums for STEM education programs have been successfully implemented into numerous school systems for many years. Recently, the integration of arts education into such programs has proven to be significantly beneficial to students, resulting in a new method of teaching including science, technology, engineering, art, and mathematics. Cases on STEAM Education in Practice is an essential research publication for the latest scholarly information on curriculum development, instructional design, and educational benefits of STEAM learning initiatives. Featuring coverage on a range of topics including fine arts, differentiated instruction, and student engagement, this book is ideally designed for academicians, researchers, and professionals seeking current research on the implementation of STEAM education.

The Dream Detective A&C Black

Sprachliche Bildung zählt! Dieses Buch sensibilisiert für die Relevanz von Sprache in den naturwissenschaftlichen Unterrichtsfächern. Es zeigt Verfahren der Unterrichtsgestaltung auf, die helfen, sprachliche Probleme bei der Aneignung von Fachinhalten zu meistern. Studierende sollen dabei in die Lage versetzt werden, den Schwierigkeitsgrad z.B. von Lehrbuchtexten einzuschätzen sowie die sprachlichen Anforderungen von fachlichen Lernzielen und Unterrichtsverfahren zu benennen. Die Einführung wendet sich an Lehrende und Studierende der naturwissenschaftlichen Fächer und soll in Seminaren der Fachdidaktiken sowie im Modul Deutsch als Zweitsprache eingesetzt werden. Durch authentische Beispiele werden die Inhalte des Handbuchs illustriert. Mit Hilfe von Reflexions- und Anwendungsaufgaben zur sprachlichen Bildung werden die Studierenden zu einer aktiven Auseinandersetzung mit den Inhalten angeregt und werden dazu befähigt ihr theoretisches Wissen in der Praxis anzuwenden.

The 2013 International Conference on Engineering Design (ICED13) will be the nineteenth held since the conference series was inaugurated in 1981. The Design Society is an international society founded in 2001 to develop an understanding of all aspects of Design. This proceedings is a compilation of the 342 peer-reviewed and accepted papers submitted to ICED13. All the accepted papers are divided among the following 9 themes into separate volumes: Design Processes; Design Theory and Research Methodology; Design Organisation and Management; Products, Services and Systems Design; Design for X, Design to X; Design Information and Knowledge; Human Behaviour in Design; Design Education; and Design Methods and Tools.
