## FRANKLIN CESAR

Third National Survey of Secondary Teacher Education in India

CRC Press

Contributed articles, excerpts, etc., most in the Indian context; socioanthropological approach.

Advanced Corporate Accounting - Semester IV [CBCS-Bangalore University] Springer Nature

"This book offers a global perspective on the development and design of a digital library and highlights its benefits over a traditional library"--Provided by publisher.

**Corporate Accounting [CBCS BLRU]** IGI Global

Advanced Corporate Accounting has been especially written to meet the requirements of B.Com. students as per the Choice Based Credit System (CBCS) curriculum of Bangalore University. It comprehensively presents the fundamental concepts of corporate accounting in an informative and systematic manner.

*Indian Journal of Clinical Psychology* John Wiley & Sons  
 The Forth Rail Bridge Centenary Conference considers the design

and construction of the bridge and then presents reviews of recent developments in all aspects of structural engineering. Invited keynote papers cover bridges, wide span and space structures, industrial structures, structural analysis and many other topics.

*Contemporary Social Sciences* I. K. International Pvt Ltd

Training Indian village children to look after buffaloes, instructing girls to use a sewing machine, running adult literacy classes for rural women - Did Betty Robinson in her Youth Employment Office in Dunfermline in the 1950s and 1960s realise where her application for missionary training with the London Missionary Society would take her? Three years of missionary training did not prepare her for that. A buffalo and a sewing machine can literally save a village and give its children a future. Then romance and marriage to a fellow Scot, Leslie Robinson, General Surgeon and Medical Superintendent at the Church of South India's hospital in Chickballapur, Karnataka.

**Human Resource Management** Springer

This book uses spatio-temporal analysis to understand urbanisation in Indian cities and explain the concept and impact of global greenhouse gas (GHG) emissions. It creates a GHG

footprint for Indian cities and engages in a discussion about the United Nations Sustainable Development Goals (SDGs) and smart city initiatives within an Indian context. Understanding the spatial patterns of land use/land cover (LULC) dynamics in the rapidly urbanising cities of India, the readers will be able to simulate future urbanisation patterns and use spatial temporal analysis as a tool for implementing appropriate mitigation measures.

Features  
 Analyses the complete urbanisation and urban sprawl of major cities in India using advanced geospatial modelling techniques  
 Highlights the best practices and methods used in modelling urban growth  
 Discusses greenhouse gas emissions from various sectors and their effects in local environments  
 Addresses the increase of local temperature in cities due to unplanned land use change and its impact on environmental sustainability and resilience  
 Fills the need for data-driven governance and policy decisions by introducing various analyses through spatial mapping  
 Highlighting some of the best practices and tools being used for modelling urban growth through case studies, the book is useful to those interested in using new technologies and methods for data collection and problem solving. It focuses on the major environmental issues in India, which are prevalent in most developing countries.

Biotechnology for Zero Waste Clever Fox Publishing

Study based on an analysis of the financial position of the Karnataka University, 1949-1972/73.

**The Diamonds Of Botswana Part-2 And Other Stories** IOS Press

SGN.The E Book Bangalore University Ph.D. Entrance Test- Research Aptitude And Research Methodology Common For All Streams Covers Objective Questions With Brief Study Material. Global Innovation Index 2023 River Publishers

Jordan Day, the young head of the Melville University's Special Collections library, is told her department is slated for elimination due to budget cuts. Then out of the blue, the university's most esteemed professor declares that he will donate to her department a table that once belonged to William Shakespeare. He then announces that this newly discovered artifact provides definitive proof that Shakespeare never wrote the works attributed to him. Thrilled that the donation will take her department off the chopping block, Jordan's relief turns to despair when she finds the professor's severed head impaled on a pole outside her window and the priceless table nowhere to be found. Things get worse when she is accused of stealing Shakespeare's table and is named a suspect in the professor's murder. To save her department and clear her name, Jordan must find Shakespeare's table, reveal the real murderer and discover who really wrote the works of William Shakespeare. All while navigating the back-biting, petty jealousies and academic treachery that characterizes university life.

Southern Economist Austin Macauley Publishers

Biotechnology for Zero Waste The use of biotechnology to minimize waste and maximize resource valorization In Biotechnology for Zero Waste: Emerging Waste Management Techniques, accomplished environmental researchers Drs. Chaudhery Mustansar Hussain and Ravi Kumar Kadeppagari deliver a robust exploration of the role of biotechnology in reducing waste and creating a zero-waste environment. The editors provide resources covering perspectives in waste management like anaerobic co-digestion, integrated biosystems, immobilized enzymes, zero waste biorefineries, microbial fuel cell technology, membrane bioreactors, nano biomaterials, and more. Ideal for sustainability professionals, this book comprehensively sums up the state-of-the-art biotechnologies powering the latest advances in zero-waste strategies. The renowned contributors address topics like bioconversion and biotransformation and

detail the concept of the circular economy. Biotechnology for Zero Waste effectively guides readers on the path to creating sustainable products from waste. The book also includes: A thorough introduction to modern perspectives on zero waste drives, including anaerobic co-digestion as a smart approach for enhancing biogas production Comprehensive explorations of bioremediation for zero waste, biological degradation systems, and bioleaching and biosorption of waste Practical discussions of bioreactors for zero waste and waste2energy with biotechnology An in-depth examination of emerging technologies, including nanobiotechnology for zero waste and the economics and commercialization of zero waste biotechnologies Perfect for process engineers, natural products, environmental, soil, and inorganic chemists, Biotechnology for Zero Waste: Emerging Waste Management Techniques will also earn a place in the libraries of food technologists, biotechnologists, agricultural scientists, and microbiologists.

**Report** CRC Press

The Global Innovation Index 2023 (GII) takes the pulse of innovation against a background of an economic and geopolitical environment fraught with uncertainty. Tracking the most recent global innovation trends, the GI finds that – despite a climate of disquiet and a decline in risk capital investment – opportunities abound as a result of the incipient Digital Age and Deep Science innovation waves. At its core, the GI 2023 reveals who is leading in global innovation, ranking the innovation performance of 132 economies and highlighting their strengths and weaknesses. In addition, it identifies the world's top 100 science and technology clusters. The GI is a “tool for action” regarding innovation policy. Governments around the world have used the GI to benchmark innovation performance, perfect innovation metrics and, ultimately, to shape evidence-based innovation policymaking. In the context of the United Nations Sustainable Development Goals (SDGs), since 2019, the GI has been recognized by the United Nations General Assembly to be a benchmark for measuring innovation, including more recently in a post-pandemic environment.

**Report on the Status of Journalism & Communication Education in India** Sri Sathya Sai Media Centre

The book depicts the saga of a man who rose to a very high position of a Vice Chancellor, looked back into several decades of his life to be able to recollect experiences of varied nature and managed to put them together in the form of a memoir.

MUSINGS AND MEMOIRS OF A VICE- CHANCELLOR: JOURNEY THROUGH SCIENCE, ENVIRONMENT AND SOCIETY New Delhi : Sterling Publishers

Examines the influences of electric fields on dielectric materials and explores their distinctive behavior through well established principles of physics and engineering and recent literature on dielectrics. Facilitates understanding of the space charge phenomena in the nonuniform fields. Contains more than 800 display equations.

Bulletin of the Chemical Society of Japan Commonwealth

The 16th ICSMGE responds to the needs of the engineering and construction community, promoting dialog and exchange between academia and practice in various aspects of soil mechanics and geotechnical engineering. This is reflected in the central theme of the conference 'Geotechnology in Harmony with the Global Environment'. The proceedings of the conference are of great interest for geo-engineers and researchers in soil mechanics and geotechnical engineering. Volume 1 contains 5 plenary session lectures, the Terzaghi Oration, Heritage Lecture, and 3 papers presented in the major project session. Volumes 2, 3, and 4 contain papers with the following topics: Soil mechanics in general; Infrastructure and mobility; Environmental issues of geotechnical engineering; Enhancing natural disaster reduction systems; Professional practice and education. Volume 5 contains the report of practitioner/academic forum, 20 general reports, a summary of the sessions and workshops held during the conference.

#### **The Educational Review** Chandresh Agrawal

Rad-hard Semiconductor Memories is intended for researchers and professionals interested in understanding how to design and make a preliminary evaluation of rad-hard semiconductor memories, making leverage on standard CMOS manufacturing processes available from different silicon foundries and using different technology nodes. In the first part of the book, a preliminary overview of the effects of radiation in space, with a specific focus on memories, will be conducted to enable the reader to understand why specific design solutions are adopted to mitigate hard and soft errors. The second part will be devoted to RHBD (Radiation Hardening by Design) techniques for semiconductor components with a specific focus on memories. The approach will follow a top-down scheme starting from RHBD at architectural level (how to build a rad-hard floor-plan), at circuit level (how to mitigate radiation effects by handling transistors in the proper way) and at layout level (how to shape a layout to mitigate radiation effects). After the description of the mitigation techniques, the book enters in the core of the topic covering SRAMs (synchronous, asynchronous, single port and dual port) and PROMs (based on AntiFuse OTP technologies), describing how to design a rad-hard flash memory and fostering RHBD toward emerging memories like ReRAM. The last part will be a leap into emerging memories at a very early stage, not yet ready for industrial use in silicon but candidates to become an option for the next wave of rad-hard components. Technical topics discussed in the book include: Radiation effects on semiconductor components (TID, SEE) Radiation Hardening by Design (RHBD) Techniques Rad-hard SRAMs Rad-hard PROMs Rad-hard Flash NVMs Rad-hard ReRAMs Rad-hard emerging technologies
