 With more than 2,080 vibrant, full-color clinical photographs, this
 book presents the Italian Academy of Conservative Dentistry's
 authoritative coverage of endodontics, cosmetics, prosthodontics,
 traumatology, and general operative principles with unparalleled
 visual detail. This atlas-style resource guides you step-by-step
 through essential procedures and presents realistic case
 scenarios to help you deepen your understanding of restorative
 principles and successfully apply your knowledge to patient
 treatment. More than 2,200 world-class photographs provide rich

clinical detail to enhance your understanding of commonly encountered conditions. Step-by-step procedures in each chapter are integrated with interesting case studies to clarify techniques and help you confidently apply concepts in the clinical setting. Summary boxes provide fast access to key chapter content. Clinical approach reflects the trusted expertise of the Accademia Italiana di Conservativa (Italian Academy of Conservative Dentistry) and familiarizes you with the latest scientific research and treatment techniques.

Tartessos and the Phoenicians in Iberia CUP Archive

These nineteen theoretical and methodological papers, which were presented in sessions held by the EAA in Lisbon in 2000 and in Esslingen in 2001, examine constructions and architectural spaces' from an archaeological perspective. The buildings discussed comprise both wooden and stone structures discovered during excavations that covered the prehistoric to modern periods. In addition to purely theoretical papers, case studies look at structures in Ethiopia, Mongolia, across the Roman empire and in medieval France, Spain and Lithuania. Illustrated throughout.

Letters Written in the Interior of Cuba Wiley-Blackwell

Volcanic eruptions are generally viewed as agents of destruction, yet they provide the parent materials from which some of the most productive soils in the world are formed. The high productivity results from a combination of unique physical, chemical and mineralogical properties. The importance and uniqueness of volcanic ash soils are exemplified by the recent establishment of the Andisol soil order in Soil Taxonomy. This book provides the first comprehensive synthesis of all aspects of volcanic ash soils in a single volume. It contains in-depth

coverage of important topics including terminology, morphology, genesis, classification, mineralogy, chemistry, physical properties, productivity and utilization. A wealth of data (37 tables, 81 figures, and Appendix) mainly from the Tohoku University Andisol Data Base is used to illustrate major concepts. Twelve color plates provide a valuable visual-aid and complement the text description of the world-wide distribution for volcanic ash soils. This volume will serve as a valuable reference for soil scientists, plant scientists, ecologists and geochemists interested in biogeochemical processes occurring in soils derived from volcanic ejecta.

Museo del Jade Routledge

This is the first book in English about the earliest historical civilization in the western Mediterranean, known as "Tartessos". It combines the expertise of its two authors in archaeology, philology, and cultural history to present a comprehensive, coherent, theoretically up-to-date, and informative overview of the discovery, sources, and debates surrounding this puzzling culture of ancient Iberia and its complex hybrid identity vis-à-vis the western Phoenicians.

Constructive Education for Adolescents Ediciones Especializadas Europeas

This book introduces archaeologists to the most important quantitative methods, from the initial description of archaeological data to techniques of multivariate analysis. These are presented in the context of familiar problems in archaeological practice, an approach designed to illustrate their relevance and to overcome the fear of mathematics from which archaeologists often suffer.

Culture: urban future "O'Reilly Media, Inc."

Examines differences in taste between modern French classes, discusses the relationship between culture and politics, and outlines the strategies of pretension.

El emprendimiento es un determinante fundamental del crecimiento y la creación de empleo. Pese a que los emprendedores abundan en América Latina y el Caribe, las empresas de la región son más pequeñas y menos propensas a crecer e innovar que las de otras regiones. El crecimiento de la productividad lleva décadas siendo mediocre y el reciente periodo de auge de las materias primas no ha supuesto una excepción. Así pues, la presencia de emprendedores dinámicos será necesaria para impulsar la creación de puestos de trabajo de calidad y la aceleración del crecimiento de la productividad en la región. En *El emprendimiento en América Latina: muchas empresas y poca innovación* se estudia el panorama del emprendimiento en América Latina y el Caribe. El libro recurre a nuevas bases de datos que abordan cuestiones como la creación de empresas, las dinámicas empresariales, las decisiones de exportar y el comportamiento de las corporaciones multinacionales y sintetiza los resultados de un análisis exhaustivo del estatus, las perspectivas y los retos del emprendimiento en la región. Asimismo, el libro suministra herramientas útiles e información para ayudar a los profesionales y responsables de las políticas a identificar los ámbitos de las mismas que los gobiernos pueden explorar para impulsar la innovación e incentivar el emprendimiento transformador con potencial de crecimiento elevado.

Report presents a series of analyses and recommendations for fostering the role of culture for sustainable development. Drawing on a global survey implemented with nine regional partners and insights from scholars, NGOs and urban thinkers, the report offers a global overview of urban heritage safeguarding, conservation and management, as well as the promotion of cultural and creative industries, highlighting their role as resources for sustainable urban development. Report is intended as a policy framework document to support governments in the implementation of the 2030 Agenda for Sustainable Urban Development and the New Urban Agenda.

The Prehistory of Iberia British Archaeological Reports Oxford Limited

Education has been recognized as critical to the success of economic policies, equitable income distribution and the reduction of poverty. However, just when more and better education is needed, much of the world's population is being left behind. As successful participation in the world economy becomes more knowledge-intensive, many countries face the challenge of improving their educational systems. To varying degrees they must : a) bring their education up-to-date in transmitting knowledge and skills for dealing with the problems of the future; b) equalize access to high quality schooling; c) raise the level of math, language, and science acquisition; d) improve the effectiveness of educational resources; e) develop new approaches to schooling the disadvantaged; and f) develop mechanisms for the generation, acquisition, and application of

appropriate knowledge.

Labor Dental Técnica No6 Vol.25 Elsevier

Communication, Culture and Hegemony is the first English translation of this major contribution to cultural studies in media research. Building on British, French and other European traditions of cultural studies, as well as a brilliant synthesis of the rich and extensive research of Latin American scholars, Mart[ac]in-Barbero offers a substantial reassessment of critical media theory.

The Evolution of Political Systems CP67

Pat Shipman sets forth the taphonomic methods of analyzing how animal remains are acted upon and altered, both by biological and by geographic phenomena, in their passage from the biosphere of bones and carcass into the lithosphere of fossils. She explains the role of disease, predation, accidents, postmortem destruction, and transport in the life history of a fossil, and provides an introduction to the relevant geological concepts and to faunal analysis.

In 2000, Jakob Nielsen, the world's leading expert on Web usability, published a book that changed how people think about the Web— *Designing Web Usability* (New Riders). Many applauded. A few jeered. But everyone listened. The best-selling usability guru is back and has revisited his classic guide, joined forces with Web usability consultant Hoa Loranger, and created an updated companion book that covers the essential changes to the Web and usability today. *Prioritizing Web Usability* is the guide for anyone who wants to take their Web site(s) to next level and make usability a priority! Through the authors' wisdom, experience, and hundreds of real-world user tests and contemporary Web site critiques, you'll learn about site design, user experience and usability testing, navigation and search capabilities, old guidelines and prioritizing usability issues, page design and layout, content design, and more!

The Making of the Slavs Elsevier srl

A scholarly and physically stunning presentation of the use of bird imagery in pre-Columbian Costa Rican art, with an equal balance of photos and text. Includes indigenous culture, contemporary links, and comparative photos of artifacts and actual birds

Lukurmata University of Chicago Press

Cities of Tomorrow is a critical history of planning in theory and practice in the twentieth century, as well as of the social and economic problems and opportunities that gave rise to it. Trenchant, perceptive, global in coverage, this book is an unrivalled account of its crucial subject. The third edition of *Cities of Tomorrow* is comprehensively revised to take account of

abundant new literature published since its original appearance, and to view the 1990s in historical perspective. This is the definitive edition, reviewing the development of the modern planning movement over the entire span of the twentieth century.

Education and Development Oxford University Press

The origin and early development of social stratification is essentially an archaeological problem. The impressive advance of archaeological research has revealed that, first and foremost, the pre-eminence of stratified or class society in today's world is the result of a long social struggle. This volume advances the archaeological study of social organisation in Prehistory, and more specifically the rise of social complexity in European Prehistory. Within the wider context of world Prehistory, in the last 30 years the subject of early social stratification and state formation has been a key subject on interest in Iberian Prehistory. This book illustrates the differing forms of resistances, the interplay between change and continuity, the multiple paths to and from social complexity, and the 'failures' of states to form in Prehistory. It also engages with broader questions, such as: when did social stratification appear in western European Prehistory? What factors contributed to its emergence and consolidation? What are the relationships between the notions of social complexity, social inequality, social stratification and statehood? And what are the archaeological indicators for the empirical analysis of these issues? Focusing on Iberia, but with a permanent connection to the wider geographical framework, this book presents, for the first time, a chronologically comprehensive, up-to-date approach to the issue of state

formation in prehistoric Europe.

Communication, Culture and Hegemony University of Arizona Press

Ultrasound in Liquid and Solid Metals focuses on the effect of intensive ultrasound on metals, including the analysis of the development of cavitation and acoustic flows in melts, mechanism of metals' spraying and crystallization, the formation of dislocation structure in crystals, diffusion, phase transformation, and plastic deformation. Physical fundamentals of intensive ultrasound effects are covered, and detailed discussions are presented on the engineering principles of equipment and material design for the practical use of ultrasound in the refining of melts, crystallization of ingots and molds, pulverization, plating, pressure working of metals, surface strengthening, and other processes.

Archaeotecture SAGE Publications Limited

Technics and Civilization first presented its compelling history of the machine and critical study of its effects on civilization in 1934—before television, the personal computer, and the Internet even appeared on our periphery. Drawing upon art, science, philosophy, and the history of culture, Lewis Mumford explained the origin of the machine age and traced its social results, asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution. Mumford sagely argued that it was the moral, economic, and political choices we made, not the machines that we used, that determined our then industrially driven economy. Equal parts powerful history and polemic criticism, Technics and Civilization was the first comprehensive attempt in English to portray the

development of the machine age over the last thousand years—and to predict the pull the technological still holds over us today. “The questions posed in the first paragraph of *Technics and Civilization* still deserve our attention, nearly three quarters

of a century after they were written.”—*Journal of Technology and Culture*
