"Biomedical Graduate School: A Planning Guide to the Admissions Process is an indispensable resource for college students aspiring to a PhD or MD-PhD. It helps students identify the structure of advanced degree programs and how these degrees can enhance their potential career options. The book discusses how students can optimize selection of academic courses, research experiences, and extracurricular activities during their undergraduate education to make them more competitive candidates for graduate and medical school programs. It guides students through the many facets of the admissions process, including criteria for selecting where to apply, how to prepare an application that maximizes their academic credentials, how to prepare for the interview process, how faculty evaluate applicants, and how to utilize a rational process to select a graduate school or medical school that will enable students to meet their academic goals." -- Back cover.

*Integrating Neuropsychological and Psychological Assessments* is a resource for neuropsychologists, psychologists, teachers and parents who wish to address both the neurologically- and emotionally-based difficulties with which their children are presenting. In addition to a thorough description of neuropsychological and psychological assessment tools, this book also provides professionals with a unified approach to using the results from assessments to understand and integrate cognitive, behavioral, social and emotional functioning in school-age children. It posits that to educate and treat children who are struggling in school due to unique cognitive or emotional vulnerabilities, the whole child must be considered to decipher their needs and implement interventions. Cultivating a therapeutic relationship that integrates the emotional and relational functioning of the child enhances both their learning and ability to successfully navigate the world.

A concise, up-to-date review of school neuropsychological assessment that covers effective treatment planning The third edition of *Essentials of School Neuropsychological Assessment* offers a practical and concise overview of neuropsychological practice in schools and other pediatric clinical settings and clearly explains how to identify the need for testing. The book shows how to collect a neurodevelopmental history, choose appropriate assessment instruments, effectively evaluate students, and accurately interpret results. The third edition has been revised and updated to include the most recent advances in the field such as major neuropsychological test batteries for children, including NEPSY-II, Wechsler Intelligence Scale for Children, Fifth Edition integrated, and Delis-Kaplan Executive Function System. In addition, the new edition contains updated online tools, including sample case studies, searchable databases of neuropsychological tests classified by processing area and conceptual model, a neuropsychological processing concerns checklist in both English and Spanish, and sample report shells with tables. Like all the volumes in the *Essentials of Psychological Assessment* series, this book is designed to help busy practitioners and school psychologists quickly acquire the knowledge and skills they need to make optimal use of major psychological assessment instruments. Each concise chapter features numerous callout boxes highlighting key concepts, bulleted points, and extensive illustrative material, as well as test questions that help you gauge and reinforce your grasp of the information covered. *Essentials of School Neuropsychological Assessment, Third Edition* contains unmatched guidance and direction for school psychologists and other mental health professionals who serve educators, school children, and their families.
