Nearly all philosophers refer to Kant when debating the concept of dignity, and many approve of Kant's conception, unaware of the tensions between Kant's conception and the modern idea of dignity intimately connected to the idea of human rights. What exactly is Kant's conception of dignity? Is there a connecting tie between dignity and the legal sphere of human rights at all? Does Kant's concept refer to a superior status human beings seem

to own in comparison to non-rational beings? Or does it refer to an absolute value? The contributions of this volume are organised in five broader topics. In the first section tensions within the Kantian conception of dignity are discussed (C. Horn, D. Birnbacher, G. Schönrich). The second group of articles illuminates the intimate connections between dignity and human rights (R. Mosayebi, M. Kettner). The third group discusses the prevailing moral conception of dignity (S. Yamatsuta, S. Shell, O. Sensen). The fourth group focuses on the relation of dignity and end in itself (T. Hill, D. Sturma, A. Wood). The central theme of the fifth group of contributions are the social, political, and cultural dimensions of dignity (Y. Kato, K. Ameriks, K. Flikschuh, T. Saito).

In his book, Peter Rohs develops a dualism of process-types founded in a theory of time: a type of mental processes belonging to a time-theoretical ontology and a type of physical processes belonging to a timeless ontology (the ontology of physics). This dualism should be proved as a basis for a non-naturalistic philosophy of mind, through which a libertarian concept of freedom and of personal autonomy can be defended. This theory is, as Rohs tries to demonstrate, compatible with the theory of evolution.

In the Middle Ages, rolls were ubiquitous as a writing support. While scholars have long examined the texts and images on rolls, they have rarely taken the manuscripts themselves into account. This volume readdresses this imbalance by focusing on the materiality and various usages of rolls in late medieval England and France. Researchers from England, France, Germany and Singapore demonstrate in 11 contributions how this approach can increase our understanding of the rolls and their contents, as well as the contexts in which they were produced and used.

This study traces the emergence of the concept of the body as a sanctuary from its biblical roots to its expressions in late Second Temple Judaism. Harrington's hypothesis is that the destruction of the first Jerusalem temple was a catalyst for a new reality vis-à-vis the temple and the emergence of increased emphasis on the holiness of the people along with concomitant standards of purity in a certain stream of Judaism. The study brings into relief elements of this attitude from exilic texts, e.g. Ezekiel, to Ezra-Nehemiah, the Dead Sea Scrolls and other Second Temple Jewish texts, including early Jesus and Pauline traditions. The goal is to provide a history of the concept of the body-cum-temple metaphor which comes to its fullest expression in the letters of Paul to the Corinthians. The concept of the body as a sanctuary as it comes to fruition in late second temple Judaism must be understood within the conceptual world of Jewish holiness of the time. The metaphor of the temple provides a frame of reference but only a close analysis of the concepts of holiness, purity, and impurity and the dynamics between them can provide depth and distinction. Of particular importance, critical to proper understanding of the temple metaphor, are the notions of the elect, holy status of Israel and its possible desecration by wrongful sexual relations, the loss of the temple and the ripple effect of creating at least temporary substitutes for processes of the cult, the widespread concern in Second Temple Judaism for ritual purity in support of greater holiness, and a desire among Jews for the residence and agency of the spirit of holiness.
