In considering the pattern of emigration in the context of migration history, Choquette shows that, in many ways, the movement toward Canada occurred as a by-product of other, perennial movements, such as the rural exodus or interurban labor migrations. Overall, emigrants to Canada belonged to an outwardly turned and mobile sector of French society, and their migration took place during a phase of vigorous Atlantic expansion. They crossed the ocean to establish a subsistence economy and peasant society, traces of which lingered on into the twentieth century.

Writing in English, German, or French, more than 300 authors provide a historical description of the beginnings and of the early and subsequent development of thinking about language and languages within the relevant historical context. The gradually emerging institutions concerned with the study, organisation, documentation, and distribution are considered as well as those dealing with the utilisation of language related knowledge. Special emphasis has been placed on related disciplines, such as rhetoric, the philosophy of language, cognitive psychology, logic and neurological science.

This third selection of articles by Robert Feenstra complements

the two previously published, continuing his studies of doctrines of private law and of texts related to university teaching from the 13th century into the early modern period. In the section on private law, some pieces deal with the Middle Ages, while others focus on Hugo Grotius. Property is again an important topic, but this time joined by legal personality (foundations) and negligence (vicarious liability included). The studies on the history of texts are mainly concerned with works dating from the 14th and 15th centuries. One is devoted to a little-known civil law teacher at the University of Orléans and his commentary on a part of the Digest. The four others deal with treatises belonging to the so-called 'vulgarisation' of the 'droit savant' (medieval Roman and Canon law); most of these include important contributions to the history of early printing (incunabula and post-incunabula). Cette troisième sélection d'articles de Robert Feenstra complète les deux précédentes; elle constitue la suite de ses études sur les doctrines de droit privé et sur des textes se rapportant à l'enseignement universitaire du XIIIe jusqu'au XVIIIe siècle. Dans la section consacrée au droit privé, quelques articles s'occupent en premier lieu du moyen âge, d'autres focalisent sur Hugo Grotius. La propriété est de nouveau un sujet important, mais elle se trouve en compagnie de la personnalité juridique (notamment par rapport aux fondations) et de la responsabilité civile (y compris la responsabilité du fait d'autrui). Les études sur l'histoire des textes concernent surtout quelques ouvrages du XIVe et du XVe siècle. La première est consacrée à un professeur de droit civil peu connu de l'université d'Orléans et à son commentaire sur l'une des trois parties du Digeste. Les quatre autres s'occupent de traités appartenant à la "vulgarisation" du droit savant (droit romain et droit canonique au moyen

The day of 9 Thermidor (27 July 1794) is universally acknowledged as a major turning-point in the history of the French Revolution. At 12.00 midnight, Maximilien Robespierre, the most prominent member of the Committee of Public Safety which had for more than a year directed the Reign of Terror, was planning to destroy one of the most dangerous plots that the Revolution had faced. By 12.00 midnight at the close of the day, following a day of uncertainty, surprises, upsets and reverses, his world had been turned upside down. He was an outlaw, on the

run, and himself wanted for conspiracy against the Republic. He felt that his whole life and his Revolutionary career were drawing to an end. As indeed they were. He shot himself shortly afterwards. Half-dead, the guillotine finished him off in grisly fashion the next day. The Fall of Robespierre provides an hour-by-hour analysis of these 24 hours.

The Register of Laws of the Arabian Gulf offers a single, comprehensive source of key information in the field. No similar work exists in the English language. Drawing on original Arabic sources - invariably very difficult to find either individually or in series - this major loose-leaf work provides a complete database of all laws and regulations originating in each country of the Arabian Gulf.

Henri Pirenne (1862-1935) was a Belgian historian of international stature. He had an intellectual reputation that extended far beyond the borders of his own country. This book is not merely a writer's oeuvre. It is a life in pictures.
