Acting concentrated both the aspirations and anxieties of seventeenth- and eighteenth-century France, where theater was a defining element of urban sociability. In *Acting Up: Staging the Subject in Enlightenment France*, Jeffrey M. Leichman argues for a new understanding of the relationship between performance and self. Innovative interpretations of *La Chaussée*, Rousseau, Diderot, Rétif, Beaumarchais, and others demonstrate how the figure of the actor threatened

ancien régime moral hierarchies by decoupling affect from emotion. As acting came to be understood as an embodied practice of individual freedom, attempts to alternately perfect and repress it proliferated. Across religious diatribes and sentimental comedies, technical manuals and epistolary novels, Leichman traces the development of early modern acting theories that define the aesthetics, philosophy, and politics of the performed subject. Acting Up weaves together cultural studies, literary analysis, theater history, and performance studies to establish acting as a key conceptual model for the subject, for the Enlightenment, and for our own time.

Le dessin est un champ fructueux et aujourd'hui inexploré. Dessiner l'Histoire, c'est se demander ce que cela implique de traduire le passé, qui par définition est évanoui, par le biais du dessin. Si quelque chose, au-delà du style graphique des auteurs rassemble les bandes dessinées «historiques» c'est bien qu'elles re-donnent à voir, qu'elles re-mettent en scène le passé par le biais de l'image et plus précisément du dessin. Là où une bande dessinée « historique » pourrait se définir c'est bien là où - qu'elle soit « sérieuse » ou humoristique - le dessinateur invoque tout un espace d'imagination, de considérations, de connaissances et d'influences qui viennent s'incarner au sein de sa production, de son tracé. Que ce soit Astérix, Fritz Haber ou les bandes dessinées de Séra, ces oeuvres transcrivent et traduisent, par le dessin, une certaine forme du passé historique. Dessiner l'Histoire interroge cette culture du passé au coeur de notre époque. Si le passé est une image, comment peut-on comprendre et répandre une nouvelle pensée de l'écriture visuelle de l'histoire ? *How to Draw Animals* Granta Books Learn the basics of drawing using basic shapes. *Colombo* Xlibris Corporation Investigating Musical Performance considers the wide range of perspectives

on musical performance made tangible by the cross-disciplinary studies of the last decades and encourages a comparison and revision of theoretical and analytical paradigms. The chapters present different approaches to this multi-layered phenomenon, including the results of significant research projects. The complex nature of musical performance is revealed within each section which either suggests aspects of dialogue and contiguity or discusses divergences between theoretical models and perspectives. Part I elaborates on the history, current trends and crucial aspects of the study of musical performance; Part II is devoted to the development of theoretical models, highlighting sharply distinguished positions; Part III explores the relationship between sign and sound in score-based performances; finally, the focus of Part IV centres on gesture considered within different traditions of musicmaking. Three extra chapters by the editors complement Parts I and III and can be accessed via the online Routledge Music Research Portal. The volume shows actual and possible connections between topics, problems, analytical methods and theories, thereby reflecting the wealth of stimuli offered by research on the musical cultures of our times.

What was caricature to novelists in the Romantic period? Why does Jane Austen call Mr Dashwood's wife 'a strong caricature of himself'? Why does Mary Shelley describe the body of Frankenstein's creature as 'in proportion', but then 'distorted in its proportions' - and does caricature have anything to do with it? This book answers those questions, shifting our understanding of 'caricature' as a literary-critical term in the decades when 'the English novel' was first defined and canonised as a distinct literary entity. Novels incorporated caricature talk and anti-caricature rhetoric to tell readers what different realisms purported to show them. Recovering the period's concept of caricature, *Caricature and Realism in the Romantic Novel* sheds light on formal realism's self-reflexivity about the 'caricature' of artifice, exaggeration and imagination. It has been argued that the history of landscape and of gardens has been marginalized from the mainstream of art

history and visual studies because of a lack of engagement with the theories, methods and concepts of these disciplines. This book explores possible ways out of this impasse in such a way that landscape studies would become pivotal through its theoretical advances, since landscape studies would challenge the underlying assumptions of traditional phenomenological theory. Thus the history and theory of twentieth-century landscape might not only once again share concepts and methods with contemporary art and design history, but might in turn influence them. A complementary sequel to *Relating Architecture to Landscape*, this volume of essays explores further areas of interest and discussion in the landscape/architecture debate and offers contributions from a team of well-known researchers, teachers and writers. The choice of topics is wide-ranging and features case studies of modern and contemporary schemes from the USA, Far East and Australasia.

*Farm Animals* Walter Foster Publishing  
The essays collected in this volume were first presented at the international and interdisciplinary conference on the Graphic Novel hosted by the Institute for Cultural Studies (University of Leuven) in 2000. The issues discussed by the conference are twofold. Firstly, that of trauma representation, an issue

escaping by definition from any imaginable specific field. Secondly, that of a wide range of topics concerning the concept of "visual narrative," an issue which can only be studied by comparing as many media and practices as possible. The essays of this volume are grouped here in two major parts, their focus depending on either a more general topic or on a very specific graphic author. The first part of the book, "Violence and trauma in the Graphic Novel", opens with a certain number of reflections on the representation of violence in literary and visual graphic novels, and continues with a whole set of close readings of graphic novels by Art Spiegelman (Maus I and II) and Jacques Tardi (whose masterwork "C'était la guerre des tranchées" is still waiting for its complete English translation). The second part of the book presents in the first place a survey of the current graphic novel production, and insists sharply on the great diversity of the range in the various 'continental' traditions (for instance underground 'comix', and feminist comics, high-art graphic novels, critical superheroes-fiction) whose separation is nowadays increasingly difficult to maintain. It continues and ends with a set of theoretical interventions where not only the reciprocal influences of national and international traditions, but also those between genres and media are strongly forwarded, the emphasis being here mainly on problems concerning ways of looking and positions of spectatorship.

During the second half of the eighteenth century British architecture moved away from the dominant school of classicism in favour of a more creative freedom of expression. At the forefront of this change were architect brothers Robert and James Adam. Kondo's work places them within the context of eighteenth-century intellectual thought.

What is rhetorical music? In *The Pathetick Musician*, Bruce Haynes and Geoffrey Burgess illustrate the vital place of rhetoric and eloquent expression in the creation and performance of Baroque music. Through engaging explorations of the cantatas of J.S. Bach, the authors explode the conventional notion of historical authenticity in music, proposing adventurous new directions to reinvigorate the performance of early music in the modern setting. Along the way, Haynes and Burgess investigate

intersections between music and oratory, dance, gesture, poetry, painting and sculpture, and offer insights into figural elaboration, articulation, nuance and temporality. Aimed primarily at performers of Baroque music, the book situates the study of performance practice in a broader cultural context, and as much as an invaluable resource for advanced study, it contains a wealth of information that pertains directly to anyone working in the field of early music. Based on a draft sketched by celebrated Baroque oboist and early music scholar Bruce Haynes before his death in 2011, *The Pathetick Musician* is the fruit of the combined wisdom of two musicians renowned equally for their contributions as performers and scholars. Drawing on an impressive array of Classical treatises on oratory, musical autographs and performance accounts, it is an essential companion to Haynes' controversial *The End of Early Music*. Geoffrey Burgess has taken up the broader claims of Haynes' philosophy to create a practical, accessible text that will be stimulating for all musicians interested in the rediscovery of early music. With copious musical examples, contemporaneous works of art, and a companion website with supplementary audio recordings, *The Pathetick Musician* is an invaluable resource for all interested in exploring new expressive possibilities in the performance and study of Baroque music.
