HOLDEN ALANI

The Cambridge History of Judaism: Volume 2, The Hellenistic Age John Wiley & Sons
 Caused in part by the slash-and-burn practices of both large- and small-scale farmers, the environmental implications of tropical deforestation remain a worldwide concern. Yet the small-scale farmers who use slash-and-burn agriculture depend on it to produce food and make a living for their families. With contributions from scientists, economists, ecologists, and anthropologists, this book provides an overall analysis of the environmental, economic, and social reasons for why slash and burn is so common and presents alternatives to this destructive practice.

Shi'ite Lebanon Springer

"A heart-healing, mocs-on-the-ground story of music, family and friendship." -- Cynthia Leitich Smith, author of *Tantalyze* and *Rain is Not My Indian Name*. Lewis "Shoe" Blake is used to the joys and difficulties of life on the Tuscarora Indian reservation in 1975: the joking, the Fireball games, the snow blowing through his roof. What he's not used to is white kids being nice to him -- kids like George Haddonfield, whose family recently moved to town with the Air Force. As the boys connect through their mutual passion for music, especially the Beatles, Lewis has to lie more and more to hide the reality of his family's poverty from George. He also has to deal with the vicious Evan Reininger, who makes Lewis the special target of his wrath. But when everyone else is on Evan's side, how can he be defeated? And if George finds out the truth about Lewis's home -- will he still be his friend? Acclaimed adult author Eric Gansworth makes his YA debut with this wry and powerful novel about friendship, memory, and the joy of rock 'n' roll.

Data Streams Vernon Press

This open access international scientific study provides an analysis of how the educational strategy of Universal Design for Learning can stimulate the process of inclusive education in different educational-cultural contexts and different areas of the educational system. The findings of the research deepen the conception of inclusive education and present an analysis of factors that are significant for developing the educational system as well as providing evidence-based recommendations for educational practice. The research for this work was done in four European countries with various historical-cultural contexts: Lithuania and Poland underwent a transformation of the educational systems at the turning point in their political system, shifting from a strictly centralized Soviet policy to a liberal and democratic education system; Austria has experienced changes in social stratification and a need for cultural harmonisation arising from active national migration processes, whereas Finland has been gradually developing a socio-democratic model of national welfare. The analysis of the educational processes in the four countries has been performed using a qualitative action research method. The researchers, in cooperation with the teachers from the selected schools in their country, have implemented the strategy of Universal Design for Learning and assessed its transformation indicators in terms of the quality of inclusive education components.

A Companion to Birgitta of Sweden CRC Press

Providing the poor with access to financial services is one of many ways to help increase their incomes and productivity. In many countries, however, traditional financial institutions have failed to provide this service. Microcredit and co-operative programmes have been developed to fill this gap. Their purpose is to help the poor become self-employed and thus escape poverty. Many of these programmes provide credit using social mechanisms, such as group-based lending, to reach the poor and other clients, including women, who lack access to formal financial institutions. With increasing assistance from the World Bank and other donors, microfinance is emerging as an instrument for reducing poverty and improving the poor's access to financial services in low-income

countries. This text examines the experiences of the Grameen Bank and two other major microcredit programmes in Bangladesh in order to quantify the potential and limitations of microcredit programmes as an instrument for reducing poverty and delivering financial services to the poor.

On Fuzziness Cambridge University Press

Vol. 4 covers the late Roman period to the rise of Islam. Focuses especially on the growth and development of rabbinic Judaism and of the major classical rabbinic sources such as the Mishnah, Jerusalem Talmud, Babylonian Talmud and various Midrashic collections.

The Heritage Registry of Who's who Cambridge University Press

A new approach to environmental ethics from within the Christian tradition.

Thoracic Imaging Ludwig von Mises Institute

While structure-function relationships of proteins have been studied for a long time, structural studies of RNA face additional challenges. Nevertheless, with the continuous discovery of novel RNA molecules with key cellular functions and of novel pathways and interaction networks, the need for structural information of RNA is still increasing. This volume provides an introduction into techniques to assess structure and folding of RNA. Each chapter explains the theoretical background of one technique, and illustrates possibilities and limitations in selected application examples.

Academy of Management Annual Meeting Springer Science & Business Media

Although urban allotment gardening dates back to the nineteenth century, it has recently undergone a renaissance of interest and popularity. This is the result of greater concern over urban greenspace, food security and quality of life. This book presents a comprehensive, research-based overview of the various features, benefits and values associated with urban allotment gardening in Europe. The book is based on a European COST Action project, which brings together researchers and practitioners from all over Europe for the first detailed exploration of the subject on a continent-wide scale. It assesses the policy, planning and design aspects, as well as the social and ecological benefits of urban allotment gardening. Through an examination of the wide range of different traditions and practices across Europe, it brings together the most recent research to discuss the latest evolutions of urban allotment gardening and to help raise awareness and fill knowledge gaps. The book provides a multidisciplinary perspective, including insights from horticulture and soil science, ecology, sociology, urban geography, landscape, planning and design. The themes are underpinned by case studies from a number of European countries which supply a wide range of examples to illustrate different key issues.

Digital Roots Taylor & Francis

The book deals with a controversial and seemingly paradoxical relationship between selflessness and business. It depicts the primary and lasting controversy between the selfish (egoistic, competitive) and selfless (pro-social, co-operative) behavior in view of social, organizational and individual benefits. Therefore, it takes a step towards finding a solution to some of the challenges of the twenty-first century, particularly sustainable growth. The miscellaneous and transatlantic background of the Authors origins (USA, Colombia, Germany, Poland, UK, Spain) and their various perspectives (psychological, economic or philosophical) guarantee multi-voiced argumentation for strong relationships between selflessness and business. Selflessness is understood from a social perspective as related to self-transcendence and connectedness to others. This perspective can be helpful in providing a deeper understanding of pro-social behavior in organizations and its implications for productivity and effectiveness. The manifestations of this approach can be found in acts such as organizational altruism, loyalty, quantum leadership, or pro-social vocational interests. One can make an in-depth analysis of selflessness's manifestations on a social, organizational and individual level. The ensuing question is how to achieve self-regulation in order to maintain sustainable growth, and selflessness turns out to be the answer. This book offers strong evidence for high organizational and individual benefits stemming from selfless behavior. Therefore, it is not

selfish behavior that enables and encourages productivity and effectiveness but rather selfless behavior. The book also tackles gender issues in business, especially regarding the social female role as being traditionally related to selflessness. The authors aim to reveal possible solutions to present and future challenges and enhance the meaning of positive outcomes of selfless behavior in business and work environments, which seems to be crucial and indispensable for future growth. The book will be useful not only for academic and business specialists but also for everyone interested in a broader perspective at contemporary challenges of business and organizational psychology.

Indian Home Cooking Crown

Imaging tests are integral to the management of patients with suspected lung disease. Staggering advances in radiological technology have been associated with an ever-increasing complexity, and so keeping up with terminology, understanding the significance of basic radiological signs, and appreciating the prognostic impact of findings on imaging tests, is not an easy undertaking for the physician. Until now, there has been a lack of practical, pocket-sized, but authoritative texts dealing principally with the imaging features of pulmonary disease. Covering the essential elements of pulmonary imaging in a concise and digestible format, *Thoracic Imaging* deals with both the key principles of thoracic imaging, including a separate section on the common radiological terms used to describe pulmonary pathology, and the principal pathological compartments that are affected in specific disease processes. It is packed with over 600 high quality illustrations to highlight the important radiological features in the different diseases, with an emphasis on chest radiography (CXR) and computed tomography (CT) to mirror routine clinical practice.

Making Futures Springer

The chapters compiled in this detailed collection outline a number of methods used to study plant mitochondria today, starting from the isolation of mitochondria to detailed analyses of RNA, protein and enzymatic activities. Given that the ability to uncover mitochondria's unique features is underpinned by current methodology, this book explores the subject from morphology to detailed molecular mechanisms. Written in the highly successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols and tips on troubleshooting and avoiding known pitfalls. Practical and authoritative, *Plant Mitochondria: Methods and Protocols* serves as a vital resource to beginners in the field as well as to expert researchers who find themselves being pulled into the field of mitochondrial research as it links to so many important aspects of plant cell biology.

Hagenberg Research Clarkson Potter

Presents over 150 Indian recipes for soups, dals, vegetables, rice, poultry, meats, fish and shellfish, appetizers and snacks, raitas, flatbreads and crackers, pickles and chutneys, sweets, and drinks, and includes reflections on Indian cooking.

Slash-and-Burn Agriculture Humana

This publication is devoted to the phenomenon of the artist novel, and whether it can be considered to be a medium in its own right within the visual arts. Visual artists create different strategies to integrate their novels into their practice. Introducing traits that are particular to narrative literature into the visual arts implies the accentuation of some features over others, such as narration, fiction, identification, and the act of reading and its protracted engagement, as well as distribution in public space. An artist's approach comes fundamentally from the visual arts. The creation of an artist novel doesn't differ from any other artwork. Both processes feed into each other as they evolve within the same body of works. Thanks to the contributions of a selected group of artists, writers, curators, and scholars this publication strives to demonstrate that literature, when treated by visual artists, can take place well beyond the space of the book.

Aurelie Walter de Gruyter

The notion of Fuzziness stands as one of the really new concepts that have recently enriched the world of Science. Science grows not only through technical and formal advances on one side and useful applications on the other side, but also as consequence of the introduction and assimilation of new concepts in its corpus. These, in turn, produce new developments and applications. And this is what Fuzziness, one of the few new concepts arisen in the XX Century, has been doing so far. This book aims at paying homage to Professor Lotfi A. Zadeh, the "father of fuzzy logic" and also at giving credit to his exceptional work and personality. In a way, this is reflected in the variety of contributions collected in the book. In some of them the authors chose to speak of personal meetings with Lotfi; in others, they discussed how certain papers of Zadeh were able to open for them a new research horizon. Some contributions documented results obtained from the author/s after taking inspiration from a particular idea of Zadeh, thus implicitly acknowledging him. Finally, there are contributions of several "third generation fuzzysists or softies" who were firstly led into the world of Fuzziness by a disciple of Lotfi Zadeh, who, following his example, took care of opening for them a new road in science. Rudolf Seising is Adjoint Researcher at the European Centre for Soft Computing in Mieres, Asturias (Spain). Enric Trillas and Claudio Moraga are Emeritus Researchers at the European Centre for Soft Computing, Mieres, Asturias (Spain). Settimo Termini is Professor of Theoretical Computer Science at the University of Palermo, Italy and Affiliated Researcher at the European Centre for Soft Computing, Mieres, Asturias (Spain)

Collaborative Services First Second

Bruno Buchberger This book is a synopsis of basic and applied research done at the various research institutions of the Softwarepark Hagenberg in Austria. Starting with 15 coworkers in my Research Institute for Symbolic Computation (RISC), I initiated the Softwarepark Hagenberg in 1987 on

request of the Upper Austrian Government with the objective of creating a scientific, technological, and economic impulse for the region and the international community. In the meantime, in a joint effort, the Softwarepark Hagenberg has grown to the current (2009) size of over 1000 R&D employees and 1300 students in six research institutions, 40 companies and 20 academic study programs on the bachelor, master's and PhD level. The goal of the Softwarepark Hagenberg is innovation of economy in one of the most important current technologies: software. It is the message of this book that this can only be achieved and guaranteed long term by "watering the root", namely emphasis on research, both basic and applied. In this book, we summarize what has been achieved in terms of research in the various research institutions in the Softwarepark Hagenberg and what research vision we have for the imminent future. When I founded the Softwarepark Hagenberg, in addition to the "watering the root" principle, I had the vision that such a technology park can only prosper if we realize the "magic triangle", i.e. the close interaction of research, academic education, and business applications at one site, see Figure 1.

Molecular Immunity: A Chronology Of 60 Years Of Discovery Now Publishers Inc

Anda loves Coarsegold Online, the massively-multiplayer role playing game that she spends most of her free time on. It's a place where she can be a leader, a fighter, a hero. It's a place where she can meet people from all over the world, and make friends. Gaming is, for Anda, entirely a good thing. But things become a lot more complicated when Anda befriends a gold farmer -- a poor Chinese kid whose avatar in the game illegally collects valuable objects and then sells them to players from developed countries with money to burn. This behavior is strictly against the rules in Coarsegold, but Anda soon comes to realize that questions of right and wrong are a lot less straightforward when a real person's real livelihood is at stake. From acclaimed teen author Cory Doctorow and rising star cartoonist Jen Wang, *In Real Life* is a sensitive, thoughtful look at adolescence, gaming, poverty, and culture-clash. This title has common Core connections. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

In Real Life Columbia University Press

Annotation By providing a new framework for understanding Shi'ite national politics in Lebanon, Roschanack Shaery-Eisenlohr recasts the relationship between religion and nationalism in the Middle East

Science and Skiing Walter de Gruyter GmbH & Co KG

Once upon a time, three children and a little river dragon were the best of friends—until a promise was broken. Now they are almost grown up and barely speaking to one another. With her country in turmoil, Aurelie is sent on a peacekeeping mission. But how can she prevent a war when she can't even make her friends get along? Heartsick at losing her dearest companions, especially the handsome Garin, Aurelie finds comfort in her secret, late-night trips to fairyland. But a princess can't hide from her duties forever. Her country needs her, and so do her friends—whether they know it or not. Aurelie is a 2009 Bank Street - Best Children's Book of the Year.

Crimes Committed by Terrorist Groups BRILL

This is a print on demand edition of a hard to find publication. Examines terrorists' involvement in a variety of crimes ranging from motor vehicle violations, immigration fraud, and mfg. illegal firearms to counterfeiting, armed bank robbery, and smuggling weapons of mass destruction. There are 3 parts: (1) Compares the criminality of international jihad groups with domestic right-wing groups. (2) Six case studies of crimes includes trial transcripts, official reports, previous scholarship, and interviews with law enforcement officials and former terrorists are used to explore skills that made crimes possible; or events and lack of skill that prevented crimes. Includes brief bio. of the terrorists along with descriptions of their org., strategies, and plots. (3) Analysis of the themes in closing arguments of the transcripts in Part 2. Illus.

The Preparation of the Novel Columbia University Press

The report recommends that China maintain the goal and direction of its healthcare reform, and continue the shift from its current hospital-centric model that rewards volume and sales, to one that is centered on primary care, focused on improving the quality of basic health services, and delivers high-quality, cost-effective health services. With 20 commissioned background studies, more than 30 case studies, visits to 21 provinces in China, the report proposes practical, concrete steps toward a value-based integrated service model of healthcare financing and delivery, including: 1) Creating a new model of people-centered quality integrated health care that strengthens primary care as the core of the health system. This new care model is organized around the health needs of individuals and families and is integrated with higher level care and social services. 2) Continuously improve health care quality, establish an effective coordination mechanism, and actively engage all stakeholders and professional bodies to oversee improvements in quality and performance. 3) Empowering patients with knowledge and understanding of health services, so that there is more trust in the system and patients are actively engaged in their healthcare decisions. 4) Reforming public hospitals, so that they focus on complicated cases and delegate routine care to primary-care providers. 5) Changing incentives for providers, so they are rewarded for good patient health outcomes instead of the number of medical procedures used or drugs sold. 6) Boosting the status of the health workforce, especially primary-care providers, so they are better paid and supported to ensure a competent health workforce aligned with the new delivery system. 7) Allowing qualified private health providers to deliver cost-effective services and compete on a level playing field with the public sector, with the right regulatory oversight, and 8) Prioritizing public investments according to the burden of disease, where people live, and the kind of care people need on a daily basis.
