[A World of Excesses](#) IGI Global

Love in the Post (2013) is inspired by Jacques Derrida's book The Post Card. Like the book, the film plays with fact and fiction, weaving together the stories of a scholar of literature and a film director, alongside insights from critics and philosophers. Theo Marks works in a university department that is soon to be closed. His wife Sophie, enigmatic and distant, is in analysis. Filmmaker Joanna struggles to make a film about The Post Card. These people are set on a collision course prompted by a series of letters that will change their lives. The film features a never before seen interview with Derrida, alongside contributions from Geoff Bennington, Ellen Burt, Catherin Malabou, J. Hillis Miller and Samuel Weber. Alongside the original screenplay, Martin McQuillan provides an extended commentary on Derrida's original text, the film and its making. Joanna Callaghan reflects on her practice as a filmmaker and her engagement with philosophy as a director. The volume concludes with interviews between McQuillan and five leading Derrida scholars.

The Theory and Practice of Online Learning Routledge

This book explores gaming culture, focusing on competent players and excessive use. Addressing the contested question of whether addiction is

possible in relation to computer games - specifically online gaming - A World of Excesses demonstrates that excessive playing does not necessarily have detrimental effects, and that there are important contextual elements that influence what consequences playing has for the players. Based on new empirical studies, including in-depth interviews and virtual ethnography, and drawing on material from international game related sites, this book examines the reasons for which gaming can occupy such a central place in people's lives, to the point of excess. As such, it will be of interest to sociologists and psychologists working in the fields of cultural and media studies, the sociology of leisure, information technology and addiction.

Ways of Learning McFarland

As computers are increasingly integrated into the classroom, instructors must address a number of pressing ethical questions regarding online behavior, course design, cyberbullying, and student cyber behavior. Ethical Technology Use, Policy, and Reactions in Educational Settings provides state-of-the-art research on the impact of ethical computer use in academia and emphasizes the cyberphilosophical aspects of human-computer interactions. It provides significant analysis of the ethical use of educational Internet and computer applications.

Are Libraries Obsolete? Kogan Page Publishers

What kind of a leader do you want to become? The role of business schools in developing future managers and leaders has long been scrutinised and

critiqued. This has been exacerbated by the recent financial crisis and many books have been written that condemn business schools for producing leaders who graduate without the ability to respond to the changing world around them, innovate, or act in a responsible way. By way of remedy this provocative book takes the critique and debate further, proposing a number of ethical and spiritual resources including Heiggarian philosophy, classical Greek philosophy, and the Maori notion of wairua. It explores existing teaching practices and suggests ways that business schools can: Encourage a greater understanding of different world views Introduce different perspectives such as the arts, philosophy and spirituality Encourage the practice of responsible and ethical leadership Nurture innovation and creativity. *Developing Leadership* is accompanied by filmed seminars exploring the central debates, and interviews with the expert team of contributors. 'A rare thing, this book gives more than the label promises. The title is about "questions", yet each chapter gives us answers to why important issues are not addressed in business schools – and what to do about it. This is a manifesto for reform, and the next big question is what will you, reader, do about it?' - Professor Jonathan Gosling, Director, Centre for Leadership Studies, University of Exeter, UK, and Distinguished Visiting Professor of Leadership Development, INSEAD, France

"It is better to be feared than loved, if you cannot be both." *The Prince*, written by Niccolò Machiavelli, is a groundbreaking work in the genre of political philosophy, first published in 1532. It offers a direct and unflinching examination of power and leadership, challenging conventional notions of morality and ethics in governance. This work will leave you questioning the true nature of authority and political strategy. Machiavelli's prose captures the very essence of human ambition, forcing readers to grapple with the harsh realities of leadership. This is not just a historical treatise, but a blueprint for navigating the political power structures of any era. If you're seeking a deeper understanding of political leadership and the dynamics of influence, this book is for you. Sneak Peek "Since love and fear can hardly exist together, if we must choose between them, it is far safer to be feared than loved." In *The Prince*, Machiavelli draws on historical examples and his own diplomatic experience to lay out a stark vision of what it takes to seize and maintain power. From the ruthlessness of Cesare Borgia to the political maneuvering of Italian city-states, Machiavelli outlines how a leader must be prepared to act against virtue when necessary. Every decision is a gamble, and success depends on mastering the balance between cunning and force. Synopsis The story of *The Prince* delves into the often brutal realities of ruling. Machiavelli provides rulers with a pragmatic guide for gaining and sustaining power, asserting that the ends justify the means. The book is not just a reflection on how power was wielded in Renaissance Italy but a timeless manual that offers insight into political consulting, political history, and current political issues. Its relevance has endured for centuries, influencing leaders and thinkers alike. Machiavelli emphasizes that effective rulers must learn how to adapt, deceive, and act decisively in pursuit of their goals. This stunning, classic literature reprint of *The Prince* offers unaltered preservation of the original text, providing you with an authentic experience as Machiavelli intended. It's an ideal gift for anyone passionate about political science books or those eager to dive into the intricacies of power and leadership. Add this thought-provoking masterpiece to your collection, or give it to a loved one who enjoys the best political books. *The Prince* is more than just a book – it's a legacy. Grab Your Copy Now and get ready to command power like a true Prince. Title Details Original 1532 text Political Philosophy Historical Context

Learning technology is now an integral part of all learning and development activity. Understanding what these technologies are, how they work and their aims is key to successful L&D practice. *Learning Technology* is written by a leading voice in the learning tech industry. It explains the history of learning tech, its aims and how it is the fundamental technology that has driven learning, culture and progress. This book covers everything from writing to printing, broadcast media, teaching technology as well as detailed discussion of learning management systems (LMSs), learning experience platforms (LXPs) and learning record stores (LRSs). It also highlights the importance of data and analytics and covers the latest developments in the learning technology space including artificial intelligence, virtual reality and the metaverse. *Learning Technology* helps L&D professionals assess and better understand learning platforms and teaching technologies, both past and present. It supports this by evaluating the benefits of each technology. It also provides insights into the future of work and learning and offers a comprehensive overview and detailed exploration of the topic.

How do children learn about the expression and meaning of emotions – both happy and sad? This book answers questions regarding the foundation of emotional intelligence, and examines how children become emotionally literate as they are socialised into their family environment from birth to 2 years of age. These early stages are vitally important in teaching children to understand themselves and others, as well as how to relate to people, and how to adapt to and cope with their immediate surroundings. In order to examine the development of emotional intelligence, the author presents an overview of the literature on the subject and in the second part of the book presents a case study in which the concepts introduced in the first part of the book are revisited. Based on daily tape-recorded 'conversations' between a baby and her father, the data demonstrate how, over a two-year period, the child learns to express and understand emotions within social interactions. This capacity to reason with emotions is examined through four areas: perceiving emotion, integrating emotion, understanding emotion and managing emotion. *The Development of Emotional Intelligence* adds a new perspective to the theoretical debate on emotions and how they develop. It will be of great interest to psychologists and any professionals dealing with families. It will also be helpful reading for parents.

[The Realist](#) Routledge

"This book provides ethical insight into the world of e-learning through case studies that elucidate the issues through real-world examples"--Provided by publisher.

[Higher Education in the Digital Age](#) Routledge

Leadership and Coherence investigates how leaders justify their decisions, and how they bring about coherence amongst followers. Taking a cognitive approach, it builds on the work of Hannah Arendt to attempt a phenomenology of judgment, examining how the moral imperative experienced by leaders can be shared by their community so both leader and led are guided by a mutual purpose. Through biographical case studies of historical leaders, this book illustrates how successful leaders operate in a turbulent world, not only making their own decisions but also gathering likeminded followers to share in a common vision and shared sense of purpose.

Doing English in Asia: Global Literature and Culture examines the effect of globalization on the curriculum of Asian universities. As knowledge of the English language has increasingly been understood as necessary to excel in international business, a number of Asian universities have replaced the traditional study of English literature and culture with applied English or English for specified purposes. This edited collection tackles the question of how to teach English language and culture through literature in case studies from practitioners all across Asia. Contributors thus balance the need for students to understand the interface between English cultures and their own with the pressure to prepare them for employment in this changing environment.

[Developing Leadership](#) IGI Global

This book, written by two nationally renowned scholars in the area of ethics in higher education, is intended to help teachers and administrators understand and handle problems of academic dishonesty. Chock-full of practical advice, the book is divided into three parts. Part I reviews the existing published literature about academic dishonesty among college and university students and how faculty members respond to the problem. Part II presents practical advice designed to help college and university instructors and administrators deal proactively and effectively with academic dishonesty. Part III considers the broader question of academic integrity as a system-wide issue within institutions of higher education.

[An Introduction to Plato's Republic](#) Psychology Press

This book constitutes the refereed proceedings of the 12th European Conference on Machine Learning, ECML 2001, held in Freiburg, Germany, in September 2001. The 50 revised full papers presented together with four invited contributions were carefully reviewed and selected from a total of 140 submissions. Among the topics covered are classifier systems, naive-Bayes classification, rule learning, decision tree-based classification, Web mining, equation discovery, inductive logic programming, text categorization, agent learning, backpropagation, reinforcement learning, sequence prediction, sequential decisions, classification learning, sampling, and semi-supervised learning.

[Carpe Mañana](#) IGI Global

The digital age has transformed information access in ways that few ever dreamed. But the afterglow of our digital wonders has left libraries reeling as they are no longer the chief contender in information delivery. The author gives both sides--the web aficionados, some of them unhinged, and the traditional librarians, some blinkered--a fair hearing but misconceptions abound. Internet be-all and end-all enthusiasts are no more useful than librarians who urge fellow professionals to be all things to all people. The American Library Association, wildly democratic at its best and worst, appears schizophrenic on the issue, unhelpfully. "My effort here," says the author, "is to talk about the elephant in the room." Are libraries obsolete? No! concludes the author (also). The book explores how libraries and librarians must and certainly can continue to be relevant, vibrant and enduring.

[Web 2.0 for Schools](#) Random House Australia

This book provides research assistance for 99 current and provocative issues students can use to write a brief argumentative paper. In 2030, it is projected that 65 percent of the population will be over 65. The U.S. Government Census Bureau reveals that over an adult's working life, college graduates typically earn close to \$1 million more than high school graduates. About 43 percent of American families spend more than they earn each year. These three factoids represent a tiny fraction of the potential research subjects contained in *99 Jumpstarts to Research: Topic Guides for Finding Information on Current Issues*, Second Edition, a completely revised follow-up to the original edition. Every jumpstart—each focused upon a current, timely issue—contains ideas for narrowing the topic, research keywords, suggested best books and databases, and Internet sites. This book supports both faculty and students in identifying compelling topics, effectively evaluating and selecting resources in today's information-overload world, and deriving enjoyment from the research and writing process.

[The Development of Emotional Intelligence](#) Hachette UK

How online learning could help control the exploding cost of higher education Two of the most visible and important trends in higher education today are its exploding costs and the rapid expansion of online learning. Could the growth in online courses slow the rising cost of college and help solve the crisis of affordability? In this short and incisive book, William G. Bowen, one of the foremost experts on the intersection of education and economics, explains why, despite his earlier skepticism, he now believes technology has the potential to help rein in costs without negatively affecting student learning. As a former president of Princeton University, an economist, and author of many books on education, including the acclaimed bestseller *The Shape of the River*, Bowen speaks with unique expertise on the subject. Surveying the dizzying array of new technology-based teaching and learning initiatives, including the highly publicized emergence of "massive open online courses" (MOOCs), Bowen argues that such technologies could transform traditional higher education—allowing it at last to curb rising costs by increasing productivity, while preserving quality and protecting core values. But the challenges, which are organizational and philosophical as much as technological, are daunting. They include providing hard evidence of whether online education is cost-effective in various settings, rethinking the governance and decision-making structures of higher education, and developing customizable technological platforms. Yet, Bowen remains optimistic that the potential payoff is great. Based on the 2012 Tanner Lectures on Human Values, delivered at Stanford University, the book includes responses from Stanford president John Hennessy, Harvard University psychologist Howard Gardner, Columbia University literature professor Andrew Delbanco, and Coursera cofounder Daphne Koller.

[The Best 381 Colleges, 2017 Edition](#) Princeton University Press

Challenging Formalization in Education and Beyond addresses the effects of today's attempts to organize knowledge, processes, and performance in education, particularly in its ever-growing digital environments. As on-site, blended, and fully online learning become deeply interdependent, secondary and higher education managers and instructors who seek to integrate, apply, and teach within these formats using standardized rules, assessments, algorithms, and accountability structures may be doing unintended harm to their students. Focusing on students' performance, health, cognition, behavior, and learning outcomes, this book analyses how current trends, methods, and policies in formalization can be challenged and corrected to ensure high-quality education. Scholars, educators, administrators, and designers of traditional, asynchronous, precision, automated, and micro-learning formats will come away with new insights and pragmatic solutions for engaging students in more active, participatory, and creative activities.

Challenging Formalization in Education and Beyond Princeton Review

How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of *The Adult Learner* has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of *The Adult Learner* will provide basic instructor aids including a PowerPoint presentation for each chapter. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

Love in the Post: From Plato to Derrida Rowman & Littlefield

Whilst most teachers are skilled in providing opportunities for the progression of children's learning, it is often without fully understanding the theory

behind it. With greater insight into what is currently known about the processes of learning and about individual learning preferences, teachers are better equipped to provide effective experiences and situations which are more likely to lead to lasting attainment. Now fully updated, *Ways of Learning* seeks to provide an understanding of the ways in which learning takes place, which teachers can make use of in their planning and teaching, including: An overview of learning Behaviourism and the beginning of theory Cognitive and constructivist learning Multiple intelligences Learning styles Difficulties with learning The influence of neuro-psychology Relating theory to practice The third edition of this book includes developments in areas covered in the first and second editions, as well as expanding on certain topics to bring about a wider perspective; most noticeably a newly updated and fully expanded chapter on the influence of neuro-educational research. The book also reflects changes in government policy and is closely related to new developments in practice. Written for trainee teachers, serving teachers, and others interested in learning for various reasons, *Ways of Learning* serves as a valuable introduction for students setting out on higher degree work who are in need of an introduction to the topic.

The World Book Encyclopedia Zondervan

Cheating Lessons is a guide to tackling academic dishonesty at its roots. James Lang analyzes the features of course design and classroom practice that create cheating opportunities, and empowers teachers to build more effective learning environments. Instructors who curb academic dishonesty become better educators in other ways as well.
