Excel is the most popular and widely used productivity software in all business environments, and it is an irreplaceable companion in ordinary work as in the analysis of large amounts of complex data. Nevertheless, the majority of users knows and uses only a very limited number of features, often in an elementary way. This workbook shows in practice the use of a wide variety of formulas, functions and features (like pivot tables, macros or the Solver add-in) that allow to effectively and professionally work with Excel. The

workbook starts with the basics and gets progressively to deal with very complex cases. It is a valuable support for college students, professionals and managers who want to learn the basics or to improve the knowledge of Excel up to an advanced level. In the dedicated web area, all the initial and solved files are available to carry out the exercises and check the solutions. Over 40 exercises are commented, to highlight the basic concepts and clarify the most complex ones. The authors are all lecturers for the course of Computer skills for economics at Università Bocconi in Milan: Massimo Ballerini, Alberto Clerici, Chiara Debernardi, Davide Del Corno, Maurizio De Pra, Gianluca Salviotti and Marco Sampietro.

Using an inquiry-based approach to learning, Oxford Discover develops the communication skills and thinking skills students need for success in the 21st century. Who are your family and friends? Where can we see colors? How can we make music? Oxford Discover uses Big Questions such as these to tap into students' natural curiosity. It enables them to ask their own questions, find their own answers, and explore the world around them. This approach to language learning and literacy, supported by a controlled grammar and skills syllabus, helps students achieve near-native fluency in English. Oxford Discover gives teachers the tools to develop children's 21st century skills, creating young thinkers with great futures. Use with Show and Tell as part of 9-level course.

The Jolly Phonics Workbooks are perfect for practising phonics skills. Covering the 42 letter sounds of English, these books provide a wealth of material for children to practise their reading and writing skills. Each sound is presented with a simple story and action, a letter formation guide and a section for writing practice.

Engaging exercises and fun activities allow children to apply their phonic knowledge in reading and spelling regular words, as well as some 'tricky' words with irregular spellings. Each of the seven books helps children develop their phonic skills further. Each of the seven books helps children develop their phonic skills further, moving from simply letter-sound recognition and letter formation early on to moving from simply letter-sound recognition and letter formation early on to reading sentences and writing short phrases in the later books. These refreshed editions are the same as the previous editions in terms of number of pages, pagination and core content, but have been enhanced with: * Alignment of the core teaching materials (specifically Pupil Book 1 and Step 1 of Jolly Phonics for the Whiteboard) so that they cover the same ground in the first term * 15% new material, alongside fresh new cover artwork, action icons and some new and updated images * New dotted font for writing practice, alongside improved letter formation guides and

sequencing of activities Also available individually.

Content and Language Integrated

Learning (CLIL) is an innovative approach referring to educational settings where a language different from the learners' mother tongue is used as a medium of instruction. This other language is found to be used from kindergarten to the tertiary level, and the extent of its use may range from occasional foreign language texts in individual subjects to covering the whole curriculum. The changes in the technological, economic and social realities of the modern world have led, and still lead, to more frequent contact between people of different linguistic and cultural backgrounds. Globalisation has made the world interconnected; the world is rapidly becoming a mixed global village where the role of languages is extremely important. In such an integrated world, integrated learning is viewed as a modern form of educational delivery. CLIL represents an increasingly popular approach to language teaching and learning not only in Europe, but also in other countries such as Japan, Malaysia, China, and the United Arab Emirates. Even though CLIL is not of a uniform nature and varies across the world, one of the main arguments for its introduction is that it creates conditions for naturalistic language learning. This book represents selected presentations given at the Ustroń CLIL 2013 conference, which brought together academicians, researchers, teachers and educational authorities from all over the world, and provided them with the opportunity to exchange an interdisciplinary dialogue on CLIL methodologies, as well as the purely practical consequences of implementing such pedagogies in institutional educational practices at the primary, secondary or tertiary level. As such, collection embraces original contributions across a range of areas of CLIL.
