#### Vocabulary Is Comprehension Univ of Wisconsin Press

This volume seeks to guide students in religious or literary studies or other interested readers toward understanding and appreciation of biblical prophetic poetry. Each of the three sections of the book includes a chapter examining one of the literary features with brief examples from prophetic texts, followed by another chapter of applied criticism of a full prophetic poem (Joel 2 on parallelism, Jeremiah 4 on voice, and

Isaiah 24 on design). Among the distinct features of the book are diagrams of parallel lines, promoting two-dimensional, “binocular” reading of the poems. Of all the literature of the Bible, prophetic poetry has probably been least accessible to the modern reader.

Language is dense, images are obscure, and logical development of ideas seems almost inaccessible. Reading Prophetic Poetry seeks to help readers appreciate the luminous beauty of the language and the austere power and surprising relevance of the ideas in these relatively obscure biblical texts. It introduces an accessible approach to prophetic poetry which invites readers to turn to the biblical texts on their own with new ideas for appreciating the riches of these ancient poems.

This book challenges the belief in the purely linguistic nature of contemporary poetry and offers an interpretation of late twentieth-century Russian poetry as a testimony to the unforeseen annulment of communist reality and its overnight displacement by a completely unfathomable post-totalitarian order. Alben Lutzkanova-Vassileva argues that, because of the sudden invalidation of a reality that had been largely seen as unattained and everlasting, this shift remained secluded from the mind and totally resistant to cognition, thus causing a collectively traumatic psychological experience. The book proceeds by inquiring into a school of contemporary American poetry that has

been likewise read as cut off from reality. Executing a comparative analysis, Vassileva advances a new understanding of this poetry as a testimony to the overwhelming and traumatic impact of contemporary media, which have assailed the mind with far more signals than it can register, digest and furnish with semantic weight.

How Poems Think Andrews UK Limited  
Reginald Gibbons collects here a lifetime's worth of thoughts on composing and translating poetry. Not a manifesto or a general theory of the lyric, rather, the book explores how a poem thinks: that is, what results from the circumstances of a poet's native language, choice of words and topics, the mentality that the poet shares with other writers, and the

range of poetic possibilities (and limitations) in a given language. Through exemplary case studies taken from his own experience in writing poetry, as well as in translating poetry from languages ranging from Sophocles's and Pindar's ancient Greek to their contemporary French, Italian, Portuguese, Russian, and Spanish successors, Gibbons traces the curious persistence of classical modes and images into the twenty-first century. He shows how the very language used in composing a poem, be it ancient Greek, Renaissance English, or contemporary Russian, both limits and enables how a poet thinks and what the poet can say. Even in describing difficult poetic concepts and operations, Gibbons writes in a clear, companionable style, entirely accessible not just to practicing poets,

but also to general readers interested in poetry, and to writers of various stripes interested in the way our native language can often circumscribe what and how we think poetically, and affect how we compose poetry and prose.
