While progress has been made in increasing female labor force participation (FLFP) in the last 20 years, large gaps remain. The latest Fund research shows that improving gender diversity can result in larger economic gains than previously thought. Indeed, gender diversity brings benefits all its own. Women bring new skills to the workplace. This may reflect social norms and their impact on upbringing and social interactions, or underlying

differences in risk preference and response to incentives for example. As such, there is an economic benefit from diversity, that is from bringing women into the labor force, over and above the benefit resulting from more (male) workers. The study finds that male and female labor are imperfect substitutes in production, and therefore gender differences in the labor force matter. The results also imply that standard models, which ignore such differences, understate the favorable impact of gender inclusion on growth, and misattribute to technology a part of growth that is actually caused by women's participation. The study further suggests that narrowing gender gaps benefits both men and women, because of a boost to male wages from higher FLFP. The paper also examines the role of women in the process of sectoral reallocation from traditional agriculture to services and the resulting effect on productivity and growth. Because FLFP is relatively high in services, sectoral reallocation along development paths serves to boost gender parity and productivity.

The present volume contains many of the papers presented at a four-day conference held by the Husserl-Archives in Leuven in April 2009 to commemorate the one hundred and fortieth anniversary of Edmund Husserl's birth. The conference was organized to facilitate the critical evaluation of Husserl's philosophical project from various perspectives and in light of the current philosophical and scientific climate. Still today, the characteristic tension between Husserl's concrete and detailed descriptions of consciousness, on the one hand, and his radical philosophical claim to ultimate truth and certainty in thinking, feeling, and acting, on the other, calls for a sustained reflection on the relation between a Husserlian phenomenological philosophy and philosophy in general. What can phenomenological reflection contribute to the ongoing discussion of certain perennial philosophical questions and which philosophical problems are raised by a phenomenological philosophy itself? In addition to addressing the question of the relation between phenomenology and philosophy in general, phenomenology today cannot avoid addressing the nature of its relation to the methods and results of the natural and human sciences. In fact, for Husserl,

phenomenology is not just one among many philosophical methods and entirely unrelated to the sciences. Rather, according to Husserl, phenomenology should be a "first philosophy" and should aim to become the standard for all true science.

Du 9 juillet (abandon de la conférence de Lausanne du paiement des réparations) au 14 novembre (publication d'un nouveau plan français de désarmement) se dessine la dégradation de la situation diplomatique de la France, avec la révision des traités de paix de 1919 et la mise en cause des principes de la sécurité collective. Trois grandes questions sollicitent l'attention des milieux politiques français : le règlement des dettes interalliées, dont ils réclament l'annulation après l'abandon des réparations, la revendication par l'Allemagne de l'égalité des droits en matière d'armement, et les développements diplomatiques du conflit sino-japonais. Mais c'est sur la crise intérieure allemande que, conscients des enjeux d'une arrivée au pouvoir des nazis, les diplomates vont surtout se concentrer. Avec ce recueil de 330 documents extraits, par Pierre Renouvin, des archives des ministères des Armées et des Finances, des papiers personnels du président Herriot, de René Massigli, du ministre des Finances Germain-Martin, ainsi que de ses propres archives, le ministre des Affaires étrangères entame la réimpression des ouvrages depuis de la collection des Documents diplomatiques français relatifs à la guerre de 1939-1945. Pierre Renouvin (1893-1974), doyen de la faculté des lettres de Paris de 1955 à 1958, est notamment l'auteur de Introduction à l'histoire des relations internationales, La Première guerre mondiale, La Question d'Extrême-Orient, 1840-1940. Il a dirigé aux éditions Hachette une Histoire des relations internationales en huit volumes (réédité en 1994). *Au-delà de la Poétique* Presses Paris Sorbonne Originally published in 1759, this early work by French

philosopher Voltaire is both expensive and hard to find in its first edition. It is a satirical novella about a young man losing his optimism under the pressures and hardships of the world. This seminal work is highly recommended and a must have for all readers of philosophy. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

 The Ghent congress on town planning was the first genuinely international conference to address all aspects of civic life and design. Attended by representatives of 22 governments and 150 cities, as well as by hundreds of architects, planners, politicians, and scientists, it marked the culmination of a series of events which helped to form the world of town planning at the start of the twentieth century. Ghent illustrates three key themes for the history of town planning. First, the transactions of the congress include papers from some of the most significant theorists and practitioners of the period, such as Patrick Abercrombie, Augustin Rey, Raymond Unwin, and Joseph Stübben. Secondly, the congress as a whole reflects just how global the business of town planning had become by 1913: papers and exhibits included

studies of colonial projects as well as European designs. The delegates themselves provide wonderful evidence of a transnational process at work. Finally, the text brilliantly illuminates the way in which town planning was critically linked to other reformist movements of the era. The whole event, like the International Union of Cities that it spawned, was the product of the peace movement. Even as war draw nearer, the International Union was being spoken of as a future world government. Significantly, one of the organisers of the event - Henri La Fontaine - won the Nobel Peace Prize in 1913. The Premier Congrès international et exposition comparée des villes is a major publication, but it is one that is now almost impossible to obtain. This republication, a century after this seminal event, will be considerable interest not only to those who work on town-planning, but also transnational historians and writers on the peace movement more generally.

Amorcé par l'arrêt Köbler, un mouvement jurisprudentiel récent a conduit la Cour de justice à concevoir divers mécanismes qui permettent aux justiciables de sanctionner, directement ou indirectement, une juridiction nationale qui a méconnu son obligation de renvoi préjudiciel. C'est ainsi que les justiciables pourront solliciter la remise en cause de la chose décidée, voire de la chose jugée ou encore, chercher à engager la responsabilité «judiciaire» de l'État. On pressent pourtant que les solutions, très restrictives, forgées par la Cour de justice sont supplantées par les dispositifs nationaux. Ceux-ci paraissent en effet plus aisés à actionner, voire plus performants, qu'il s'agisse de la violation du

droit au juge légal, comme en Allemagne ou en Espagne, ou encore de l'introduction du dispositif législatif suédois. La présentation - sans égal à ce jour - de près de vingt rapports nationaux permettra de mieux apprécier l'effectivité de la protection juridictionnelle dont disposent les justiciables via le renvoi préjudiciel. L'intérêt de cet ouvrage est d'autant plus vif que l'adhésion prochaine de l'Union européenne à la Convention européenne des droits de l'homme se traduira vraisemblablement par une revitalisation des dispositions permettant de sanctionner une violation de l'obligation de renvoi préjudiciel. Cet ouvrage s'adresse principalement aux magistrats et aux avocats, ainsi qu'aux universitaires spécialisés dans l'étude du droit processuel.
