Proceedings of the Royal Geographical Society and Monthly Record of Geography Spitsbergen-Svalbard.com

The first text is from an English collection published in 1694; the second from the *Relation du Groenland*, Paris, 1663; the third is the text of Edward Pelham's tract, London, 1631. The supplementary material consists of the

1855 annual report. This is a new print-on-demand hardback edition of the volume first published in 1855.

Proceedings of the Royal Geographical Society London : Printed for J. Mawman, London, and D. Brown, Edinburgh

"A Voyage to Spitzbergen: Containing an Account of That Country, of the Zoology of the North; of the Shetland Islands..." by John Laing is a historical account of an expedition to Spitzbergen, an Arctic archipelago. Laing's narrative provides readers with insights into the natural

history, geography, and exploration of the North, including the Shetland Islands. The book offers a firsthand perspective on the challenges and wonders of Arctic exploration, making it an informative and enlightening read for those interested in polar exploration.

Foreign Relations of the United States

BoD - Books on Demand

William Baffin, geboren 1584, war englischer Entdecker und Seefahrer.

Seine Reisen, die der Auffindung und Entdeckung der Nordwestpassage dienten, führten ihn nach Grönland und Kanada. Überdies war Baffin der Erste, der versuchte, die geografische Länge durch Mondstrecken zu bestimmen. Bei diesem Buch handelt es sich um eine englischsprachige Ausgabe.

Do you like polar bears? Do you want polar bears to be around in 50 years? Do you think that climate change is the only

major threat to polar bear survival? Do you believe that polar bears are adequately protected today? Would you like to contribute to saving polar bears today and in the future? If your answer to any of those questions is yes, you need to read this book. "This book is an eye-opener and should kick off extensive debates." Dr. Thor S. Larsen, professor emeritus, Member of the IUCN Polar Bear Specialist Group 1968-1985. "In this impassioned book Morten raises very important, provocative questions that are not being addressed by the international environmental groups." Art Wolfe, Award-winning conservation photographer. In this book, the author analyses the current status of the polar bear. And he punctures the myth that polar bears are well protected and

managed today. While most people think that global warming is the overhanging threat to polar bear survival, the author documents that it is actually the continuation of an unsustainable hunting pressure that is driving the species towards extinction. Across 228 pages, interspersed with beautiful photographs, Morten Joergensen demonstrates how there are probably fewer polar bears than most authorities claim, how hunting is the greatest manageable threat to the species, how current protection measures are insufficient, how the animal has been commercialized and how lack of courage and honesty is allowing this scenario to continue. The book also contains a long string of realistic and very urgent recommendations for action - to save

polar bears before they are gone forever.

[The Voyages of William Baffin](#) London : H.S. King

This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks, etc. that were either part of the original artifact, or were introduced by the scanning process. We believe this work is culturally important, and despite the imperfections, have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide. We appreciate your understanding of the imperfections in the preservation process, and hope you enjoy this valuable book. ++++ The below data
