The analyses of German and Brazilian cultures found in this book offer a much-needed rethinking of the intercultural paradigm for the humanities and literary and cultural studies. This collection

examines cultural interactions between Germany and Brazil from the Early Modern period to the present day, especially how authors, artists and other intellectuals address the development of society, intervene in the construction and transformation of cultural identities, and observe the introduction of differing cultural elements in and beyond the limits of the nation. The contributors

represent various academic disciplines, including German Studies, Luso-Afro-Brazilian Studies, Cultural Studies, Linguistics, Art History and the social sciences. Their essays cover a wide range of works and media, and the issues they address are relevant not only for each of the scholarly disciplines involved, but also in discussions of current cultural practices in connection to all forms of media. The collection thus serves as a model for further intercultural research, since it calls into question the very terms through which we understand the relationships between cultures, as well as their products, practices, and perspectives.

Carefully piecing together the personal letters of Alice 'Liesel' Schwab, Escaping Nazi Germany tells the important story of one woman's emigration from Heilbronn to England. From the decision to leave her family and emigrate alone, to gaining her independence as a shop worker and surviving the Blitz, to the reunion with her brother and parents in England and shared grief as they learn about the fate of family members who died in the Holocaust, her story provides powerful insight into both the everyday realities of German-Jewish refugees in Britain and the ability of letters and life-writing to create transnational networks during times of trauma and separation. Elegantly written and deeply researched,

Joachim Schlör's emphatic and unflinching re-telling of Alice Schwab's life sheds new light on the Jewish experience of persecution during the Holocaust and adds nuances to current debates on emigration, memory, and identity. This book is an essential primary resource for scholars of modern European history and Jewish studies, offering a compelling and intimate route into understanding what it meant to be a Jewish refugee caught up in the tragic and tumultuous events of World War II.

Using Germany as a national case study, this volume examines the historical genesis of precarity, its evolution from 19th-century industrial modernity to the present, and its reflections and

reconfigurations in artistic production, in particular with relation to work, gender, and sexuality. "Precarity is everywhere now," sociologist Pierre Bourdieu declared almost thirty years ago. Not only declining middle-class standards of living, but also debt, drug addiction, housing and food insecurity, depression, and "deaths of despair" are now being recognized as symptoms of the downward pull of social precarity. Although these and similar ills have been attributed to neoliberal policies of deregulation, privatization, and willful neglect of the common good, precarization has accompanied the booms and busts of industrial modernity from its beginnings. Representing Social Precarity in German Literature and Film explores how German and Austrian

literature, film, and social history have engaged with social precarity, from the period of Romanticism and early industrialization to the present. The chapters in this volume deal with precarity as both an objective phenomenon reflected in literary and filmic representations and as a subjective phenomenon that gives these representations their particular shape. Representing Social Precarity in German Literature and Film opens new critical perspectives on diverse forms of lived precarity and their creative manifestations by reflecting on the history of capitalist modernity from the vantage points of weakness, vulnerability, marginality, impoverishment, and otherness.

Asia Minor under Rome was one of the wealthiest and most developed parts of the Empire, but there have been few modern studies of its economics. The twelve papers in this book, by an international team of scholars, work from literary texts, inscriptions, coinage and archaeology. They study the direct impact of Roman rule; the organisation of large agricultural estates; changing patterns of olive production; threats to rural prosperity from pests and the animal world; inter-regional trade in the Black Sea; the significance of civic market buildings; the economic role of temples and sanctuaries; the

contribution of private benefactors to civic finances; monetization in the third century AD, and the effect of transitory populations on local economic activity. *Pamphlets Pertaining to Education* CRC Press

Photoproduction of pions from complex nuclei has become an investigative tool for (1) the detailed form of the elementary photopion amplitude, (2) the pion-nucleus optical potential, (3) nuclear structure, and (4) off-shell and medium effects on the elementary amplitude in nuclear processes. In this book, all these aspects are considered in detail. With improved experimental accuracy and beam technology the study of nuclear pion photoproduction will break new ground and become an even more powerful investigative tool.

This monograph is intended as an introductory guide as well as a reference manual for graduate students and researchers working in this important area of physics.
