Paints a
complex
portrait of
East German
film art and
representation
through
examining
eighteen key
DEFA films
following the
fall of the

Berlin Wall. In
the late 1980s
and early
1990s, East
Germany's
DEFA
filmmakers
had a brief
window in
which to
critique GDR
society on

either side of the Wende, the sweeping political turn that surrounded the fall of the Berlin Wall and the opening of the border. Building on the DEFA Film Library's retrospective Wende Flicks series and Indiana University's DEFA Project, this study examines the newly rediscovered filmic artifacts of this transitional cinema, introducing eighteen key films from 1988 to 1994

in essays by German scholars, film professionals, and cultural figures. Accompanying interviews and historical film reviews present a complex portrait of East German film art, its communist bloc influences, and its legacy for contemporary German film culture. The resulting anthology combines historical, autobiographical, cultural-political, and journalistic discourses to

explore the tension between the hopes and frustrations these films express, the historical exigencies that overshadowed their production and reception, and the politics of their revival. Contributors: Skyler J. Arndt-Briggs, Peter Blank, Claudia Breger, Barton Byg, Knut Elstermann, Peter Kahane, Jennifer M. Kapczynski, Wolfgang Kohlhaase, Thomas Krüger,

<p>Helmut Morsbach, Benjamin Robinson, Katrin Schlösser and Frank Löprich, Nicholas Sveholm, Johannes von Moltke, Brigitta B. Wagner. Brigitta B. Wagner is an Alexander von Humboldt Fellow in Film Studies at the Freie Universität and in Time-Based Media at the Universität der Künste in Berlin.</p> <p>CORP 2012 - Proceedings/ Tagungsband MIT Press</p> <p>Since the turn</p>	<p>of the 21st century, countless literary endeavors by 'new Germans' have entered the spotlight of academic research. Yet 'minority writing', with its distinctive renegotiation of traditional concepts of cultural identity, is far from a recent phenomenon in German literature. A hundred years previously, the intense involvement of German-Jewish intellectuals in cultural and political</p>	<p>discourses on Jewish identity put a clear stamp on German modernism. This book is the first to unfold literary parallels between these two riveting periods in German cultural history. Drawing on the philosophical oeuvre of Jean-Luc Nancy, a comparative reading of texts by, amongst others, Beer-Hofmann, Kermani, Özdamar, Roth, Schnitzler,</p>
---	--	--

and Zaimoglu examines a variety of literary approaches to the thorny issue of cultural identity, while developing an overarching perspective on the 'politics of literature'.

'If you want to get to grips with any of the [European] languages, Routledge's

Colloquial series is the best place you could start.' – Rough Guide to Europe Specially written by experienced teachers for self-study or class use, the course offers you a step-by-step approach to written and spoken German. No prior knowledge of the language is required. What makes this new edition of Colloquial German your best choice in personal language learning? Interactive –

lots of exercises for regular practice. Clear – concise grammar notes. Practical – useful vocabulary and pronunciation guide. Complete – including answer key and reference section. Recorded by native speakers, the audio files are an invaluable component of the course. While reinforcing material from the book, the CDs also contain a variety of

additional exercises, including role-playing, and a useful guide to pronunciation. For the eBook and MP3 pack, please find instructions on how to access the supplementary content for this title in the Prelims section.

 Leuven University Press
 A critical and scholarly examination of the origins, implementation,

international transference and adaptation of the garden city idea and a consideration of its continuing relevance in the late 20th and 21st centuries. <u>Hueber- Wörterbuch Deutsch als Fremdsprache</u> Springer Science & Business Media A remarkable, in-depth study of Jewish history, culture, and memory in a historic and contemporary German city <u>Historic Maps and Views of</u>	<u>Berlin</u> Trescher Verlag The streets of Roman cities have received surprisingly little attention until recently. Traditionally the main interest archaeologists and classicists had in streets was in tracing the origins and development of the orthogonal layout used in Roman colonial cities. Roman Urban Street Networks is the first volume to sift through the ancient literature to	determine how authors used the Latin vocabulary for streets, and determine what that tells us about how the Romans perceived their streets. Author Alan Kaiser offers a methodology for describing the role of a street within the broader urban transportation network in such a way that one can compare both individual streets and street networks from one site to another. This work is more than simply an
---	---	--

exploration of Roman urban streets, however. It addresses one of the central problems in current scholarship on Roman urbanism: Kaiser suggests that streets provided the organizing principle for ancient Roman cities, offering an exciting new way of describing and comparing Roman street networks. This book will certainly lead to an expanded discussion of approaches to

and understanding of Roman streetscapes and urbanism. State Security and Mapping in the GDR Berghahn Books This powerful reference features one hundred famous urban plans all drawn to the same scale, each accompanied by a one-page summary of the site discussing its history, design and lessons for future urban design. **Preservation in Digital Cartography** Springer

RE-MIXING THE CITY - Towards Sustainability and Resilience? There is nothing permanent except change. (Heraclitus) Cities worldwide are facing rapid social, economic, environmental, technological and cultural changes such as: rapid urbanisation, aging of society, security issues, housing emergency, new solutions on mobility, integration of

immigrants, food and water shortage, etc. Especially in times of economic crisis and demographic changes in cities, it is necessary to think about how to best handle what we have, and therefore "RE-MIXING THE CITY" is a challenge to manage and re-combine the elements which make our modern cities in order to better respond to change.

Roman Cities
Oxford, Eng. ; Santa Barbara, CA : Clio Press

An annual collection of studies of individuals who have made major contributions to the development of geography and geographical thought. Subjects are drawn from all periods and from all parts of the world, and include famous names as well as those less well known: explorers, independent thinkers and scholars. Each paper describes the geographer's education, life and work and discusses their influence and spread of academic ideas. Each study includes a select bibliography and brief chronology. The work includes a general index and a cumulative index of geographers listed in volumes published to date.

Roman Cities
Michael Woloch's translation of

Les villes romaines, Pierre Grimal's noted French work on Roman city planning, archeology, and urban history, with Woloch's additional notes and descriptions of the cities mentioned by Grimal, as well as other important Roman cities. The book provides a brief history and description of more than a hundred Roman cities, an extensive master bibliography, and a

comprehensive glossary. Roman Cities will interest both scholars and students of Roman history and archeology, city planning, urban geography, and the social sciences. The glossary and bibliography make the book of value to specialists pursuing a particular topic and to students, history buffs, and amateur archaeologists seeking to broaden their understanding of the Roman city planning methods that

are such an integral part of our modern urban heritage. Roman Cities provides the first comprehensive study in English of major Roman cities, including an excellent coverage of the Roman legacy which was transmitted to medieval and modern trends in architecture and urban planning.. **Die Berliner Charité** Kgl. Danske Videnskabernes Selskab As of 1958, in the German

Democratic Republic (GDR), the Ministry for State Security was responsible for classified material, including topographic maps, which were produced and published by the Administration for Surveying and Mapping in the Ministry of Internal Affairs and by the Military Topographic Service in the Ministry of National Defence. In order to make sure that topographic documents were handled, stored, safeguarded, and administered according to the GDR's security doctrine, the Ministry for State Security maintained its own 'Surveying' Line within Main Department VII (Counter-Intelligence in the Ministry of Internal Affairs / German People's Police). Following the Conference of the Geodetic Services of the Socialist States held in Moscow in 1965, the National Defence Council of the GDR adopted a resolution stating, among other things, that topographic maps in the uniform Co-ordinate System 42 were only allowed to be kept in the offices of the so-called 'armed organs' (the Ministry of National Defence, the Ministry for State Security, and the Ministry of Internal Affairs). Maps used by anyone else were to be

recalled and replaced by an Edition for the National Economy (AV), from which the uniform sheet line, geodetic grids, trigonometric points, and quality and quantity details as well as other 'confidential information' had to be removed. Moreover, maps for the general public were to feature distortions of direction and scale, and inaccuracies of up to \$pm\$3 km. The purpose

of this collection is to illuminate both the Ministry for State Security's influence on mapping in the GDR and the ulterior motives behind its practices. Historians, cartographers, and geographers, including expert contemporary witnesses, explore these topics from a variety of viewpoints and provide archivists, map historians, and other map users with

information helpful for evaluating and dealing with maps published in the former GDR. *The Imaginary Polis* Routledge An alternative history of art in Berlin, detaching artistic innovation from art world narratives and connecting it instead to collective creativity and social solidarity. In pre- and post-reunification Berlin, socially engaged artists championed collective art

making and creativity over individual advancement, transforming urban space and civic life in the process. During the Cold War, the city's state of exception invited artists on both sides of the Wall to detour from artistic tradition; post-Wall, art became a tool of resistance against the orthodoxy of economic growth. In Free Berlin, Briana Smith explores the everyday peculiarities, collective joys, and grassroots

provocations of experimental artists in late Cold War Berlin and their legacy in today's city. These artists worked intentionally outside the art market, believing that art should be everywhere, freed from its confinement in museums and galleries. They used art as a way to imagine new forms of social and creative life. Smith introduces little-known artists including West Berlin feminist collective

Black Chocolate, the artist duo paint the town red (p.t.t.r), and the Office for Unusual Events, creators of satirical urban political theater, as well as East Berlin action art and urban interventionist s Erhard Monden, Kurt Buchwald, and others. Artists and artist-led urban coalitions in 1990s Berlin carried on the participatory spirit of the late Cold War, with more overt forms of protest and collaboration

at the neighborhood level. The temperament lives on in twenty-first century Berlin, animating artists' resolve to work outside the market and citizens' spirited defenses of green spaces, affordable housing, and collectivist projects. With *Free Berlin*, Smith offers an alternative history of art in Berlin, detaching artistic innovation from art world narratives and connecting it instead to

Berliners' historic embrace of care, solidarity, and cooperation. [Rick Steves French, Italian & German Phrase Book](#) Macmillan Reference USA Band 5/2 der Geschichte des deutschen Buchhandels im 19. und 20. Jahrhundert behandelt vornehmlich Verlage der DDR. German
Phrase Book is
an essential
item for any
traveler's
pocket.

Berlin Walter
de Gruyter
Between the
catastrophic
flood of the
Tiber River in
1557 and the
death of the
“engineering
poppe” Sixtus V
in 1590, the
city of Rome
was
transformed
by intense
activity
involving
building
construction
and
engineering
projects of all
kinds. Using
hundreds of
archival
documents

and primary
sources,
Engineering
the Eternal
City explores
the processes
and people
involved in
these
infrastructure
projects—sew
ers, bridge
repair, flood
prevention,
aqueduct
construction,
the building of
new, straight
streets, and
even the
relocation of
immensely
heavy ancient
Egyptian
obelisks that
Roman
emperors had
carried to the
city centuries
before. This
portrait of an
early modern

Rome
examines the
many
conflicts,
failures, and
successes that
shaped the
city, as
decision-
makers tried
to control not
only Rome’s
structures and
infrastructures
but also the
people who
lived there.
Taking up
visual images
of the city
created during
the same
period—most
importantly in
maps and
urban
representation
s, this book
shows how in
a time before
the
development

of modern professionalis- m and modern bureaucracies, there was far more wide- ranging conversation among people of various backgrounds on issues of engineering and infrastructure than there is in our own times. Physicians, civic leaders, jurists, cardinals, popes, and clerics engaged with painters, sculptors, architects, printers, and other practitioners as they

discussed, argued, and completed the projects that remade Rome. *German City, Jewish Memory* Routledge This book “Preservation in Digital Cartography: Archiving Aspects” should give an overview on how to preserve digital cartographic appli- tions and geospatial data in a sustainable way. The intention of this book is to shape the opinion of affected parties and to

bring together various d- ciplines. Therefore adjacent chapters will generally deal with information technologies, Service- Oriented Architectures, cybercartogra- phy, reproduc- tion and historic cartography, which all together can be subsumed in p- spective cartographic heritage. The survival of this digital cartographic heritage will base on long- term preservation strategies that

make use of -
tensive
dissemination
on the one
hand and
sustainable
digital
archiving
methods on
the other. This
includes a
massive
development
of paradigm
that expands
from “store-
and-save” to
“keep-it-
online”. The
paradigm
“store-and-
save” is
mainly used
for analogue

masters that
consist of st-
age media,
like vellum,
and their
visible
content.
Avoiding the
storage - dia
from
degeneration
in climate-
controlled
areas will help
to keep the
content
accessible. In
the digital
domain the
high
interdependen
cy of st- age
media, format,

device and
applications
leads to the
paradigm
“keep--
online” which
for example
describes the
migration to
new storage
devices. In
fact this
expansion of
paradigm
means that
the digital
domain calls
for ongoing
actions in
order to
preserve
cartography
for a long
term.
