It's show time for learning! Improve Grade 5 students' reading fluency while providing fun and purposeful reading practice for performance. You'll motivate students with these easy-to-implement reader's theater scripts that also build students' knowledge through grade-level content. Book includes 12 original leveled scripts, graphic organizers, and a Teacher Resource CD including scripts, PDFs, and graphic organizers. This resource is correlated to the Common Core State Standards. 104pp.

*Readers Theatre Comes to Church* Teacher Created Materials

As the nature of contemporary performance continues to expand into new forms, genres and media, it requires an increasingly diverse vocabulary. *Reading Contemporary Performance* provides students, critics and creators with a rich understanding of the key terms and ideas that are central to any discussion of this evolving theatricality. Specially commissioned entries from a wealth of contributors map out the many and varied ways of discussing performance in all of its forms – from theatrical and site-specific performances to live and New Media art. The book is divided into two sections: Concepts - Key terms and ideas arranged according to the five characteristic elements of performance art: time; space; action; performer; audience. Methodologies and Turning Points - The seminal theories and ways of reading performance, such as postmodernism, epic theatre, feminisms, happenings and animal studies. Case Studies - entries in both sections are accompanied by short studies of specific performances and events, demonstrating creative examples of the ideas and issues in question. Three different introductory essays provide multiple entry points into the discussion of contemporary performance, and cross-references for each entry also allow the plotting of one's own pathway. *Reading Contemporary Performance* is an invaluable guide, providing not just a solid set of familiarities, but an exploration and contextualisation of this broad and vital field.

**Sustainable Theatre: Theory, Context, Practice** Elsevier

4th-7th eds. contain a special chapter on The role and function of the thesaurus in education, by Frederick Goodman.

Ecological Approaches to Early Modern English Texts Routledge

Improve reading fluency while providing fun and purposeful practice for performance. Motivate students with this reader's theater script and build students' knowledge through grade-level content. Included graphic organizer helps visual learners.

*Nonfiction Readers Theatre for Beginning Readers* Routledge

Teachers and librarians are continually looking for an interesting, fun way to input content knowledge to build that background information which will help push up student expository reading scores. Nonfiction readers theatre is one way to accomplish this. Professor Fredericks offers 30 short

nonfiction readers theatre plays for the young reader (grades 1-3) on topics ranging from earth and natural science to community helpers, holidays, and government. Test scores across the country show American students are far more able to read narrative than nonfiction text. Some research speculates this is due to a great lack in the background knowledge of many children. Librarians are beginning to realize that a unique fit for the school librarian is as a provider of background knowledge materials for teachers to use.

**The Community Performance Reader** Bloomsbury Publishing

The eponymous alchemist of Ben Jonson's quick-fire comedy is a fraud: he cannot make gold, but he does make brilliant theatre. *The Alchemist* is a masterpiece of wit and form about the self-delusions of greed and the theatricality of deception. This guide is useful to a diverse assembly of students and scholars, offering fresh new ways into this challenging and fascinating play.

The Roly-Poly Spider John Wiley & Sons

This book is the first definitive publication to consider the intersections of applied theatre and the Sustainable Development Goals (SDGs) – a series of goals which have shaped development and social justice initiatives from 2015 to 2030. It brings together emerging and leading scholars and practitioners engaged in creative and community contexts globally. In so doing, the book offers critical insights to explore the convergences, complexities, and tensions of working within development frameworks, through theatre. Divided into three thematic areas, it maps out the ways in which applied theatre has related to the SDGs, examines issues with global collaborations, and, as 2030 approaches and the SDG era draws to a close, interrogates such practices, envisioning what the role of applied theatre might be in the post-SDG era. The book provokes reflection about this specific era of applied theatre and global development, as well as discussion regarding what comes next. This volume will be of importance to students, artists, scholars, practitioners, and policymakers working in applied theatre and the field of development.

**People's Daily Graphic** Macmillan Reference USA

*Theatre and the Virtual* lays out a set of conceptual instruments for the articulation and engendering of the forces of theatrical potentiality. Creating a passage toward a reconstitution of the given, a theatre of the virtual opens bodies in motion to a region of an ongoing genesis of forces. The outcome: regimes of constraint are abandoned through a radical practice of ecological attunement. Violence is eschewed through an onto-ecology of touch. Closed systems are repotentialised to become co-constitutive of their environments. A logic of spectrality settles in—not so much entities as atmospheres, not so much a being as a style of being, not so much a body as multitudinous milieus of response. This is the task of a theatre of the virtual—to safeguard the possibility of the extra-epistemological and uphold one's right to offer accounts of oneself from outside of being, all the while creating a fractured record of the wondrous mutations of a moving, gesturing body. This book will be of great interest to students and scholars in theatre, philosophy, new materialisms, environmental humanities, gesture, and the ontology of response.

We Are Water Protectors U of Minnesota Press

This easy-to-read guide provides new and seasoned teachers with practical ideas, strategies, and insights to help address essential topics in effective science teaching, including emphasizing inquiry, building literacy, implementing technology, using a wide variety of science resources, and maintaining student safety.

*Catalog* John Wiley & Sons

A study into the relationships between performance, theatre and environmental ecology.

Green Economy Reader Simon and Schuster

Community Performance: A Reader is the first book to provide comprehensive teaching materials for this significant part of the theatre studies curriculum. It brings together core writings and critical approaches to community performance work, presenting practices in the UK, USA, Australia and beyond. Offering a comprehensive anthology of key writings in the vibrant field of community performance, spanning dance, theatre and visual practices, this Reader uniquely combines classic writings from major theorists and practitioners such as Augusto Boal, Paolo Freire, Dwight Conquergood and Jan Cohen Cruz, with newly commissioned essays that bring the anthology right up to date with current practice. This book can be used as a stand-alone text, or together with its companion volume, Community Performance: An Introduction, to offer an accessible and classroom-friendly introduction to the field of community performance.

Ecology and Management of Inland Waters Taylor & Francis

Improve Fluency, Vocabulary, and Comprehension. Motivate students and improve fluency with fun repeated reading.

**Ecological Crisis and Cultural Representation in Latin America** Scholastic Incorporated

From author Carole Lindstrom and illustrator Michaela Goade comes a New York Times bestselling and Caldecott Medal winning picture book that honors Indigenous-led movements across the world. Powerfully written and gorgeously illustrated, *We Are Water Protectors*, issues an urgent rallying cry to safeguard the Earth's water from harm and corruption—inviting young readers everywhere to join the fight. Water is the first medicine. It affects and connects us all . . . When a black snake threatens to destroy the Earth And poison her people's water, one young water protector Takes a stand to defend Earth's most sacred resource. The fight continues with Autumn Peltier, *Water Warrior*, the must-read companion book to *We Are Water Protectors*. Written by Carole Lindstrom and illustrated by Bridget George, it tells the story of real-life water protectors, Autumn Peltier and her great-aunt Josephine Mandamin, two Indigenous Rights Activists who have inspired a tidal wave of change.

Swim Pretty Routledge

This book is response to the recent surge of formidable voices that consistently demean and attempt to reverse the gains of pan-Africanism. Besides questioning its relevance, these voices

supplant essential tenets of pan-Africanism – Blackness, the narrative of Return, sanctity of the ancestral homeland, exposition of evils of colonialism and African Literature – with new postulations. These new suppositions deny race, accentuate onward migration and diminish the ancestral homeland to any ordinary city to globetrot. These voices liken any reminiscence of colonial evils to Afro-pessimism, pronounce African Literature dead on arrival and proceed to 'substitute' pan-Africanism through studies, which neglect pioneer and contemporary literary works, cultural productions, folklore, conversations on social media (blogs, Facebook, WhatsApp) and questionnaires to gauge their influence among Black peoples themselves. This study adopts a design that interrogates literary works, data from questionnaires and social media to determine the relevance and influence of pan-Africanism and the new paradigm.

*Theatre and the Virtual Shell* Education

Introductory textbook using the entire range of tropical ecosystems - terrestrial, freshwater and marine - to illustrate and explain major ecological concepts.

**Ecology of Freshwaters** Bloomsbury Publishing USA

Linda Hoyt's Interactive Read-Alouds will help you make the most of read-aloud time by showing you creative ways to use popular children's literature to teach standards, fluency, and comprehension. Combining award-winning text and engaging conversations with reflective thinking, Linda's lessons will add drama to your literacy block and will teach your young readers strategies they will use across the curriculum.

**Improve Fluency, Vocabulary, and Comprehension, Grade 4** Springer

This is an updated and expanded edition of the first book on how to use Readers Theatre for worship, teaching, and evangelism. A definitive and helpful manual for pastors and Christian Education Directors. Included are five chapters on principles, procedures, and resources, along with 10 sample scripts. Excellent reference for retreat, conference, class, and workshop planning.

All About Oceans Reader's Theater Script and Lesson Taylor & Francis

Modeling a disability culture perspective on performance practice toward socially just futures In *Eco Soma*, Petra Kupperts asks readers to be alert to their own embodied responses to art practice and to pay attention to themselves as active participants in a shared sociocultural world. Reading contemporary performance encounters and artful engagements, this book models a disability culture sensitivity to living in a shared world, oriented toward more socially just futures. *Eco soma* methods mix and merge realities on the edges of lived experience and site-specific performance. Kupperts invites us to become moths, sprout gills, listen to our heart's drum, and take starships into crip time. And fantasy is central to these engagements: feeling/sensing monsters, catastrophes, golden lines, heartbeats, injured sharks, dotted salamanders, kissing mammoths, and more. Kupperts illuminates eco-poetic disability culture perspectives, contending that disabled people and their co-conspirators make art to live in a changing world, in contact with feminist, queer, trans, racialized, and Indigenous art projects. By offering new ways to think, frame, and feel "environments," Kupperts focuses on art-based methods of envisioning change and argues that disability can offer imaginative ways toward living well and with agency in change, unrest, and challenge. Traditional somatics teach us how to fine-tune our introspective senses and to open up the world of our own bodies, while *eco soma* methods extend that attention toward the creative possibilities of the reach between self,

others, and the land. Eco Soma proposes an art/life method of sensory tuning to the inside and the outside simultaneously, a method that allows for a wider opening toward ethical cohabitation with human and more-than-human others.

**Theatre Ecology** Routledge

The new edition of this established textbook, now with full colour illustration, has been extensively revised and continues to provide a comprehensive, stimulating, readable and authoritative coverage of freshwater habitats, their communities and their functioning, the world over. The work will be of great value to undergraduate and graduate students, fellow researchers and water managers, and the plain language and lack of jargon should make it accessible to anyone interested in the functioning and current state of lakes and rivers. Having taught and researched over fifty years and

six continents, Professor Brian Moss makes here extensive use of his personal experience as well as the huge literature now available on freshwaters. This is the fifth edition of his textbook, which, since the first edition in 1980, has steadily evolved to reflect a rapidly changing science and environment. It places increasing emphasis on the role of people in damaging and managing freshwaters as we move into the Anthropocene epoch and face unprecedented levels of climate and other changes, whilst rejoicing in the fascination of what are left of near pristine freshwater ecosystems. Professor Moss retired from the University of Liverpool following a career in Africa, the USA and the UK. He was awarded medals by the International Society for Limnology, of which he was President from 2007 to 2013, and The Institute of Ecology and Environmental Management. He was given The Ecology Institute's Excellence in Ecology Prize in 2009 and the book written for that prize, *Liberation Ecology*, was awarded the British Ecological Society's best ecology book prize in 2013.
