## MORENO SANFORD

*Narrative Skills of Dual Language Learners* Nelson Thornes

Communication in Autism adopts a multidisciplinary approach to explore one of the most common developmental disorders associated with communication impairment. Perhaps the most fascinating thing about communication in autism is that variation is as extreme as it could possibly be. While some individuals with autism have age-appropriate language, a number have exceptional language skills; others have little or no spoken language. In between these extremes are individuals who experience significant linguistic impairments. These impairments can affect peer relations and literacy skills. The chapters in this volume provide comprehensive coverage of both the theoretical underpinnings and the practical aspects of autistic communication. The result is a volume that showcases the wide range of methodologies being used in this field of research. It is invaluable for scientists, service providers, parents, individuals with autism, and students learning about communication and autism (e.g., in psychology, speech pathology, and education).

**The SAGE Encyclopedia of Theory in Psychology** Routledge

The current work follows the premise that fictional oral narratives represent socio-emotionally and academically relevant communicative practices. Two studies are presented, aiming to (1) analyze the narrative skills of preschool-age Turkish-German dual language learners (DLLs) and (2) explore a peer-assisted approach to supporting DLLs' narrative skills in early childhood education and care. The findings relate to the influence of dual language learning on narrative production and provide emerging evidence for the effectiveness of a peer-assisted narrative intervention approach.

*Sat Attack* Routledge

Grab a pen and get ready for the ideas to flow with picture writing prompts, a powerful tool for writers! The human brain is wired for visual information and processes images 60,000 times faster than text. That's why pictures spark so many ideas. You'll naturally begin to ask questions, make connections, and find meaning. In this workbook, you'll discover hundreds of inspiring visuals curated by writers and designers for their storytelling potential. They depict a wide variety of scenarios and experiences and can work across genres. Each image has been hand-selected for its aesthetic and narrative value. Whether you write novels, short stories, poems, plays, scripts, do role plays, or improv, this book can help you ideate, stretch your creative muscles, get limber, and flow. There are also tips on how to build characters, scenes, plots, and dialogue, and exercises that help extend and make the most of your prompts. There are virtually innumerable ways to use them, and no rules or limits, only where your imagination takes you. With 400 Picture Writing Prompts, you'll have a source of inspiration you can return to again and again. Features: \* 400 visual writing prompts \* Two prompts per page \* High-quality images curated by writers and designers \* Tips to help build characters, scenes, plots, and dialogue \* Exercises for different ways to use the prompts to add variation \* Extra lined pages For other writing prompt books by Scribe & Dot, please check out: Picture Writing Prompts for Kids

*The Bear Who Came to Babysit* John Benjamins Publishing Company

This book presents the proceedings of the NeuroIS Retreat 2022, June 14-16, Vienna, Austria, reporting on topics at the intersection of information systems (IS) research, neurophysiology and the brain sciences. Readers will discover the latest findings from top scholars in the field of NeuroIS, which offer detailed insights on the neurobiology underlying IS behavior, essential methods and tools and their applications for IS, as well as the application of neuroscience and neurophysiological theories to advance IS theory.

*Essentials of Autism Spectrum Disorders Evaluation and Assessment* Psychology Press

Inspired by the pioneering work of Dan Slobin, this volume discusses language learning from a

crosslinguistic perspective, integrates language specific factors in narrative skill, covers the major theoretical issues, and explores the relationship between language and cognition.

*Teaching New Literacies in Grades 4-6* John Benjamins Publishing

This photocopiable book provides a resource for the Literacy Hour, the National Curriculum for English and the Scottish Guidelines for English Language 5-14. Covering the key requirements for text-level work (comprehension and composition), it provides sections of structured lesson-plans on the main genres (narrative, non-fiction, poetry and plays), 90 linked copymasters which include extracts from books and poems, continuing and end-of-section assessments, and National Literacy Strategy and Scotland 5-14 planners.

**Empathy and Its Development** Springer Science & Business Media

Sensory Stories are short stories of a few lines which are brought to life through a selection of meaningful sensory experiences. They are particularly beneficial for people with Sensory Processing Disorder (SPD), Profound and Multiple Learning Difficulties (PMLD) and Autistic children or adults. Sensory stories are perfect for introducing new sensory environments in a safe, interactive way to help reduce associated anxieties and open up new avenues for communication and play. This updated edition is packed with original ready-to-use sensory stories, including 5 additional guest sensory stories by authors from around the world and your very own story template to create a sensory experience personalised for each person. With exclusive 'how to' video content and digital lesson plans, this book is the essential tool for introducing the transformative multi-sensory storytelling method into your home, classroom or group setting. Using everyday items and step-by-step instructions to make incorporating sensory stories accessible and simple, it has never been easier to create inclusive and fun sensory experiences to enhance the lives of those with additional needs.

*Communication Disorders in Spanish Speakers* Multilingual Matters

This book features case studies of ten individuals with acquired neurological disorders. These disorders have implications for speech, language, and communication, but to date they have not been the focus of research in speech-language pathology. Chapters present a brief medical overview of each condition, followed by detailed linguistic analysis. A carefully assembled narrative captures the impact of each neurological disorder on an individual's daily life and social activities. This structured approach, supported by further reading and exercises, gives readers a nuanced understanding of each disorder's clinical presentation and language and communication features, and the complex interrelationship between language, communication, and cognitive and motor symptoms. The book will be of interest to students of all levels, researchers, and clinicians in speech-language pathology and related disciplines, including neurology, psychiatry, and psychology.

**The Communication Disorders Casebook** John Wiley & Sons

Comprehension of texts and understanding of questions is a cornerstone of successful human communication. Whilst reading comprehension has been thoroughly investigated in the last decade,

there is surprisingly little research on children's comprehension of picture stories, particularly for bilinguals. This can be partially explained by the lack of cross-culturally robust, cross-linguistic instruments targeting early narration. This book presents an inference-based model of narrative comprehension and a tool that grew out of a large-scale European project on multilingualism. Covering a range of language settings, the book uses the Multilingual Assessment Instrument for Narratives to answer the question which narrative comprehension skills (bilingual) children can be expected to master at a certain age, and explores how such comprehension is affected (or not affected) by linguistic and extra-linguistic factors. Linking theory to method, the book will appeal to researchers in linguistics and psychology and graduate students interested in narrative, multilingualism, and language acquisition.

[Assessing Multilingual Children](#) Psychology Press

Wie entwickeln sich Text-/Diskursfähigkeiten bei Zweitsprachenlernenden? Dieser bisher weitgehend unbeantworteten Frage geht die vorliegende Monographie in Bezug auf frühen

Fremdspracherwerb nach. Untersucht werden narrative Texte von Grundschülerinnen und Grundschulern, die an einem englischsprachigen Immersionsprogramm in Deutschland teilnehmen, einer intensiven Form von CLIL bzw. bilinguaem Unterricht. Ausgehend von einem psycholinguistischen Modell der Diskursproduktion betrachtet der vorliegende Band einerseits, auf der Makroebene der Textualität, die Entwicklung der Kohärenz der Erzählungen und andererseits, auf der Mikroebene, die Entwicklung der Kohäsion. Die gewählten Analysemodelle basieren auf Geschichtengrammatik und kohäsiven Mittel nach Halliday und Hasan (1976). Der Band ist eine der ersten Studien zu Kohärenz und Kohäsion im Zweitspracherwerb und die bisher einzige solche Studie im Kontext frühen Fremdsprachenunterrichts. Hauptzielgruppen sind Linguistinnen und Linguisten, die an Spracherwerb, frühkindlichen Erzählungen, Text-/Diskurslinguistik interessiert sind, sowie Fachdidaktikerinnen und Fachdidaktiker, die an frühem Fremdsprachenunterricht und bilinguaem Unterricht interessiert sind.

[The Foundations of Teaching English as a Foreign Language](#) Psychology Press

The Teacher Resource Books are the ideal companion to the pupils' resources and provide your key to the successful implementation of Nelson English.

[400 Picture Writing Prompts](#) Nelson Thornes

Upper-elementary students encounter a sometimes dizzying array of traditional and nontraditional texts both in and outside of the classroom. This practical handbook helps teachers in grades 4-6 harness the instructional potential of fiction, poetry, and plays; informational texts; graphic novels; digital storytelling; Web-based and multimodal texts; hip-hop; advertisements; math problems; and many other types of texts. Twenty-four complete lessons promote critical literacy skills such as comprehending, analyzing, and synthesizing information and using writing to communicate new ideas and pose questions. Snapshots of diverse classrooms are accompanied by clear explanations of the research base for instruction in each genre. Ready-to-use reproducibles are included.

**Development Foundation Book** CUP Archive

An introductory textbook that assumes no prior knowledge of linguistics or second language acquisition, this book presents a comprehensive overview of the theoretical foundations, methods

and practices of Teaching English as a Foreign Language (TEFL) for pre-service teachers. Lennon covers the theoretical bases for TEFL and addresses second language-acquisition research, past and present EFL teaching methodology, as well as psychological and social approaches to individual language-learner variation. Further chapters provide extensive yet accessible coverage on essential foundational topics, including chapters on pronunciation, grammar, vocabulary, literature and testing. Offering a sociocultural approach in which the teacher is seen as a facilitator and supporter of students' self-directed learning, this text provides the prospective teacher with the knowledge and skills to be an effective educator in the EFL classroom. The targeted EFL focus makes this book ideal for pre-service teachers and for teacher training programmes around the world. Each chapter includes a Food for Thought section with questions for reflection and a Further Reading list.

**Crosslinguistic Approaches to the Psychology of Language** Routledge

NOW PUBLISHED BY PLURAL! The Communication Disorders Casebook: Learning by Example, Second Edition focuses on current issues and trends in speech-language pathology (SLP) clinical practice. New and advanced students as well as practitioners will benefit from this comprehensive collection of real-world examples provided by experienced clinicians and scholars. The cases follow an easy-to-understand structure that allows readers to accompany an SLP through the steps of evaluation, diagnosis, treatment, and follow-up of individuals with speech, language, swallowing, and hearing challenges and their families. The clinical studies employ a holistic, person-first approach that considers the beliefs, values, lived experiences, and social contexts of patients throughout the lifespan. With a deep commitment to case-based learning, Shelly S. Chabon, Ellen R. Cohn, and Dorian Lee-Wilkerson have curated a valuable compendium of thought-provoking studies that encourage readers to think like clinicians, with empathy, understanding, and knowledge. New to the Second Edition \* New and updated cases to reflect current research and clinical practice \* Many new references in both the cases and online Instructor's Manual Key Features \* A focus on conceptual knowledge areas \* Comprehensive case histories from leading experts \* Step-by-step explanations of diagnoses, treatment options, and outcomes \* Basic and advanced learning objectives \* Comprehension and analysis questions to evaluate understanding of case studies \* Suggested activities and readings

[Teaching New Literacies in Grades K-3](#) Plural Publishing

This is a comprehensive and accessible guide to the methods researchers use to study child language, written by experienced scholars in the study of language development. Presents a comprehensive survey of laboratory and naturalistic techniques used in the study of different domains of language, age ranges, and populations, and explains the questions addressed by each technique Presents new research methods, such as the use of functional Near Infrared Spectroscopy (fNIRS) to study the activity of the brain Expands on more traditional research methods such as collection, transcription, and coding of speech samples that have been transformed by new hardware and software

[Agrammatic Aphasia](#) Jessica Kingsley Publishers

This special issue of Aphasiology represents the papers accepted for publication which were among those presented at the 34th Clinical Aphasiology Conference, held in Park City Utah in 2004. They have been peer-reviewed and selected by a distinguished group of ad-hoc editorial consultants from among the considerably larger number of papers and posters presented at the meeting itself.
