'Warmly entertaining...an endearing account of the search for rare bees' Guardian A hunt for the world's most elusive bees leads Dave Goulson from Poland to Patagonia as well as closer to home, amongst the secret places hidden right under our noses: the abandoned industrial estates where great crested newts roam; or the rewilded estate at Knepp Castle, where, with the aid of some hairy, bluebell-eating Tamworth pigs, nightingale song has been heard for the first time in generations. Whether he is tracking great yellow bumblebees in the Hebrides or chasing orchid bees through the Ecuadorian jungle, Dave Goulson's wit, humour and deep love of nature make him the ideal travelling companion.

The Science Quest introduces the Inquiry/Discovery instructional framework, an innovative method for captivating students? interest in science, for building their skills in scientific thinking, and for dramatically enriching their understanding of scientific content and concepts. For teachers curious how to implement ?inquiry? learning as called for in the National Science Education Standards, this book provides detailed and practical guidance. It shows teachers how to transform ordinary lessons in ways that 1) encourage students to take initiative in posing scientific ?inquiry? questions; and 2) enable students to independently ?discover? answers to their questions by engaging in investigative practices and critically evaluating the findings. Inquiry/Discovery practices can be introduced in stages, starting with simple activities and gradually increasing the levels of challenge. The Science Quest includes everything a teacher needs to bring successful instruction, including: Extensive lesson planning and assessment tools Suggestions on working with students in teams Scores of sample lessons from varied disciplines
