Nursing Key Topics Review: Pharmacology Springer

"Depuis soixante ans, les dangers des pesticides pour la biodiversité et la santé sont avérés. Alors pourquoi notre modèle agricole et alimentaire reste-t-il toujours autant dopé aux pesticides? Les Monsanto Papers l'ont montré, les lobbyistes du secteur entretiennent savamment le doute quant à la gravité de leurs impacts environnementaux et sanitaires. Mais l'influence des industriels n'est que la face émergée d'une machinerie plus vaste de production de l'ignorance, reposant moins sur la manipulation que sur un déni collectif favorisé par les protocoles officiels de l'évaluation des risques. Face à l'ampleur des données et des dangers potentiels, il devient plus confortable d'ignorer des pans entiers de la connaissance plutôt que d'assumer le vertige de ses conséquences sur notre modèle agricole. Au terme de ce voyage au cœur de la fabrique de l'ignorance, l'auteur apporte des pistes et réflexions pour accélérer la transition vers une agriculture affranchie des pesticides"--Page 4 of cover.
