Issues in Materials Development provides readers with theoretical foundations and practical aspects of designing materials for EFL/ESL contexts. It starts with discussing some basic and preliminary principles of materials design followed by scrutinizing critical issues in materials development in an objective and systematic way. This ranges from considering learners' needs, adopting, adapting, selection, and gradation of materials to the specific focus of the book on developing various types of materials for the four language skills, pronunciation, ESP vocabulary, and computer assisted language learning materials. Authenticity of materials to be designed and the inclusion of affective factors to develop motivating materials to engage language learners, in addition to features of materials design at a universal

level are other areas to read about. This book finally tries to open new horizons and possible futuristic approaches to improve today's ELT materials.

A dazzling treasury of vintage cryptics from puzzle maven Henry Hook. Selected from out-of-print books, these cryptics have been described as "challenges from the far side of puzzledom's new wave" by the Copley News Service. Cryptics are crosswords with a twist, and Hook makes even the most confident cryptic solver work to find the answers cleverly hidden amidst anagrams, reversals, homophones, and palindromes. The most contemporary verbal wizard on the scene, Hook laces his puzzles with a playful wit, uncanny linguistic trickery, and as many references to pop culture as to high art. Representing the ultimate in puzzle creativity, this collection is a must for all fans of serious wordplay.
