Strategic Information Systems: Concepts, Methodologies, Tools, and Applications Elsevier Health Sciences  
Doorway Thoughts: Cross Cultural Health Care for Older Adults addresses the role of ethnicity in health decision-making in America. This book focuses on how clinicians caring for older adults can develop an understanding of different ethnic groups in order to effectively care for their patients. Chapters in this volume address cross-cultural health care for older adults from the following groups: Arab Americans, Cambodian Americans, Filipino Americans, Haitian Americans, Korean Americans, Pakistani Americans, Portuguese Americans, Russian Americans.

Written Assessment in Medical Education  
 John Wiley & Sons

This book is an indispensable yet simple reference for the daily use of a medical teacher. It addresses the needs of medical teachers interested in providing instruction and assessment in writing and written language, offering detailed guidance in simple and straightforward language. The book goes beyond mere description; it provides many practical examples, valuable materials that can be utilized in training workshops and medical educator professional development courses. The book will be of interest to novice and experienced teachers in medical schools, in addition to university teachers in other health professions, such as dentistry, pharmacy, nursing, medical laboratory, physiotherapy, biomedical engineering and veterinary medicine.

Doorway Thoughts: Cross-Cultural Health Care for Older Adults, Volume III

American Psychiatric Pub

This essential text brings together in one

place the inextricably linked concepts of professional development, reflective practice and decision-making. Fully updated and revised throughout, the new edition of this easy-to-follow, jargon-free title is targeted at nursing and healthcare practitioners and nursing students, providing clear guidance to help the reader think critically about their practice, work within professional boundaries, be accountable for their actions, and plan for their future.

Master Dentistry Volume 2 E-Book

Springer Publishing Company

This volume is the third in a series of succinct, analytical reviews of advances in the psychiatric care of medically ill patients. Like the previous volumes, Medical-Psychiatric Practice, Volume 3 is designed to continually update the busy clinician on research and practical developments in medical psychiatry. Under the guidance of an eminent editorial advisory board, this volume addresses several specific clinical problems that require an integrated medical-psychiatric approach to their diagnosis and treatment. It includes an in-depth discussion of psychopharmacokinetics as well as an update on psychopharmacology in medically ill patients.

The Paramedic Revision Guide Springer Nature

The special features that distinguish Foundations of Community Medicine in its present form are: Contains well-organized material which is singularly free from repetition, confusion and uncertainty and which ensures availability of all the relevant information on a topic at one place. Lays adequate stress on applied aspects of preventive medicine and public health with focus on Indian situation. Contains detailed description of public health practices,

namely, immunization, disinfection and sterilization, notification, isolation and quarantine, public health surveillance and population screening. Extends a managerial treatment to the description of health organizations, health programmes and health care systems existing in the country. Incorporates a comprehensive coverage of physical, social and biological environments laying due stress on environmental pollution and its control. Provides adequate information on occupational hazards and industrial problems in consideration of the advancing industrialization in India. Encompasses an elaborate exposition on important issues concerning maternal health, infant health, child health, adolescent health and geriatric health in an exclusive section devoted to personal health care. Presents a uniquely simplified and readily intelligible discourse on basic concepts of epidemiology and statistics which are usually abhorred by medical students. Incorporates a detailed description of the National Population Policy and National Health Policy in consideration of their crucial importance in the formulation of National Health Care Programmes for the country. Contains numerous comparison tables, flowcharts, graphs and diagrams to improve comprehension and facilitate retention of the subject matter. Encloses multiple solved examples on epidemiology, vital statistics and basic statistics to enable the students to calculate rates, ratios and statistical values of applied significance. Contains elaborate discussion on Indian population problem, human disasters as well as emerging and re-emerging diseases. Provides adequate information on Indian health systems, hospital acquired infection and hospital waste management. Covers detailed discussion

on adolescent health care, mental disorders and millennium development goals. About the Author : - G.M. Dhaar, Professor, Department of Community Medicine, SKIMS, Srinagar, India. Irfan Robbani, Associate Professor, Department of Community Medicine, SKIMS, Srinagar, India.

**National Library of Medicine Current Catalog** Elsevier Health Sciences

Volume III of Doorway Thoughts: Cross-Cultural Health Care for Older Adults addresses the role of religion in health decision-making in America. This book, co-authored by both religious leaders and health care professionals, focuses on how clinicians caring for older adults can develop an understanding of different religious groups in order to effectively care for their patients.

Medical-Psychiatric Practice Springer Science & Business Media

Medical Decision Making provides clinicians with a powerful framework for helping patients make decisions that increase the likelihood that they will have the outcomes that are most consistent with their preferences. This new edition provides a thorough understanding of the key decision making infrastructure of clinical practice and explains the principles of medical decision making both for individual patients and the wider health care arena. It shows how to make the best clinical decisions based on the available evidence and how to use clinical guidelines and decision support systems in electronic medical records to shape practice guidelines and policies. Medical Decision Making is a valuable resource for all experienced and learning clinicians who wish to fully understand and apply decision modelling, enhance their practice and improve patient outcomes. "There is little doubt that in

the future many clinical analyses will be based on the methods described in Medical Decision Making, and the book provides a basis for a critical appraisal of such policies.” - Jerome P. Kassirer M.D., Distinguished Professor, Tufts University School of Medicine, US and Visiting Professor, Stanford Medical School, US  
*Clinical Application of Neuromuscular Techniques, Volume 2 E-Book World Scientific*

Note to Readers: Publisher does not guarantee quality or access to any included digital components if book is purchased through a third-party seller. AJN Book of the Year 2016 First-Place Winner in Gerontological Nursing! “The evidence-based protocols are designed as a primary reference and are useful, substantive, and timely....The broader contributions of useful format and succinct review of the evidence make it likely that this text will continue to be the leading resource in nursing education and practice.” —The Gerontologist “As a gerontological clinical educator/research nurse, I will often use this as a reference. The format and the content are good, and the explanations of how to best use the evidence simplify the process of sifting through mountains of information to figure the best practice.” Score: 97,\*\*\*\* —Doody’s The newest edition of this distinguished reference in geriatric nursing delivers updated guidelines, new illustrative case studies, and the latest evidence-based protocols developed by leading researchers, educators, and practitioners in each topic area. The sixth edition includes new approaches devoted to supporting LGBTQ+ elders, persons living with dementia and their families, and older adults living with HIV. New operational strategies provide guidance in using the electronic health

record, implementing improved person-centered care approaches, and maintaining age-friendly atmospheres. Using evidence derived from all levels of care, this text offers developed guidelines for improving both quality and outcomes when caring for older adults in multiple disciplines, including interprofessional team members, long-term care and other staff educators, social workers, dietitians, and physicians. Chapters provide assessment and management principles, clinical interventions, specialty practice, and models of care. They consistently feature chapter objectives, annotated references, evidence ratings for each protocol, and resources for further investigation. Each protocol is embedded within the chapter content to provide context and detailed evidence. The protocols consistently include an overview, evidence-based assessment, intervention strategies, and a supporting case study with discussion. PowerPoint presentations and a test bank are available as instructor’s resources. New Chapters: Informational Technology: Embedding CPGs Organizational Approaches to Promote Person-Centered Care Environmental Approaches to Support Aging-Friendly Care HIV Prevention and Care for the Older Adult LGBTQ+ Perspectives Key Features: Best practices for in-patient, in-home, and long-term care settings Case studies with discussions in each chapter to illustrate application of clinical practice and related Nursing Standard of Practice Protocol The AGREE systematic method was used to evaluate each protocol and validate this book’s content Instructor’s resources including PowerPoints and a Test Bank Purchase includes digital access for use on most mobile devices and computers

**Decision Making in Health Care**

Cambridge University Press

This text explains and illustrates the importance of 12-lead electrocardiograms (ECGs) in making rapid and informed decisions in cardiac care. It covers the logical steps to the ECG recognition of the underlying mechanism of cardiac emergencies, their prognostic significance, and the best treatment

Ethics in Intensive Care Medicine John Wiley & Sons

This is a practical guide that will support primary care members through the process of change towards PCT status and assist those with PCT status. The contributors present real solutions to the many unique issues faced in this new stage of NHS development. Endorsed by the National Association of Primary Care it is an authoritative guide for the present and for future development. All members of the new primary care organisations and those supporting them will find this handbook to be an enlightening and indispensable guide.

**Volume 2 - E-book** John Wiley & Sons  
Nephrology and Acid-Base Disorders – as only Harrison's can cover it Featuring a superb compilation of chapters related to kidney function that appear in Harrison's Principles of Internal Medicine, Eighteenth Edition, this concise, full-color clinical companion delivers the latest knowledge in the field backed by the scientific rigor and authority that have defined Harrison's. You will find content from renowned editors and contributors in a carry-anywhere presentation that is ideal for the classroom, clinic, ward, or exam/certification preparation. Features Sections that reflect the scope of

nephrology: Introduction to the Renal System; Alterations of Renal Function and Electrolytes; Acute Kidney Injury and Chronic Renal Failure; Glomerular and Tubular Disorders; Renal Vascular Disease; Urinary Tract Infections and Obstruction; and Cancer of the Kidney and Urinary Tract Complete coverage of a broad spectrum of topics, including acid-base and electrolyte disorders, vascular injury to the kidney, and specific diseases of the kidney  
Integration of pathophysiology with clinical management 41 high-yield questions and answers drawn from Harrison's Principles of Internal Medicine Self-Assessment and Board Review, 18e  
Content updates and new developments since the publication of Harrison's Principles of Internal Medicine, 18e 22 chapters written by physicians who are recognized experts in the field of nephrology and acid-base disorders  
Helpful appendix of laboratory values of clinical importance

**The Textbook of Non-Medical****Prescribing** Jones & Bartlett Learning

Praise for previous editions: "The evidence-based protocols are designed as a primary reference and are useful, substantive, and timely....The broader contributions of useful format and succinct review of the evidence make it likely that this text will continue to be the leading resource in nursing education and practice." --The Gerontologist "As a gerontological clinical educator/research nurse, I will often use this as a reference. The format and the content are good, and the explanations of how to best use the evidence simplify the process of sifting through mountains of information to figure the best practice." Score: 97 -- Doodys The result of a collaboration between expert practitioners and

educators in geriatric nursing, the seventh edition of this acclaimed reference has been updated and revised with new information on chronic conditions and emerging models of care presented in 10 completely new chapters. It provides the most current, evidence-based protocols for improving both quality of care and patient outcomes when caring for older adults in multiple disciplines and settings. As in past editions, the seventh edition is distinguished by its use of a rigorous systematic method (AGREE: Appraisal of Guidelines for Research and Evaluation) to improve the validity of the book's evidence-based content. Chapters provide assessment and management principles, clinical interventions, and information on specialty practice and models of care. Included in most chapters are protocols developed for each clinical condition by experts in that specific area. Evidence is current and derived from all settings of care, including community, primary, acute, and long-term care. Protocols include an overview and evidence-based assessment and intervention strategies. Illustrative case studies with discussion are presented in most chapters, along with chapter objectives and references with evidence ratings. Instructor's resources include an AACN Mapping Grid, Course Cartridge, Transition Guide, PowerPoints, and Test Bank. New to the Seventh Edition: Updated to encompass the latest trends in older adult care, chronic conditions, and emerging models of care New chapters on care and management of diabetes and respiratory care New chapters on issues surrounding nutrition and dementia, and mental illness New chapter on care and comfort at the end of life New chapters on adopting principles of diversity, equity,

and inclusion and an age-friendly health system into practice New chapters on models of care in long-term, community-based, and primary care Key Features: Delivers easy-to-follow geriatric protocols for best practices Updates evidence regularly to reflect current practice standards Encompasses a broad scope of content including detailed information rarely covered in professional literature Offers case studies and discussions to illustrate application of protocol to practice Written by renowned leaders in geriatric nursing education and practice Use of AGREE (Appraisal of Guidelines for Research and Evaluation) to improve the validity of evidence throughout the text **Informed Consent** IntraWEB, LLC and Claitor's Law Publishing

This book has been replaced by Handbook of Assessment and Treatment Planning for Psychological Disorders, Third Edition, ISBN 978-1-4625-4488-2. *Color Atlas of Family Medicine 2/E* Routledge

This work provides a guide to how economics can be used to manage scarcity of resources in health services. It outlines the principles of economics in a non-technical manner, before going on to address the issues of how to apply the principles in day to day health services management.

*Handbook of Assessment and Treatment Planning for Psychological Disorders, 2/e* Academic Press

"Initiating and sustaining the clinical nurse leader role, third edition is an essential resource that outlines the role and core values of the clinical nurse leader while simultaneously providing valuable content for the CNL certification exam. The third edition features expanded content around the CNL role and offers compelling examples that

illustrate the CNL's influence on care coordination, health promotion, and high-performance interprofessional care teams."--Page 4 de la couverture.

Handbook of Neurodevelopmental and Genetic Disorders in Children, 2/e CRC Press

This book is a classic guide for trainees and practitioners with a comprehensive overhaul, this book successfully bridges the gap between advancing technology, terminology, and the emergence of new diseases. With its all-encompassing approach, this book serves as the ultimate resource for radiology professionals, eliminating the need for multiple texts on various systems and recent updates. Trainees and practitioners alike will find immense value, as it caters to both skill enhancement and exam preparation for residents. For trainees, the book provides essential tools to elevate their expertise as it covers various topics. Meanwhile, community practitioners will greatly benefit from evidence-based guidelines and protocols presented in the book. - The new edition of Sutton retains the overall format, presentation style and comprehensive coverage of the previous editions. - Significant advances in imaging techniques and newer applications of different modalities have been incorporated in all sections - Radiology lexicons and updated classification systems for various diseases have been included. There is emphasis on differential diagnosis, appropriateness criteria and disease management. - Salient features have been highlighted as imaging pearls and teaching points. - New sections for Imaging Physics & Principles of Imaging, Emergency Radiology, Pediatric Radiology and Nuclear Medicine have been added to make the book more

comprehensive. - Crucial topics on patient safety, quality assurance and structured reporting have been included to help radiologists become processes driven and ensure better patient care. - Chapters on Information technology and Artificial intelligence introduce residents to the digital environment that we live in and its impact on day to day practice. - A section on Interventional Radiology has been included to enable residents to get a deeper understanding of this subspecialty and explore its scope in modern medicine. - This edition of Sutton is aimed at presenting an exhaustive teaching and reference text for radiologists and other clinical specialists.

Textbook of Radiology And Imaging, Vol 2 - E-Book Elsevier Health Sciences  
First multi-year cumulation covers six years: 1965-70.

Medical Decision-Making on Behalf of Young Children John Wiley & Sons

This work includes a foreword by Carl Thompson, Senior Research Fellow, Department of Health Sciences, University of York. This inspiring text offers guidance and innovative ideas for teaching and learning. It explains how nurses make clinical decisions through the development of narratives, and how, using narratives, nurses gain a far more intimate knowledge of the patient than doctors can. The book considers service delivery around patients, renegotiation of professional roles of medical staff and their boundaries of responsibility and authority. "Nurses' Clinical Decision Making" will appeal to all undergraduate and postgraduate students of nursing, registered nurses and nurse managers. Nurse educators, hospital managers, doctors and healthcare risk managers will also find the information contained here invaluable. 'If nurses are decision-

makers how can their role and practice be explained? Can decision-making be taught and are there different levels of decision-making skill? If so, how can expert decision-makers be recognised? These are just some of the pertinent questions that need to be asked if we are to recognise and understand the centrality of clinical decision-making in nursing practice. Clinical work is complex and takes place in a complex environment that centres around individuals who themselves are physically, socially and spiritually complex. Clinical work also involves multiple participants (nurses, doctors, patients, physiotherapists, occupational therapists, pharmacists to name a few) who in the course of a days work can make scores of decisions.' - Russell Gurbutt, in the Preface.

Pediatric Decision-Making Strategies E-Book Guilford Press

In this book, part of the European Society of Intensive Care Medicine (ESICM) textbook series, experts in the field of clinical ethics describe basic principles of clinical ethics and ethical reasoning, the fundamental pillars of intensive care medicine as well as the decision-making processes necessary to arrive at appropriate decisions for each individual patient. Specifically, the complex decision-making process, with regard to limiting life-sustaining therapies and integrating palliative care into intensive care, are expounded. Furthermore, the still controversial topics of ethical climate, proportionate care, and prioritization are elaborated upon. The so-called "soft skills" of inter-professional communication and co-operation are given the attention they deserve in order to overcome the gap between technological progress and interpersonal standstill. Finally, widely

accepted ethical values and principles were challenged by the Covid-19 pandemic, forcing clinicians to elaborate recommendations regarding the prioritization of scarce resources. The book will be an invaluable tool for clinicians to understand ethical principles and reasoning to contend ethical challenges in intensive care medicine across the boundaries of disciplines and professions, in order to provide an appropriate individual plan of treatment for their patients.

**Initiating and Sustaining the Clinical Nurse Leader Role** Springer Science & Business Media

Offering a concise, highly visual approach to the basic science and clinical pathology of the endocrine system, this updated volume in The Netter Collection of Medical Illustrations (the CIBA "Green Books") contains unparalleled didactic illustrations reflecting the latest medical knowledge. Revised by Dr. William F. Young, Jr., Endocrine System, Volume 2 integrates core concepts of anatomy, embryology, physiology, and genetics with common clinical correlates across health, medical, and surgical disciplines. Classic Netter art, updated and new illustrations, and modern imaging continue to bring medical concepts to life and make this timeless work an essential resource for students, clinicians, and educators. - Provides a complete overview of the endocrine system through multidisciplinary coverage of endocrinology as a whole. - Covers timely topics like the Carney triad, updates on genetic basis of endocrine disorders, pituitary stalk lesions; empty sella syndrome; thyroid biopsy; metastatic pheochromocytoma and paraganglioma; adrenocortical carcinoma; diabetes-related

dermatologic manifestations; and McCune-Albright syndrome. - Provides a concise overview of complex information integrating anatomical and physiological concepts with clinical scenarios. - Compiles Dr. Frank H. Netter's master medical artistry—an aesthetic tribute and source of inspiration for medical professionals for over half a century—along with new art in the

Netter tradition for each of the major body systems, making this volume a powerful and memorable tool for building foundational knowledge and educating patients or staff. - NEW! An eBook version is included with purchase. The eBook allows you to access all of the text, figures, and references, with the ability to search, make notes and highlights, and have content read aloud.
