## NAVARRO RODGERS

### Revista do Arquivo Municipal de São Paulo Editions Héritage

In Cameroon, a monumental "statue of liberty" is made from scrap metal. In Congo, a thriving popular music incorporates piercing screams and carnal dances. When these and other instantiations of the aesthetics of Africa and its diasporas are taken into account, how are ideas of beauty reconfigured? Scholars and artists take up that question in this invigorating, lavishly illustrated collection, which includes more than one

hundred color images. Exploring sculpture, music, fiction, food, photography, fashion, and urban design, the contributors engage with and depart from canonical aesthetic theories as they demonstrate that beauty cannot be understood apart from ugliness. Highlighting how ideas of beauty are manifest and how they mutate, travel, and combine across time and distance, continental and diasporic writers examine the work of a Senegalese sculptor inspired by Leni Riefenstahl's photographs of Nuba warriors; a rich Afro-Brazilian aesthetic incorporating aspects of African, Jamaican, and American cultures; and African Americans' Africanization of the Santería movement in the United States. They consider the fraught, intricate spaces of

the urban landscape in postcolonial South Africa; the intense pleasures of eating on Réunion; and the shockingly graphic images on painted plywood boards advertising "morality" plays along the streets of Ghana. And they analyze the increasingly ritualized wedding feasts in Cameroon as well as the limits of an explicitly "African" aesthetics. Two short stories by the Mozambican writer Mia Couto gesture toward what beauty might be in the context of political failure and postcolonial disillusionment. Together the essays suggest that beauty is in some sense future-oriented and that taking beauty in Africa and its diasporas seriously is a way of rekindling hope. Contributors. From fish soup to caipirinha, the culinary traditions of Rio de Janeiro come alive in this rich and sumptuous tour of its people and the foods they cook, eat, love, and enjoy. In the last four centuries of its history, the inhabitants of Rio de Janeiro created a lifestyle that is unique and has been much admired since the very first travelers published their impressions in the sixteenth century. Indeed, this international hot spot welcomes approximately 1.8 million tourists every year who come to the city to visit, to work, to study, and to eat. It was and it is a place of cultural and artistic creativity, and it has largely kept concealed one of its most interesting cultural traits: its food. Rio de Janeiro: A Food Biography unveils the high quality and variety of Rio's fresh produce, the special dishes served in parties or at home, and the very traditional ones inherited from the immigrants who made the culture of the city as varied as its food. Starting with a history of the city and its native plants and animals, Marcia Zoladz offers a rich and sumptuous tour of the culture, the people, and the foods they cook, dine on, love, and enjoy. From fish soup to caipirinha, the culinary traditions come alive through an exploration of the festivals, the people, the places, and the hot-spots that continue to draw people from around the world to this world-class destination.

Depuis l'Antiquité, et aujourd'hui encore, les mathématiques sont, à bien des égards, essentielles pour qui veut comprendre la nature des choses. Est-il possible de pénétrer le monde mathématique sans études longues et arides ? Oui. Car ce qui importe, ce n'est pas de maîtriser cette science en profondeur, mais de comprendre comment l'esprit humain, et plus particulièrement le cerveau du mathématicien, se mesure à la réalité mathématique. Un livre à la fois impertinent et distrayant, qui offre un voyage au cœur du monde des mathématiques et donne des aperçus très personnels sur quelques-uns des penseurs qui l'ont exploré. David Ruelle, auteur de *Hasard et Chaos*, est membre de l'Académie des sciences et professeur de physique théorique à l'Institut des hautes études scientifiques de Bures-sur-Yvette. Ses travaux en physique mathématique, sur la théorie du chaos et sur les systèmes dynamiques lui ont valu une notoriété internationale.
