Geostatistics for Estimating Fish Abundance Rutgers University Press

China and Globalization in the Amazon examines Chinese investment in the Global South, with particular attention to industrial activity in Latin America. Based on ethnographic work conducted in several Chinese factories in the Amazon region of Brazil, whether private, partially private, or state-owned, it

explores the impact of these factories on the lives of workers, specifically on wages, laws, and labor benefits, as well as the relationship between management and workers. Drawing on interviews with Brazilian workers, expatriate Chinese workers, union leaders, and factory managers, the author identifies a Chinese production model and sheds light on the implementation of externally defined work regimes that showed little engagement with the workforce in the region, together with practices that resulted in a technical or bureaucratic relationship with the worker, and the emergence of lower wages than the local average, as well as few concessions on labor benefits. A study of Chinese globalization and industrial expansion in the developing world, and the reactions of workers to the Chinese model of management, this volume will be of interest to scholars of the

sociology of work and organizations, globalization, development studies, and politics.

The Long 1968 Taylor & Francis

An ethnographic investigation into the dynamics between space and security in countries around the world It is difficult to imagine two contexts as different as a soccer stadium and a panic room. Yet, they both demonstrate dynamics of the interplay between security and space. This book focuses on the infrastructures of security, considering locations as varied as public entertainment venues to border walls to blast-proof bedrooms. Around the world, experts, organizations, and governments are managing societies in the name of security, while scholars and commentators are writing about surveillance, state violence, and new technologies. Yet in spite of the growing emphasis on security, few truly consider the spatial dimensions of security, and particularly how the relationship between space and security varies across cultures. This volume explores spaces of security not only by attending to how security is produced by and in spaces, but also by emphasizing the ways in which it is constructed in the contemporary landscape. The book explores diverse contexts ranging from biometrics in India to counterterrorism in East Africa to border security in Argentina. The ethnographic studies demonstrate the power of a spatial lens to highlight aspects of security that otherwise remain hidden, while also adding clarity to an elusive and dangerous way of managing the world.

"Theoretically wise and practically powerful, this book is about

how to take full advantage of advances in technology and the learner autonomy they afford, rather than simply adapt to or deny them. It issues a clarion call to language educators and administrators interested in building on recent advances in language learning via the informal avenues of digital communications." --Mark Dressman, Professor Emeritus, University of Illinois at Urbana-Champaign, US, Professor and Chair of English at Khalifa University, UAE "This important and original book challenges us to rethink the design and delivery of the language learning opportunities universities provide for their students. Drawing on Complex Dynamic Systems Theory, Self-Determination Theory and her own empirical explorations of informal online language learning, Denyze Toffoli paints a portrait of today's university language learner that is novel, unexpected and urgent." --David Little, Fellow and Associate Professor Emeritus at Trinity College, Ireland This book takes a fresh look at both context and the language learner in an attempt to shed light on the holistic and ever-changing system of the contemporary L2 speaker's language development. Drawing on complex dynamic systems theory as a means to more fully understand the holistic nature of contemporary language learning, the author attempts to bridge the longstanding gap between formal language provision in Higher Education institutions, and more informal language acquisition achieved through activities such as listening to music, watching films and television, and playing games. Based on a theoretical understanding of the interplay between these contexts, contents and practices, the author offers suggestions concerning the shape of language centres in higher education and the role of teachers in readying the contemporary

language learner for autonomous lifelong and lifewide language development. This book will be of particular interest to language teachers, teacher trainers, and higher education administrators.

The Trouble with Men Univ of California Press

This book examines the relationship between the newly independent Indian state and its New Cinema movement. It looks at state formative practices articulating themselves as cultural policy. It presents an institutional history of the Film Finance Corporation (FFC), later the National Film Development Corporation (NFDC), and their patronage of the New Cinema in India, from the 1960s to the 1990s, bringing into focus an extraordinary but neglected cultural moment in Indian film history and in the history of contemporary India. The chapters not only document the artistic pursuit of cinema, but also the emergence of a larger field where the market, political inclinations of the Indian state, and the more complex determinants of culture intersect — how the New Cinema movement faced external challenges from the industrial lobby and politicians, as well as experienced deep rifts from within. It also shows how the Emergency, the Janata Party regime, economic liberalization, and the opening of airwaves all left their impact on the New Cinema. The volume will be of great interest to scholars and researchers of film studies, politics and public policy, especially cultural policy, media and culture studies, and South Asian studies.

China and Globalization in the Amazon Springer Nature

4. 1. 1 Importance of Computer Simulation The importance of experimenting for quality improvement and innovation of products and processes is now very well known: “experimenting” means to

implement significant and intentional changes with the aim of obtaining useful information. In particular, the majority of industrial experiments have two goals: • To quantify the dependence of one or more observable response variables on a group of input factors in the design or the manufacturing of a product, in order to forecast the behavior of the system in a reliable way. • To identify the level settings for the inputs (design parameters) that are capable of optimizing the response. The set of rules that govern experiments for technological improvement in a physical set-up are now comprehensively labeled “DoE.” In recent years, the use of experimentation in engineering design has received renewed momentum through the utilization of computer experiments (see Sacks et al. 1989, Santner et al. 2003), which has been steadily growing in the last two decades. These experiments are run on a computer code implementing a simulation model of a physical system of interest. This enables us to explore the complex relationships between input and output variables. The main advantage of this is that the system becomes more “observable,” since computer runs are generally easier and cheaper than measurements taken in a physical set-up, and the exploration can be carried out more thoroughly. This is particularly attractive in industrial design applications where the goal is system optimization. 4. 1.

*General History of the Caribbean UNESCO Volume 6* Springer Science & Business Media

This book explores the relevance of utopia in relation to contemporary criminology. The range of contributors explore the application of a utopian method for uncovering the potential within criminology and criminal justice, as well as the relevance

of the utopian impulse for developing a challenge to the status quo in academia and beyond.

*The Biology and Identification of the Coccidia (Apicomplexa) of Rabbits of the World* BRILL

This book examines emerging debates and questions around cycling to critically analyse and challenge dominant framings and prevalent conventions of 'good cycling'. *Cycling Societies* brings to light the plurality of voices and forms of cycling in other societies, revealing the diversity and complexity of cycling across different socio-political regimes, geographies and cultures. It presents case studies from five continents and demonstrates the need of thinking comparatively about cycling and urban environments. The book pivots around the three themes of innovations, inequalities and governance and engages a diversity of voices: world-renowned academics in the field of cycling and urban mobility, cycling activists and transportation consultants. Synthesising academic contributions with policy briefs, this innovative book will be of great interest to students, scholars and practitioners of sustainable transportation, urban planning and mobility studies.

*Biographie Universelle, Ancienne Et Moderne* Newnes

With eighty percent of the world's population professing religious faith, religious belief is a common human characteristic. This fascinating and highly unique Handbook brings together state-of-the-art research on incorporating religion into development studies literature and research. The expert contributors illustrate that as religious identity is integral to a community's culture, exclusion of religious consideration will limit successful development interventions; it is therefore necessary to conflate

religion and development to enhance efforts to improve the lives of the poor. Issues addressed include: key tenets, beliefs and histories of religions; religious response to development concerns (gender, environment, education, microfinance, humanitarian assistance); and the role of faith based organisations and missionaries in the wider development context. Practical case studies of countries across Africa, Eastern Europe and the Pacific (including Australia) underpin the research, providing evidence that the intersection between religion and development is neither new nor static. By way of conclusion, suggestions are prescribed for extensive further research in order to advance understanding of this nascent field. This path-breaking Handbook will prove a thought-provoking and stimulating reference tool for academics, researchers and students in international development, international relations, comparative religion and theology.

**Islamism and Secularism in North Africa** Springer Science & Business Media

Delving into a tumultuous year's impact on art, culture, and politics, this book "illuminates the often-overlooked histories of 1968" (The Journal of American History). From the mid-1960s to the early 1970s, revolutions in theory, politics, and cultural experimentation swept around the world. These changes had as great a transformative impact on the right as on the left. A touchstone for activists, artists, and theorists of all stripes, the year 1968 has taken on new significance for the present moment, which bears certain uncanny resemblances to that time. The Long 1968 explores the wide-ranging impact of the year and its aftermath in politics, theory, the arts, and international relations—and its uses today.

The Biology and Identification of the Coccidia (Apicomplexa) of Rabbits of the World is a taxonomic summation of a damaging intestinal parasite found in rabbits and transmissible to other species, including humans. This book conceptually and historically summarizes the world's literature on the parasite and also provides a quick guide to isolation procedures, identification, strategies for management, and available chemotherapy. It is a vital source of knowledge about coccidia's real and potential transmission to humans, which can lead to dangerous health problems, like severe dehydration, vomiting, lethargy and even death. Coccidiosis is an intestinal disease that affects several different animal species, including canines and humans, and is one of the most prevalent protozoal infections in North America. The causative agent is a protozoan that has the ability to multiply rapidly and cause major damage in the intestinal wall, rupturing the cells of the intestinal lining. The final stage, the oocyst, is extremely resistant to environmental stress and is difficult to completely remove from the environment. Oocysts are frequent contaminants of feed and water and when the sporulated oocysts are ingested by other animals, they start the life cycle over in the new host. With the demand for rabbits in scientific research and for rabbit meat for human consumption increasingly globally each year, rabbits are of epidemiologic significance for laboratory workers, university researchers, veterinarians, pet owners, and breeders. Evaluates the scientific and scholarly merit of each of the publications written about coccidian from every rabbit species, providing a complete historical rendition A treatise for the identification of coccidia and their treatment as needed

Written in a style that can be understood by most educated lay persons and laboratory workers Written by the first ranked author team among the world-class parasitologists who study coccidia Combined in one single source, this book follows the gold standards in coccidian biology and identification Brings all that information together in one volume and solves the problems faced by researchers, veterinarians, students and others in trying to find and navigate through this scattered literature

*Learning Alsatian through English* Scarecrow Press

"At the beginning of the 21st Century, the Caribbean faces a number of fundamental challenges which will require creative responses from the countries in the region. Contending with Destiny: The Caribbean in the 21st Century reflects the views of some of the leading minds in the region on possible approaches for responding to these challenges. The book captures the rich array of ideas practical proposals presented by three Caribbean prime ministers, scholars, policymakers in both the public and private sectors, the NGO community and representatives of regional institutions. All but one of the papers featured in this publication were presented at the Conference on the Caribbean in the 21st Century organised by the University of the West Indies in cooperation with the CARICOM Secretariat and the Caribbean Development Bank in September 1999. "

**1994** Taylor & Francis

This book gathers together French-language authors who in the last decade have played a part in the renewal of interest in the question of nationalism. This volume organized along thematic lines and with a genuine transversal approach, seeks to give audiences a glimpse of some of that research, whether related to

theoretical, normative or analytical questions.

*Statistics for Innovation* Walter de Gruyter

Rewritten versions of contributions to an international conference held at the University of Antwerp in May 1992. Starting point for the conference was the vagueness of the very terms 'modernism' and 'modernity'. In the first section a group of comparatists address the theoretical and terminological problems of modernism. Practical readings of modernist writers; discussions of different modernist movements; and, the work of critics who have contributed to debates about modernism make up the second section. The third section looks at the problem of modernism from an interartistic and interdisciplinary perspective.

**Area Handbook for Mozambique** Simon and Schuster

Cinema has been long associated with France, dating back to 1895, when Louis and Auguste Lumi\_re screened their works, the first public viewing of films anywhere. Early silent pioneers Georges MZli\_s, Alice Guy BlachZ and others followed in the footsteps of the Lumi\_re brothers and the tradition of important filmmaking continued throughout the 20th century and beyond. In *Encyclopedia of French Film Directors*, Philippe Rège identifies every French director who has made at least one feature film since 1895. From undisputed masters to obscure one-timers, nearly 3,000 directors are cited here, including at least 200 filmmakers not mentioned in similar books published in France. Each director's entry contains a brief biographical summary, including dates and places of birth and death; information on the individual's education and professional training; and other pertinent details, such as real names (when the filmmaker uses a pseudonym). The entries also provide complete filmographies,

including credits for feature films, shorts, documentaries, and television work. Some of the most important names in the history of film can be found in this encyclopedia, from masters of the Golden Age\_Jean Renoir and RenZ Clair\_to French New Wave artists such as Fran\_ois Truffaut and Jean-Luc Godard.

*Catalog of Copyright Entries* Routledge

When fiction and reality meet: Probably no contemporary novel has shaped reality as powerfully Houellebeck's *Submission*. No previous analysis of *Submission* is as deep and encompassing as this volume written by experts on politics and literature

*The Druze Community and the Lebanese State* Routledge

Explores the mysterious Priory of Sion organization, investigating key questions about the alleged descendants of Jesus and Mary Magdalene, Leonardo da Vinci's possible membership, and the identity of Grand Master Pierre Plantard.

First multi-year cumulation covers six years: 1965-70.

*Contending with Destiny* NYU Press

One of the fundamental questions of Middle Eastern, and Lebanese studies in particular, is the history of the relationship between the Druze community and the state in modern Lebanon. Arguing that the Druze community has been politically alienated from the Lebanese state, this book explores the historical and political origins of this alienation. *The Druze Community and the Lebanese State* contends that the origins of this alienation lie in the state's national ideology, its political confessional system, and the Druze's historical background during the medieval period. Moreover, this book examines the extent to which the Druze's attitude vis-à-vis the Lebanese state has been influenced

by their historical rivalry with the Maronites. Particular emphasis is placed on the political and ideological practices adopted by the Druze leadership and intelligentsia as they dealt with the changes taking place in their community's political status following the political settlements of 1920 and 1943 (the establishment of Greater Lebanon and the National Pact,

respectively). A welcome addition to existing literature on Lebanon, this book will be an essential reference tool for students and researchers with an interest in nationalism, identity and Middle East Politics more broadly.
