Guide to Objective

Arithmetic Pearson

Education India

The Englishwoman's Review, which published from 1866 to 1910, participated in and recorded a great change in the range of possibilities open to women. The ideal of the magazine was the idea of the emerging emancipated middle-class woman: economic independence from men, choice of occupation, participation in the male

enterprises of commerce and government, access to higher education, admittance to the male professions, particularly medicine, and, of course, the power of suffrage equal to that of men. First published in 1984, this thirty-fifth volume contains issues from 1903. With an informative introduction by Janet Horowitz Murray and Myra Stark, and an index compiled by Anna Clark, this set is an invaluable resource to those studying nineteenth and early twentieth-century

feminism and the
women's movement in
Britain.
