Life History of a Fossil University of Arizona Press

In 2000, Jakob Nielsen, the world's leading expert on Web usability, published a book that changed how people think about the Web— *Designing Web Usability* (New Riders). Many applauded. A few jeered. But everyone listened. The best-selling usability guru is back and has revisited his classic guide, joined forces with Web usability consultant Hoa Loranger, and created an updated companion book that covers the essential changes to the Web and usability today. *Prioritizing Web Usability* is the guide for anyone who wants to take their Web site(s) to next level

and make usability a priority! Through the authors' wisdom, experience, and hundreds of real-world user tests and contemporary Web site critiques, you'll learn about site design, user experience and usability testing, navigation and search capabilities, old guidelines and prioritizing usability issues, page design and layout, content design, and more!

These nineteen theoretical and methodological papers, which were presented in sessions held by the EAA in Lisbon in 2000 and in Esslingen in 2001, examine constructions and architectonic spaces' from an archaeological perspective. The buildings discussed comprise both wooden and stone structures discovered during excavations that covered the prehistoric to modern periods. In addition to purely theoretical papers, case studies look

at structures in Ethiopia, Mongolia, across the Roman empire and in medieval France, Spain and Lithuania. Illustrated throughout.

This book offers a new approach to the problem of Slavic ethnicity in southeastern Europe between c. 500 and c. 700. The author shows how Byzantine authors "invented" the Slavs, in order to make sense of political and military developments taking place in the Balkans. Making extensive use of archaeology to show that such developments resulted in the rise of powerful leaders, responsible for creating group identities and mobilizing warriors for successful raids across the frontier. The author rejects the idea of Slavic migration, and shows that "the Slavs" were the product of the frontier.

Odontoiatria restaurativa. Procedure di trattamento e prospettive future Routledge

After seven months of restoration, and a hard management for its purchase, the House of Juan O'Gorman projected in 1929 will reopen its doors in 2016. Located in front of the former Hacienda de Goicochea (today San Ángel Inn restaurant) was built in what was the tennis courts of the estate, lands acquired by Juan O'Gorman with the payment of fees for his collaborations with Carlos Obregón Santacilia. Completed in 1929, it is considered as 'the first functionalist home' in Mexico, in which intentionally simplifies the naked use of concrete slabs and makes the slenderness of the posts look, evoking the "Maisons domino" of Le Corbusier (1914).

Aves de piedra, barro y oro en la Costa Rica precolombina British Archaeological Reports Oxford Limited

The origin and early development of social stratification is

essentially an archaeological problem. The impressive advance of archaeological research has revealed that, first and foremost, the pre-eminence of stratified or class society in today's world is the result of a long social struggle. This volume advances the archaeological study of social organisation in Prehistory, and more specifically the rise of social complexity in European Prehistory. Within the wider context of world Prehistory, in the last 30 years the subject of early social stratification and state formation has been a key subject on interest in Iberian Prehistory. This book illustrates the differing forms of resistances, the interplay between change and continuity, the multiple paths to and from social complexity, and the 'failures' of states to form in Prehistory. It also engages with broader questions, such as: when did social stratification appear in western European Prehistory? What factors contributed to its emergence and consolidation? What are the relationships between the notions of social complexity, social inequality, social stratification and statehood? And what are the archaeological indicators for the empirical analysis of these issues? Focusing on Iberia, but with a permanent connection to the wider geographical framework, this book presents, for the first time, a chronologically comprehensive, up-to-date approach to the issue of state formation in prehistoric Europe.

Qsar Es-Seghir Oxford University Press

This publication offers a framework for the empowerment of people living in poverty throughout the world that concentrates on increasing people's freedom of choice and action to shape their own lives. Based on analysis of practical experiences, the book identifies four key elements to support empowerment:

information, inclusion and participation, improved accountability and local organisational capacity. This framework is then applied to five areas of action to improve development effectiveness: provision of basic services, improved local governance, improved national governance, pro-poor market development, and access to justice and legal aid. It also offers twenty 'tools and practices' which concentrate on a wide-range of topics to support the empowerment of the poor.

Evaluation, Diagnosis, and Treatment of Occlusal Problems Penguin UK

Beginning with a general overview of nanocomposites, *Bionanocomposites: Integrating Biological Processes for Bio-inspired Nanotechnologies* details the systems available in nature (nucleic acids, proteins, carbohydrates, lipids) that can be integrated within suitable inorganic matrices for specific applications. Describing the relationship between architecture, hierarchy and function, this book aims at pointing out how bio-systems can be key components of nanocomposites. The text then reviews the design principles, structures, functions and applications of bionanocomposites. It also includes a section presenting related technical methods to help readers identify and understand the most widely used analytical tools such as mass spectrometry, calorimetry, and impedance spectroscopy, among others.

Education and Development Wiley-Blackwell

Education has been recognized as critical to the success of economic policies, equitable income distribution and the reduction of poverty. However, just when more and better education is needed, much of the world's population is being left

behind. As successful participation in the world economy becomes more knowledge-intensive, many countries face the challenge of improving their educational systems. To varying degrees they must : a) bring their education up-to-date in transmitting knowledge and skills for dealing with the problems of the future; b) equalize access to high quality schooling; c) raise the level of math, language, and science acquisition; d) improve the effectiveness of educational resources; e) develop new approaches to schooling the disadvantaged; and f) develop mechanisms for the generation, acquisition, and application of appropriate knowledge.

Communication, Culture and Hegemony Elsevier

The aim of *Biodental Engineering* is to solidify knowledge of bioengineering applied to dentistry. Dentistry is a branch of medicine with its own peculiarities and very diverse areas of action, and in recent years multiple new techniques and technologies have been introduced. This book is a collection of keynote lectures and full papers from Bio

Culture: urban future University of Chicago Press

Una vez más la botadura de un barco lleno de ideas, de ideas expresadas a través de las palabras de los textos que conforman un libro. Un libro lleno de ideas transmitidas a través de los escritos claros de un conjunto de profesores y de arquitectos invitados a las clases de la Escuela TS de Arquitectura de Madrid. Todos ellos, los profesores que colaboran con el autor y los invitados, son extraordinariamente valiosos. Y todos ellos han elaborado unos textos certeros. Se ha querido respetar en el caso de los extranjeros la lengua original, para dar fe de universalidad. La estructura no sólo soporta, no sólo aguanta, sino que resuena,

suenan como un instrumento musical cuando es acordado por el aire. Y así será falsa la libertad del arquitecto que, olvidado de la estructura, concite sólo formas a las que, una vez definidas, añadiera o mandara añadir una estructura capaz de soportarlas. Y así, cuando se genera la idea cuya necesaria materialización nos dará la Arquitectura, la estructura portante, el cómo aquello va a sostenerse, debe estar claro desde el primer momento. Este conjunto de textos tomó forma de publicación, con la seguridad de que este barco lleno de ideas, llegará a muy buen puerto.

INFOODS Food Composition Data Interchange Handbook CP67

Ultrasound in Liquid and Solid Metals focuses on the effect of intensive ultrasound on metals, including the analysis of the development of cavitation and acoustic flows in melts, mechanism of metals' spraying and crystallization, the formation of dislocation structure in crystals, diffusion, phase transformation, and plastic deformation. Physical fundamentals of intensive ultrasound effects are covered, and detailed discussions are presented on the engineering principles of equipment and material design for the practical use of ultrasound in the refining of melts, crystallization of ingots and molds, pulverization, plating, pressure working of metals, surface strengthening, and other processes.

The Prehistory of Iberia Pearson Education

Pat Shipman sets forth the taphonomic methods of analyzing how animal remains are acted upon and altered, both by biological and by geographic phenomena, in their passage from the biosphere of bones and carcass into the lithosphere of fossils. She explains the role of disease, predation, accidents, postmortem destruction, and transport in the life history of a fossil, and

provides an introduction to the relevant geological concepts and to faunal analysis.

Quantifying Archaeology Elsevier

Collecting David Harvey's finest work on Paris during the second empire, Paris, Capital of Modernity offers brilliant insights ranging from the birth of consumerist spectacle on the Parisian boulevards, the creative visions of Balzac, Baudelaire and Zola, and the reactionary cultural politics of the bombastic Sacre Couer. The book is heavily illustrated and includes a number of drawings, portraits and cartoons by Daumier, one of the greatest political caricaturists of the nineteenth century.

With more than 2,080 vibrant, full-color clinical photographs, this book presents the Italian Academy of Conservative Dentistry's authoritative coverage of endodontics, cosmetics, prosthodontics, traumatology, and general operative principles with unparalleled visual detail. This atlas-style resource guides you step-by-step through essential procedures and presents realistic case scenarios to help you deepen your understanding of restorative principles and successfully apply your knowledge to patient treatment. More than 2,200 world-class photographs provide rich clinical detail to enhance your understanding of commonly encountered conditions. Step-by-step procedures in each chapter are integrated with interesting case studies to clarify techniques and help you confidently apply concepts in the clinical setting. Summary boxes provide fast access to key chapter content. Clinical approach reflects the trusted expertise of the Accademia Italiana di Conservativa (Italian Academy of Conservative Dentistry) and familiarizes you with the latest scientific research

and treatment techniques.

Paris, Capital of Modernity New York : Oxford University Press
Volcanic eruptions are generally viewed as agents of destruction, yet they provide the parent materials from which some of the most productive soils in the world are formed. The high productivity results from a combination of unique physical, chemical and mineralogical properties. The importance and uniqueness of volcanic ash soils are exemplified by the recent establishment of the Andisol soil order in Soil Taxonomy. This book provides the first comprehensive synthesis of all aspects of volcanic ash soils in a single volume. It contains in-depth coverage of important topics including terminology, morphology, genesis, classification, mineralogy, chemistry, physical properties, productivity and utilization. A wealth of data (37 tables, 81 figures, and Appendix) mainly from the Tohoku University Andisol Data Base is used to illustrate major concepts. Twelve color plates provide a valuable visual-aid and complement the text description of the world-wide distribution for volcanic ash soils. This volume will serve as a valuable reference for soil scientists, plant scientists, ecologists and geochemists interested in biogeochemical processes occurring in soils derived from volcanic ejecta.

Museo del Jade Princeton University Press

Looks at the emerging phenomenon of online journalism, including Weblogs, Internet chat groups, and email, and how anyone can produce news.

Archaeotecture John Wiley & Sons

'A groundbreaking work . . . Federici has become a crucial figure for . . . a new generation of feminists' Rachel Kushner, author of

The Mars Room A cult classic since its publication in the early years of this century, *Caliban and the Witch* is Silvia Federici's history of the body in the transition to capitalism. Moving from the peasant revolts of the late Middle Ages through the European witch-hunts, the rise of scientific rationalism and the colonisation of the Americas, it gives a panoramic account of the often horrific violence with which the unruly human material of pre-capitalist societies was transformed into a set of predictable and controllable mechanisms. It is a study of indigenous traditions crushed, of the enclosure of women's reproductive powers within the nuclear family, and of how our modern world was forged in blood. 'Rewarding . . . allows us to better understand the intimate relationship between modern patriarchy, the rise of the nation state and the transition from feudalism to capitalism' Guardian

El emprendimiento es un determinante fundamental del crecimiento y la creación de empleo. Pese a que los emprendedores abundan en América Latina y el Caribe, las empresas de la región son más pequeñas y menos propensas a crecer e innovar que las de otras regiones. El crecimiento de la

productividad lleva décadas siendo mediocre y el reciente periodo de auge de las materias primas no ha supuesto una excepción. Así pues, la presencia de emprendedores dinámicos será necesaria para impulsar la creación de puestos de trabajo de calidad y la aceleración del crecimiento de la productividad en la región. En El emprendimiento en América Latina: muchas empresas y poca innovación se estudia el panorama del emprendimiento en América Latina y el Caribe. El libro recurre a nuevas bases de datos que abordan cuestiones como la creación de empresas, las dinámicas empresariales, las decisiones de

exportar y el comportamiento de las corporaciones multinacionales y sintetiza los resultados de un análisis exhaustivo del estatus, las perspectivas y los retos del emprendimiento en la región. Asimismo, el libro suministra herramientas útiles e información para ayudar a los profesionales y responsables de las políticas a identificar los ámbitos de las mismas que los gobiernos pueden explorar para impulsar la innovación e incentivar el emprendimiento transformador con potencial de crecimiento elevado.
