*The International English and French
Dictionary* BoD – Books on Demand
Texts from the Middle is a companion
primary source reader to the textbook *The
Sea in the Middle*. It can be used alone or
in conjunction with the textbook, providing
an original history of the Middle Ages that
places the Mediterranean at the
geographical center of the study of the
period from 650 to 1650. Building on the
textbook's unique approach, these sources
center on the Mediterranean and
emphasize the role played by peoples and

cultures of Africa, Asia, and Europe in an
age when Christians, Muslims, and Jews of
various denominations engaged with each
other in both conflict and collaboration.
The supplementary reader mirrors the
main text's fifteen-chapter structure,
providing six sources per chapter. The two
texts pair together to provide a framework
and materials that guide students through
this complex but essential history—one
that will appeal to the diverse student
bodies of today.

Contributors of the 16 papers were charged with reviewing urgent problems of motor control rather than reporting on their own research, in order to produce a broad reference for professionals and graduate students in the field. Four of them worked directly with Nikolai Bernstein (1896-1966), the Russian scientist who first worked in the field and wh.
