Summer 1553: A time of danger and deceit. Brendan Prescott, an orphan, is reared in the household of the powerful Dudley family. Brought to court, Brendan finds himself sent on an illicit mission to the King's brilliant but enigmatic sister, Princess Elizabeth. But Brendan is soon compelled to work as a double agent by Elizabeth's protector, William Cecil—who promises in exchange to help him unravel the secret of his own mysterious past. A dark plot swirls around Elizabeth's quest to unravel the truth about the ominous disappearance of her seriously ill brother, King Edward VI. With only a stable boy and Elizabeth's lady-in-waiting at his side, Brendan plunges into a ruthless gambit of half-truths, lies, and murder. Filled with the intrigue and pageantry of Tudor England, *THE TUDOR SECRET* is the first book in the Elizabeth's Spymaster series.

The definitive chronicle of the origins of French avant-garde literature and art, Roger Shattuck's classic portrays the cultural bohemia of turn-of-the-century Paris who carried the arts into a period of renewal and accomplishment and laid the groundwork for Dadaism and Surrealism. Shattuck focuses on the careers of Alfred Jarry, Henri Rousseau, Erik Satie, and Guillaume Apollinaire, using the quartet as window into the era as he exploring a culture whose influence is at the very foundation of modern art.

The world's most famous sculpture, the Statue of Liberty, Liberty Enlightening the World, rises to a height of 305 feet from the base of her pedestal to the top of the golden flame of her torch. Conceived, designed, and originally built in France, she was unveiled on her new island home in 1886. The postcard trade, still in its infancy, embraced the icon, and Miss Liberty's commanding figure soon appeared on millions of postcards. In this book, one will see the statue from many angles--profiles, long shots, close-ups, aerials, torch views, and more.

Alice's Adventures in Wonderland (1865) JHU Press

On August 14, 1945, Alfred Eisenstaedt took a picture of a sailor kissing a nurse in Times Square, minutes after they heard of Japan's surrender to the United States. Two weeks later LIFE magazine published that image. It became one of the most famous WWII photographs in history (and the most celebrated photograph ever published in the world's dominant photo-journal), a cherished reminder of what it felt like for the war to finally be over. Everyone who saw the picture wanted to know more about the nurse and sailor, but Eisenstaedt had no information and a search for the mysterious couple's identity took on a dimension of its own. In 1979 Eisenstaedt thought he had found the long lost nurse. And as far as almost everyone could determine, he had. For the next thirty years Edith Shain was known as the woman in the photo of V-J DAY, 1945, TIMES SQUARE. In 1980 LIFE attempted to determine the sailor's identity. Many aging warriors stepped forward with claims, and experts weighed in to support one candidate over another. Chaos ensued. For almost two decades Lawrence Verria and George Galdorisi were intrigued by the controversy surrounding the identity of the two principals in Eisenstaedt's most famous photograph and collected evidence

that began to shed light on this mystery. Unraveling years of misinformation and controversy, their findings propelled one claimant's case far ahead of the others and, at the same time, dethroned the supposed kissed nurse when another candidate's claim proved more credible. With this book, the authors solve the 67-year-old mystery by providing irrefutable proof to identify the couple in Eisenstaedt's photo. It is the first time the whole truth behind the celebrated picture has been revealed. The authors also bring to light the couple's and the photographer's brushes with death that nearly prevented their famous spontaneous Times Square meeting in the first place. The sailor, part of Bull Halsey's famous task force, survived the deadly typhoon that took the lives of hundreds of other sailors. The nurse, an Austrian Jew who lost her mother and father in the Holocaust, barely managed to escape to the United States. Eisenstaedt, a World War I German soldier, was nearly killed at Flanders.

Planet of the Apes as American Myth Barnes & Noble Publishing

From the targeted demolition of Mostar's Stari-Most Bridge in 1993 to the physical and social havoc caused by the 2004 Boxing Day Tsunami, the history of cities is often a history of destruction and reconstruction. But what political and aesthetic criteria should guide us in the rebuilding of cities devastated by war and natural calamities? The title of this timely and inspiring new book, *Architects Without Frontiers*, points to the potential for architects to play important roles in post-war relief and reconstruction. By working "sans frontières", Charlesworth suggests that architects and design professionals have a significant opportunity to assist peace-making and reconstruction efforts in the period immediately after conflict or disaster, when much of the housing, hospital, educational, transport, civic and business infrastructure has been destroyed or badly damaged. Through selected case studies, Charlesworth examines the role of architects, planners, urban designers and landscape architects in three cities following conflict - Beirut, Nicosia and Mostar - three cities where the mental and physical scars of violent conflict still remain. This book expands the traditional role of the architect from 'hero' to 'peacemaker' and discusses how design educators can stretch their wings to encompass the proliferating agendas and sites of civil unrest.

Canaanites explores the ancient population of the Western Levant (Israel, Transjordan, Lebanon, and coastal Syria), examining the development of its distinctive culture from the early farming

communities of the eighth millennium B.C. to the fragmentation of its social and cultural ideals in the latter half of the first millennium B.C. Jonathan N. Tubb makes judicious use of the Hebrew Bible in describing Canaanite culture. He views the Bible as a rich resource for understanding the literary and theological heritage of Israel, which he classifies as a subculture of Canaan. At the same time he reveals the limitations of the Bible as a historical document, arguing that to reconstruct the Canaanites' history we must first look at the archaeological data. Tubb stresses the continuity of Canaanite civilization, portraying events such as the imposition of Egyptian imperial rule and the development of historical Israel as episodic interruptions. The second novel in the bestselling Gerhard Self detective series, from the author of *The Reader* In *Self's Deception*, private investigator Gerhard Self receives a request to track down the daughter of Herr Salger, the Assistant Secretary of Bonn, who's been absent from her translation classes at the university. Repelled by the pomposity of the government official, he rejects the case. But an insistent letter--and five thousand marks--changes his mind. After discrete interrogations at her school and her former residences, and a quick survey of the local hospitals, it turns out she washed up at a psych ward where he's told she had fallen out a window earlier that week and died. He quickly decides this is a lie, and decides one of the doctors is covering for her. Self quickly discovers that his quarry was involved in a terrorist incident--but a terrorist incident that the government is clearing covering up. Self helps the woman escape, finds out his own client is not Herr Salger at all but another terrorist. Now the mystery becomes what exactly happened at the military arms depot that the government doesn't want made public.

"Bringing together more than sixty images of the bridge that, over the years, have graced postcards, magazine covers, and book jackets and appeared in advertisements, cartoons, films,

and photographs, Haw traces the diverse and sometimes jarring ways in which this majestic structure has been received, adopted, and interpreted as an American idea. Haw's account is not a history of how the bridge was made, but rather of what people have made of the Brooklyn Bridge - in film, music, literature, art, and politics - from its opening ceremonies to the blackout of 2003."--BOOK JACKET.

World champion at 19 . . . One of the first black athletes to become world champion in any sport . . . 1-mile record holder . . . American sprint champion in 1898, 1899, 1900 . . . triumphant tours of Europe and Australia . . . Victories against all European champions . . . Until now a forgotten, shadowy figure, Marshall Walter "Major" Taylor is here revealed as one of the early sports world's most stylish, entertaining, and gentlemanly personalities. Born in 1878 in Indianapolis, the son of poor rural parents, Taylor worked in a bike shop until prominent bicycle racer "Birdie" Munger coached him for his first professional racing successes in 1896. Despite continuous bureaucratic—and, at times, physical—opposition, he won his first national championship two years later and became world champion in 1899 in Montreal. This beautifully illustrated, vividly narrated, and scrupulously researched biography recreates the life of a great international athlete at the turn of the century. Based on ten years of research—including extensive interviews with Major Taylor's 91-year old daughter—this is the dramatic story of a young black man who, against prodigious odds, rose to fame and stardom in the tempestuous world of international professional bicycle racing a century ago.

It is my pleasure to welcome you here on the occasion of the International Symposium, "Landscape Troia between Earth History and Culture". The topic Troia has stimulated many scientists, historians and experts in the history of arts to interpret data and adjust concepts regarding the development of early Troia. In the past two decades the Heidelberg Academy of Sciences and Humanities has supported several research activities which are related to the Troia project. One of the aims of the archaeometry laboratory is to localize Aegean and Anatolian sources for the procurement of prehistoric metals such as gold, silver, lead, copper and tin. In particular in the Troad, numerous mining and smelting sites have been found and characterized, allowing one to investigate to which extent they might have been exploited by the ancient Troians. When analytically comparing ores and slags with Troian metal artifacts, early trade connections can be traced. The landscape around Troia underwent rather fast and drastic changes.

This book describes the design, detailing and structural engineering of filigree, double-curved and long-span glazed shells of minimal weight and ingenious details. Innovative, clear and understandable geometric principles for the design of double-curved shell structures are explained in a practical manner. The principles are simple to apply with the use of functions now

available in most CAD programs. The author demonstrates how floating and homogeneous structures can be created on these "free" forms, particularly grid shells of planar rectangles. These are especially suitable for glazing with flat panes and offer structural, economical and architectural advantages. Examples are provided to illustrate in simple ways the latest methods of form finding calculation and holistic optimisation through the complex interaction of structure, form and topology. Numerous examples built all over the world from 1989 to 2014 offer orientation and assistance in the design of such double-curved shells. Essential design parameters, many details and node connections of constructed projects are presented and evaluated. These structures have been built all over the world in close partnership with renowned architects.

How do political conflicts shape popular culture? This book explores that question by analyzing how the Planet of the Apes films functioned both as entertaining adventures and as apocalyptic political commentary. Informative and thought provoking, the book demonstrates how this enormously popular series of secular myths used images of racial and ecological crisis to respond to events like the Cold War, the race riots of the 1960s, the Civil Rights movement, the Black Power movement, and the Vietnam War. The work utilizes interviews with key filmmakers and close readings of the five Apes films and two television series to trace the development of the series' theme of racial conflict in the context of the shifting ideologies of race during the sixties and seventies. The book also observes that today, amid growing concerns over race relations, the resurgent popularity of Apes and Twentieth Century--Fox's upcoming film may again make Planet of the Apes a pop culture phenomenon that asks who we are and where we are going. Instructors considering this book for use in a course may request an examination copy here.
