**Modern Slavery and Human Trafficking** African Sun Media  
Cover -- Title -- Copyright -- Contents -- Preface -- Introduction and  
rationale -- 1 The view of South African youth before  
#FeesMustFall -- 2 Were the 2015 student protests a revolution? -  
- 3 What the 2015 protests actually were and how they were  
possible -- 4 Ikohlisan'ihlomile: FMF students' engagement with  
power and their ideological differences -- 5 Can South Africa's  
declining economy inspire student-led new revolution? -- 6  
Youth's declining news consumption levels and ideologically  
divided media -- 7 Youth's polysemic interpretation of the ANC  
regime and the limits of the new revolution -- 8 Youths' declining  
participation levels in the public sphere: the constraints of new  
revolution -- 9 Conclusion: FMF protests will not lead to a  
revolution per se (at least not yet), but to wide ranging reforms --  
References -- Index

### Locally Relevant ICT Research African Minds

This book is the first of its kind within the African region to  
combine scholarly perspectives from the fields of Strategic  
Communication Management and Communication for  
Development and Social Change. It draws insights from scholars  
across the African continent by unravelling the complementary  
nature of scholarship between the two fields, through the lens of  
prevailing governance and sustainability challenges facing African  
countries, today. This edited volume covers issues that have  
adversely affected the achievement of goals related to  
humanitarian upliftment, development and social change for all  
African nations. Consequently, citizen participation, which lies at  
the heart of these challenges when considering the question of  
sustainable governance and policy development for social change  
in an African context is addressed. To this end, a reflection is also  
made on various case studies that exist where local citizens do  
not inform sustainable development programmes, while the  
promotion of bottom-up development and social change is largely  
replaced by top-down instrumental action approaches and

hemispheric communication instead of strategic communication.  
Themes explored include: ● Communication for social change,  
bottom-up development and social movements in the local  
government sphere ● Strategic communication in governance,  
planning and policy reforms ● The role of multi-stakeholder  
partnerships in achieving development of objectives geared  
towards good governance in Africa ● Public participation,  
protests, and resistance from 'below' ● Public sector health  
communications and development ● Media relations,  
accountability and contested development narratives with the  
Fourth Estate ● Social media and eParticipation in government  
development programs.

### *ECCWS 2018 17th European Conference on Cyber Warfare and Security V2* IGI Global

In spite of the rich repertoire of artistic traditions in Southern  
Africa, particularly in the areas of drama, theatre and  
performance, there seems to be a lack of a corresponding robust  
academic engagement with these subjects. While it can be said  
that some of the racial groups in the region have received  
substantial attention in terms of scholarly discussions of their  
drama and theatre performances, the same cannot be said of the  
black African racial group. As such, this collection of thirteen  
chapters represents a compendium of critical and intellectual  
discourses on black African drama, theatre and performance in  
Botswana, Lesotho, South Africa, and Swaziland. The topics  
covered in the book include, amongst others, ritual practices,  
interventionist approaches to drama, textual analyses, and the  
funeral rites (viewed as performance) of the South African  
liberation icon Nelson Mandela. The discussions are rooted mainly  
using African paradigms that are relevant to the context of  
African cultural production. The contributions here add to the  
aggregate knowledge economy of Southern Africa, promote  
research and publication, and provide reading materials for  
university students specialising in the performing arts. As such,  
the book will appeal to academics, theatre scholars, cultural  
workers and arts administrators, arts practitioners and  
entrepreneurs, the tourism industry, arts educators, and  
development communication experts.

*Polymer Nanocomposites for Advanced Engineering and Military  
Applications* Academic Conferences and publishing limited  
Inclusive education presupposes an all-inclusive approach where  
all learners are taught in regular classrooms, regardless of  
background, disability or social context. While there has been  
much debate, indications are that inclusive education has been  
gaining momentum. The book is divided into six coherent sections  
that address the how of inclusive education both inside and  
outside of the classroom.

### Social Media Listening and Monitoring for Business Applications John Wiley & Sons

This volume provides a comprehensive overview of goat keeping  
and farming. It includes twenty-two chapters that address such  
topics as breeding and selection, goat reproduction, production  
systems, the effects of goat farming on the environment, the use  
of goat byproducts, the economics of goat farming, and much  
more.

### *Measuring and Implementing Altmetrics in Library and Information Science Research* Academic Conferences and publishing limited

Governments around the world are committed to enhancing  
students' "graduateness". Work-integrated learning (WIL) is one  
of the many programmes which Higher Education Institutions  
(HEIs) can develop to promote this facet of student life. The  
incorporation of work-integrated learning in curriculum design  
and development can produce reciprocal benefits for students,  
workplaces, professions and communities. Any curriculum design  
and development endeavour relating to WIL requires appropriate  
resources to support curriculum development. This book serves to  
explore WIL programmes and experiences for the student, WIL  
coordinator and supervisor. It further integrates practical,  
relevant and reflective industry experience within the higher  
education curriculum to enhance student development. WIL has  
no uniformly or specific framework or approaches since it is an  
emerging field and is generally influenced by contextual factors.  
In view of the diversity in theory and practice and different  
purposes, whether pragmatic or practical, driving the adoption of  
one approach over another, this book highlight sthe diverse

approaches that encapsulate WIL in South Africa.

Research Universities in Africa Taylor & Francis

Industry 5.0 is advancing the collaboration between humans and machines and is finding value through connected virtual and human experiences. This technological revolution benefits numerous fields; however, the library and information science industry in particular can evolve and expand by embracing Industry 5.0. The Handbook of Research on Technological Advances of Library and Information Science in Industry 5.0 considers the current research and future trends of technological advances in library and information science related to Industry 5.0. Covering key topics such as robotics, smart libraries, augmented reality, digital libraries, and artificial intelligence, this major reference work is ideal for librarians, industry professionals, researchers, scholars, practitioners, academicians, instructors, and students.

Jay Pather, Performance, and Spatial Politics in South Africa IGI Global

The effects of inadequate diets on the population include malnutrition, non-communicable diseases and obesity. 'Hidden hunger', also known as micronutrient deficiencies, leads to various health-related disorders and diseases. Indigenous plants, in the form of indigenous fruits and leafy vegetables are gaining interest as a source of nutrients and bioactive phytochemicals, satisfying both food demand and health needs. Moreover, with the impact of climate change, and the importance of sustainability of food systems, it is essential that we investigate new, forgotten and alternative crops that can thrive in harsh conditions, require low fertilizer input, and are easily harvestable. This is an essential resource for academic researchers and industry professionals in the fields of horticulture, agriculture, crop science, human health and nutrition.

**Explorations in Southern African Drama, Theatre and Performance** Routledge

This edited book is focused on Sustainable Development Goal 2. It offers a comprehensive and topical collection of practices, technologies and innovations in the field of sustainable food production and security under a changing climate. It is a one-stop handbook for farmers, researchers, extensionists, policy makers and other stakeholders seeking to identify and disseminate best fit technologies for local and regional landscapes. It offers an

understanding of the challenges, risks and uncertainties as well as opportunities to foster productive and sustainable food production. Smallholder farming and agriculture in general is facing a serious threat from climate change that has resulted in erratic and unpredictable rainfall and increased temperatures, among other abiotic stresses. These climate change induced pressures have reduced productivity mainly among the smallholder farmers, who are critical in driving the attainment of sustainable development goals like SDG 2, 12 and 13. The objective of the book is to document effective and practicable practices and technologies that can be adopted by smallholder African farmers as mitigation measures against the effects of climate change. This book is of interest to researchers, agricultural scientists, climate change scientists, capacity builders and policymakers.

**ICEL 2017 - Proceedings of the 12th International Conference on e-Learning** Springer Nature

Global interest in indigenous studies has been rapidly growing as researchers realize the importance of understanding the impact indigenous communities can have on the economy, development, education, and more. As the use, acceptance, and popularity of indigenous knowledge increases, it is crucial to explore how this community-based knowledge provides deeper insights, understanding, and influence on such things as decision making and problem solving. *Indigenous Studies: Breakthroughs in Research and Practice* examines the politics, culture, language, history, socio-economic development, methodologies, and contemporary experiences of indigenous peoples from around the world, as well as how contemporary issues impact these indigenous communities on a local, national, and global scale. Highlighting a range of topics such as local narratives, intergenerational cultural transfer, and ethnicity and identity, this publication is an ideal reference source for sociologists, policymakers, anthropologists, instructors, researchers, academicians, and graduate-level students in a variety of fields.

**Social Movements and Digital Activism in Africa** BoD - Books on Demand

This book is the culmination of several years of collaborative work. It is a unique contribution to the field of journalism because of the depth and variety of contributions it makes to the field. The scholars who contribute to this volume respond to the great need

to rethink journalism from various perspectives including journalism training, research, the contents of the news media, language, media ethics, the safety of journalists and gender inequities in the news media. In doing this, they recognise how the societies that journalism address should themselves change. *Research Anthology on Vocational Education and Preparing Future Workers* Springer Nature

Jay Pather, *Performance and Spatial Politics in South Africa* offers the first full-length monograph on the award-winning choreographer, theater director, curator, and creative artist in contemporary global performance. Working within the contexts of African studies, dance, theater, and performance, Ketu H. Katrak explores the extent of Pather's productive career but also places him and his work in the South African and global arts scene, where he is considered a visionary. Pather, a South African of Indian heritage, is known as a master of space, site, and location. Katrak examines how Pather's performance practices place him in the center of global trends that are interdisciplinary, multidisciplinary, collaborative, and multimedia and that cross borders between dance, theater, visual art, and technology. *Jay Pather, Performance and Spatial Politics in South Africa* offers a vision of an artist who is strategically aware of the spatiality of human life, who understands the human body as the nation's collective history, and who is a symbol of hope and resilience after the trauma of violent segregation.

Many students across the globe seek further education for future employment opportunities. Vocational schools offer direct training to develop the skills needed for employment. New emphasis has been placed on reskilling the workforce as technology has infiltrated all aspects of business. Teachers must be prepared to teach these new skill requirements to allow students to directly enter the workforce with the necessary competences intact. As

the labor market and industry are changing, it is essential to stay current with the best teaching practices within vocational education courses to provide the future workforce with the proper tools and knowledge. The Research Anthology on Vocational Education and Preparing Future Workers discusses the development, opportunities, and challenges of vocational education courses and how to best prepare students for future employment. It presents the best practices in curriculum development for vocational education courses and analyzes student outcomes. Covering topics such as industry-academia collaboration, student satisfaction, and competency-based education, this major reference work is an essential resource for academic administration, pre-service teachers, educators of vocational education, libraries, employers, government officials, researchers, and academicians.

Handbook of Phytonutrients in Indigenous Fruits and Vegetables  
IGI Global

Engineering Design and Mathematical Modelling: Concepts and Applications consists of chapters that span the Engineering design and mathematical modelling domains. Engineering design and mathematical modelling are key tools/techniques in the Science, Technology and Innovation spheres. Whilst engineering design is concerned with the creation of functional innovative products and processes, mathematical modelling seeks to utilize mathematical principles and concepts to describe and control real world phenomena. Both of these can be useful tools for spurring and hastening progress in developing countries. They are also areas where Africa needs to 'skill-up' in order to build a technological base. The chapters in this book cover the relevant research trends in the fields of both engineering design and mathematical modelling. This book was originally published as a special issue of the African Journal of Science, Technology, Innovation and Development.

**Fees Must Fall** Springer

This book explores the student discontent a year after the start of the 2015 South African #FeesMustFall revolt #FeesMustFall, the student revolt that began in October 2015, was an uprising against lack of access to, and financial exclusion from, higher education in South Africa. More broadly, it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation

movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet, its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical, top-down leadership system of university management and its 'double speak' of professing to act in workers' and students' interests yet entrenching a regressive system for control and governance. University managements, while on one level amenable to change, have also co-opted students into their ranks to create co-responsibility for the highly bureaucratized university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the #FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance, and offer provocative analyses of the power of the revolt.

**ECRM2016-Proceedings of the 15th European Conference on Research Methodology for Business Management** " IGI Global

These proceedings represent the work of researchers participating in the 10th International Conference on e-Learning (ICEL 2015) which is being hosted this year by the College of the Bahamas, Nassau on the 25-26 June 2015. ICEL is a recognised event on the International research conferences calendar and provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in the area of e-Learning. It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of e-Learning available to them. With an initial submission of 91 abstracts, after the double blind, peer review process there are 41 academic Research papers and 2 PhD papers Research papers published in these Conference Proceedings. These papers come from some many different countries including: Australia, Belgium, Brazil, Canada, China, Germany, Greece, Hong Kong, Malaysia, Portugal, Republic of Macedonia, Romania, Slovakia, South Africa, Sweden, United Arab

Emirates, UK and the USA. A selection of the best papers - those agreed by a panel of reviewers and the editor will be published in a conference edition of EJEL (the Electronic Journal of e-Learning www.ejel.com). These will be chosen for their quality of writing and relevance to the Journal's objective of publishing papers that offer new insights or practical help into the application e-Learning. *Indigenous Studies: Breakthroughs in Research and Practice* Springer Nature

The complexity of 21st century lifestyle makes collaborative research and learning essential for all of the population, both in well-resourced and socio-economically challenged regions. Cross-Disciplinary Approaches to Action Research and Action Learning is an advanced reference source including the latest scholarly research on the examination of the development of a community practice of research in order to improve problem solving in various fields. Featuring extensive coverage on a broad range of topics such as social justice, organizational development, and global economy, this publication is ideally designed for academics, researchers, scholars, and managers seeking current research on the promotion of collaborative research and learning. *ECEL 2020 19th European Conference on e-Learning* IGI Global

The volume explores and thinks through the process of decolonising the South African higher education system by examining #MustFall. The text offers theoretical insights from a historical, contemporary and multidisciplinary lens, while examining the embedded meanings of the university as an institution, idea and set of practices to show the shifts and changes that were inaugurated by #MustFall along with the historicities that define the university both locally and globally. The retro- and prospective insights presented in the book surface the crisis of authority that places the university in a state of precarity, which is framed in the book as the 'border'. The volume proposes the concept of the 'border' (recognising its conceptual and analytical dynamism) as a generative space that can facilitate new imaginaries and articulations of this social institution: the university.

Handbook of Research on Administration, Policy, and Leadership in Higher Education Rowman & Littlefield

For many young South African adults (often called 'born frees'), who were born just before or just after the demise of political apartheid, the ongoing realities of poverty and inequality bring to

light the question of whether they truly are 'free' in contemporary South Africa? Their lived experiences of poverty and inequality seem to be in conflict with theologically laden concepts that remain prominent in social and political life, such as

reconciliation, forgiveness, justice and restitution. This leads to a bi-directional process of contesting, and being contested, by such notions and discourses. Furthermore, in light of the double legacy

of both the church and youth as resisting injustice, this publication seeks to explore the many perspectives from which the Christian faith, race and inequality amongst youth can be brought to light.
