*Syncrisis: the Dynamics of Health* Nova Publishers  
Proceedings of the 13th International Conference on Intellectual  
Capital Knowledge Management & Organisational Learning held  
at Ithaca College, NY, USA on 16-17 Septemeber 2016  
Adaptive Instructional Systems. Design and Evaluation WIPO  
The present volume contains the texts of 18 lectures delivered in  
April, 1980, at a Workshop on the Effective Use of the Industrial  
Property System for the Benefit of Inventors, Industry and  
Commerce in the Asian and Pacific Region. It also contains the

texts of the three opening speeches, the report of the workshop,  
including its conclusions and recommendations, and the list of  
participants.

*Effects of Globalization on Education Systems and Development*  
A&C Black

In the first decade of the twenty-first century, the biggest event  
of worldwide proportion was the 2008 global financial crisis,  
which was caused primarily by ineffective governance, failed  
surveillance systems, and implementation flaws. While fiscal and  
monetary policies succeeded in pulling many countries out of a  
financial freefall, most economies have performed beneath pre-  
recession levels as governments continued to struggle with their  
finances. Examining the financial crisis from the viewpoint of

intangible assets provides a different perspective from traditional economic approaches. National Intellectual Capital (NIC), comprised mainly of human capital, market capital, process capital, renewal capital, and financial capital, is a valuable intangible asset and a key source of national competitive advantage in today's knowledge economy. The authors—pioneers in the field—present extensive data and a rigorous conceptual framework to analyze the connections between the global financial crisis and NIC development. Covering the period from 2005 to 2010 across 48 countries, the authors establish a positive correlation between NIC and GDP per capita and consider the impact of NIC investment for short-term recovery and long-term risk control and strategy formulation. Each volume in a series of SpringerBriefs on NIC and the financial crisis provides in-depth coverage of the impact of the crisis, the aftermath, future prospects, and policy implications for a regional cluster. This volume focuses on Indonesia, Malaysia, The Philippines, and Thailand.

Strategy Planning Matrices for the Medium-term Philippine Development Plan, 2004-2010 Policy Press

School improvement is at the centre of educational reform and is perceived by many as a key to social and economic advance. It contributes to determining the personal fulfilment and career paths of individual students and consequently engages the interest of parents and community members. It is an ever-present commitment of teachers and managers in schools. Policy makers and politicians at international, national and local levels devote much time and effort to their search for better schools. School improvement has also attracted the attention of

researchers and scholars in many countries. They have been drawn from various disciplines and fields within the educational studies community, including psychology, sociology, history, evaluation, and studies in curriculum and assessment. There is now an established body of findings from studies conducted in many contexts. This book brings together leading experts drawn from many countries and several continents, reflecting diverse approaches to educational policy and practice, evaluation and research. Variations between countries and between local communities within countries are highlighted. The possibilities and difficulties inherent in transferring evidence from one educational system, at a number of levels, to another are clearly discussed. What emerges from the cross-national and cross-cultural evidence are several significant threads, currently under active investigation, including: school structure and management, classroom organisation, school leadership, teacher training and staff development, curriculum and assessment, community involvement, lifelong learning and special provision for students with special educational needs. "School Improvement: International Perspectives" is written for national educational policy makers, teachers and student teachers, governing bodies and parents from various levels of schooling, and university researchers and scholars.

Educational Innovation in the Philippines Springer

Why has English language proficiency in Japan remained so low in comparison to other Asian countries? Has Vietnam attempted to improve English language teaching because ASEAN has adopted English as its working language? Why do English language teachers struggle with curriculum changes imposed by

governments in order to make them competitive in the international community? Do professional development (PD) programs actually meet the needs of teachers? This book addresses issues surrounding these questions by examining how the Japanese and Vietnamese governments have approached and defined the PD of English language teachers and how such PD programs have been delivered. It further analyses the impact of policy changes on individual teachers and explores how PD can help teachers to implement such changes effectively at the micro-level. PD of language teachers or language teacher education is relatively new as a field of inquiry in Applied Linguistics. By including case studies of Japan and Vietnam in the one volume, this book embarks on the challenging task of demonstrating that PD is an essential element of the successful implementation of language policies in Asia, where World Englishes have been shaped by distinct local contexts.

### **How Chinese Teach Mathematics and Improve Teaching**

World Bank Publications

Working towards the 2015 millennium development goals, this global report marks the midterm point and provides a rich evidence-based assessment of the provision of education on a global scale. Based on specialized commissions, extensive consultations and multiple research sources, the report provides an authoritative, comparative reference.

### Curriculum Planning for Better School Revised Ed. IIED

'Decentralization in Client Countries' assesses the effectiveness of Bank support for decentralization between fiscal years 1990 and 2007 in 20 countries, seeking to inform the design and implementation of future support. Given the difficulties of

measuring the results of decentralization, the evaluation uses intermediate outcome indicators- such as strengthened legal and regulatory frameworks for intergovernmental relations, improved administrative capacity, and increased accountability of subnational governments and functionaries to higher levels of government and to local citizens- to assess the results of Bank support in these 20 cases. To examine potential lessons at a sectoral level, the evaluation also assesses whether Bank support for decentralization improved intermediate outcomes for service delivery in the education sector in 6 of the 20 countries.

*National Intellectual Capital and the Financial Crisis in Indonesia, Malaysia, The Philippines, and Thailand* Anvil Publishing, Inc.

Bringing together the voices of local scholars in the Philippines, this book offers critical insights into one of the world's most disaster-prone regions. The Asia-Pacific region is one of the most vulnerable regions in the world, with the effects of climate change contributing to rising sea levels and increasingly frequent typhoons and floods. Case studies in this book examine such disasters, including the aftermath of 2013 super typhoon Haiyan. Discussions are centered around four themes: women and empowerment, economics and recovery, community and resilience, and religion and spirituality. Through its analysis, the book demonstrates the scopes, inequities, and inefficiencies of policies and responses, as well as forms of empowerment and resilience, in meeting challenges in disaster-afflicted communities in the Philippines. Its conclusions provide a more nuanced and grounded perspective of policies, practices, and approaches in the sociology of disasters today.

**Resources in Education** Routledge

This book examines the conceptual foundations of the participatory approach to local development, assesses the evidence of its efficacy, and draws key lessons for policy.

**UNESCO Efforts in Assisting the Community School Toward Maturity** Springer

*At the Crossroads of Church and World* is a deeply inspiring memoir about Fr. Bienvenido Nebres and his unwavering love for the country he serves. He takes us through the formative years of his childhood and his education, through the harrowing Martial Law years as he played a pivotal role in the revolution and rebuilding of a wounded nation. His quest to close the poverty gap in the Philippines by way of education guided him through his years as the Ateneo de Manila University president and led him to the honor of a National Scientist award.

**Professional Development of English Language Teachers in Asia** Goodwill Trading Co., Inc.

With its comprehensive coverage and quality this provocative book is concerned with the future of developing countries in Africa, Asia and Latin America. By providing in-depth analysis of the economic, social and educational challenges of emerging states it offers an alternative roadmap to development. The authors in this collection substantiate the notion that emerging states often do not participate in policy choices related to their development when faced with universalization of curriculum and internationalization of education. The authors make explicit the direct and indirect effects of globalization on educational systems, social equity, and the path of development. In demonstrating the impact of neoliberalism or market-based reforms on the developing world, the authors show that

education without human rights is vulnerable to negative forces of globalization and internationalization. The message of the book is quite pessimistic about possibilities to widen the economic space or increase freedom, unless development cooperation is made possible by “Helping People Help Themselves” as suggested by David Ellerman. The authors note that in the past, the issue of emerging states as an appendage to the world economy was a fundamental question related to colonialism, but now has become a question of imperialism which needs to be examined when considering the current patterns of development.

**Index to Philippine Periodicals** Academic Conferences and publishing limited

This open access book presents contemporary perspectives on the role of a learning society from the lens of leading practitioners, experts from universities, governments, and industry leaders. The think pieces argue for a learning society as a major driver of change with far-reaching influence on learning to serve the needs of economies and societies. The book is a testimonial to the importance of ‘learning communities.’ It highlights the pivotal role that can be played by non-traditional actors such as city and urban planners, citizens, transport professionals, and technology companies. This collection seeks to contribute to the discourse on strengthening the fabric of a learning society crucial for future economic and social development, particularly in the aftermath of the coronavirus disease.

**ICICKM 2016 - Proceeding of the 13th International Conference on Intellectual Capital Knowledge Management & Organisational Learning** Springer Nature

This volume addresses the question: to what extent and under what conditions does international migration contribute to local and national development?

School Improvement Through Drama Rex Bookstore, Inc.

*How Chinese Teach Mathematics and Improve Teaching* builds upon existing studies to examine mathematics classroom instruction in China. It combines contributions from Chinese scholars with commentary from key Western scholars to offer a truly systematic examination of some important and distinctive features of mathematics classroom instruction. Viewing classroom instruction as part of teachers' instructional practices, this book goes beyond teachers' in-classroom instructional practice by also examining Chinese teachers' approaches and practices in developing and improving teaching. Through this unique approach, *How Chinese Teach Mathematics and Improve Teaching* expands and unpacks the otherwise fragmented knowledge about Chinese practices in developing and carrying out mathematics classroom instruction.

**Education for All Global Monitoring Report 2008** Oxford University Press, USA

This two-volume set LNCS 12792 and 12793 constitutes the refereed proceedings of the Third International Conference on Adaptive Instructional Systems, AIS 2021, held as Part of the 23rd International Conference, HCI International 2021, which took place in July 2021. Due to COVID-19 pandemic the conference was held virtually. The total of 1276 papers and 241 posters

included in the 39 HCII 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions. The papers of AIS 2021, Part I, are organized in topical sections named: Conceptual Models and Instructional Approaches for AIS; Designing and Developing AIS; Evaluation of AIS; Adaptation Strategies and Methods in AIS. Chapter "Personalized Mastery Learning Ecosystems: Using Bloom's Four Objects of Change to Drive Learning in Adaptive Instructional Systems" is available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](http://link.springer.com).

Four-year Development Plan, FY 1974-77 Springer Nature

Patrice Baldwin gives an overview of the way drama links to learning, teaching and the curriculum. It will help those who need to connect with the rationale for drama in and across the curriculum and who need to plan for it and explain it to others in terms of its necessity and impact. The book offers guidance that will facilitate schools' work on self-evaluation, preparing for Ofsted, drawing up school development plans and drama policies. With exemplar lessons for each of the year groups across KS1-KS3, this is a highly practical book that has something to offer all who work in or with primary and secondary schools.
