**Hidden Histories** Simon and Schuster  
As soon as men began to write, they made Helen of Troy their subject; for close on three thousand years she has been both the embodiment of absolute female beauty and a reminder of the terrible power that beauty can wield. Because of her double marriage to the Greek King Menelaus and the Trojan Prince Paris, Helen was held responsible

for an enduring enmity between East and West. For millennia she has been viewed as an exquisite agent of extermination. But who was she?

»Roman Charity« investigates the iconography of the breastfeeding daughter from the perspective of queer sexuality and erotic maternity. The volume explores the popularity of a topic that appealed to early modern observers for its eroticizing shock value, its ironic take on the concept of Catholic

»charity«, and its implied critique of patriarchal power structures. It analyses why early modern viewers found an incestuous, adult breastfeeding scene »good to think with« and aims at expanding and queering our notions of early modern sexuality. Jutta Gisela Sperling discusses the different visual contexts in which »Roman Charity« flourished and reconstructs contemporary horizons of expectation by reference to literary sources, medical practice, and legal culture.

An updated edition of the classic history of schizophrenia in America, which gives voice to generations of patients who suffered through "cures" that only deepened their suffering and impaired their hope of recovery. Schizophrenics in the United States currently fare worse than patients in the world's poorest countries. In *Mad in America*, medical journalist Robert Whitaker argues that modern treatments for the severely mentally ill are just old medicine in new bottles, and that we as a society are deeply deluded about their efficacy. The widespread use of lobotomies in the 1920s and 1930s gave way in the 1950s to electroshock and a wave of new drugs. In what is perhaps Whitaker's

most damning revelation, *Mad in America* examines how drug companies in the 1980s and 1990s skewed their studies to prove that new antipsychotic drugs were more effective than the old, while keeping patients in the dark about dangerous side effects. A haunting, deeply compassionate book -- updated with a new introduction and prologue bringing in the latest medical treatments and trends -- *Mad in America* raises important questions about our obligations to the mad, the meaning of "insanity," and what we value most about the human mind.

An end to greenhouse gas emissions, a global framework to control nuclear proliferation, a preemptive remedy to looming water wars, and unlimited

energy worldwide are just a few of the concrete solutions offered up in Tom Blees's brilliant and timely *Prescription for the Planet*. Everyone is worried about global warming, energy wars, resource depletion, and air pollution. But nobody has yet come up with a real plan to resolve these problems that can actually work--until now. *Prescription for the Planet* proposes a workable blueprint to virtually eliminate greenhouse gas emissions by the middle of this century and solve a host of other seemingly intractable global problems. Solving our planet's most pressing dilemmas requires more than simply setting goals. We need a roadmap to reach them. Technologies that work fine on a small scale cannot necessarily be ramped up to global size. Worldwide environmental

and social problems require a bold vision for the future that includes feasible planet-wide solutions with all the details. Prescription for the Planet explains how a trio of little-known yet profoundly revolutionary technologies, coupled with their judicious use in an atmosphere of global cooperation, can be the springboard that carries humanity to an era beyond scarcity. And with competition for previously scarce resources no longer an issue, the main incentives for warfare will be eliminated. Explaining not only the means to solve our most pressing problems but how those solutions can painlessly lead to improving the standard of living of everyone on the planet, Blee's lucid and provocatively written Prescription for the Planet has arrived not a moment too

soon. There is something here for everyone, be they a policymaker, environmental activist, or any concerned citizen hoping for a better future.

Think about that first tickle of hunger in your stomach. A moment ago, you could have been thinking about anything, but now it's thickly buttered marmite toast, a frosty scoop of ice cream straight from the tub, some creamy, cheesy scrambled eggs or a fuzzy, perfectly-ripe peach. Eating is one of life's greatest pleasures. Food nourishes our bodies, helps us celebrate our successes (from a wedding cake to a post-night out kebab), cheers us up when we're down, introduces us to new cultures and - when we cook and

eat together - connects us with the people we love. In *Eat Up*, Ruby Tandoh celebrates the fun and pleasure of food, taking a look at everything from gluttons and gourmets in the movies, to the symbolism of food and sex. She will arm you against the fad diets, food crazes and bad science that can make eating guilt-laden and expensive, drawing eating inspiration from influences as diverse as Moonlight, Rihanna and Gemma from TOWIE. Filled with straight-talking, sympathetic advice on everything from mental health to recipe ideas and shopping tips, this is a book that clears away the fog, to help you fall back in love with food.

The story of Jonah is sacred to all three Abrahamic faiths and remains a recognizable legend even in the most

secularized corners of the West. And yet the maritime prophet's story has been trivialized as a quaint children's tale, his character has been blasted by unsympathetic commentators, and even his alleged tomb has now been destroyed by Islamic State militants who, in 2014, took the city of Mosul on the Nineveh Plains. Now that Nineveh is once again in the grip of tyrannical violence and communities across the West and the Middle East are deep in a time of discord and soul-searching, we might do well to recover the story of Jonah, a guiding light, who marches into the very heart of empire and confronts it with the radical politics of the kingdom of God, even as his own certainties are shaken to the core. "David Blower has written a marvelous reflection on what

may be the Bible's most subversive and misunderstood story. Not only are his insights incisive and needed, his writing is a delight to read." --Brian D. McLaren, author/speaker/activist "I picked it up, started to read it and couldn't stop. . . . It's an irresistible, fanciful, terrifying book: brilliant, beautiful, and colourful, but brutal, awful, and confronting. . . . This is The Gospel According To Jonah for today." --Dave Andrews, Author of Plan Be, and Christi-Anarchy "Elegaic in its writing and prophetic in its message, Blower's study brings the ancient Biblical myth of Jonah back to life with fresh relevance for our times, especially so with Jonah's city so much in the news, and for the same reasons as before: that to say, Nineveh, or Mosul in northern Iraq." --Alastair McIntosh, Professor,

School of Divinity, University of Edinburgh, author of *Soil and Soul* and *Spiritual Activism* ""Identifying the empire--not the big fish--as the real beast in the book, this powerful and poetic re-telling of the Jonah story brings a familiar tale to life in fresh ways, and invites readers to face the challenge of engaging creatively and vulnerably with the powers that be."" --Stuart Murray Williams, Author of *The Naked Anabaptist*, *Multi-Voiced Church* and *Church After Christendom* ""I'm still recovering from the prophetic body blow of Blower's first book, *Kingdom vs. Empire*, but here he is again, ready for round two. His latest is about as unsettling as it gets. I've been following David's work for some time now. I know how he operates, but he still catches me

off guard. So put down whatever you're reading, pick up this book, and brace yourself!"" --Tim Nash, *Nomad Podcast* ""David Benjamin Blower brings us a renewed song of hope--in the shape of Jonah wrapped up in a whale. This is a work of imagination and erudition as well as an elegy that speaks of a way of being that for so long has eluded concerned Christians. At last God has given us a prophet who dares to tell us like it is. Listen up--let Jonah help us to see our task as Christians in troubled times. Read and listen to David Benjamin Blower if you dare--but with assurance that grace is so much in abundance our fretfulness will be transformed into passion."" --Ann Morisy, author of *Beyond the Good Samaritan* and *Journeying Out* David Benjamin Blower is

a writer, musician, and theological agitator from Birmingham, UK. He is a prolific recording artist and the author of *Kingdom vs. Empire* (2013).

Werewolf: The Apocalypse is about anger over the loss of what the shapeshifting Garou hold dearest: Gaia, the Earth itself. Corruption from without and within has caused the destruction not only of the Garou's environment, but also of their families, friends and culture, which extends in an unbroken line to the very dawn of life. No matter how righteously the Garou hold themselves, no matter how they prey on their destroyers, the corruption spreads. Now the time for reconciliation is past. This grave insult against Gaia can end in only

one way: blood, betrayal... and rage. Tribebooks contain vital character information for players and Storytellers.

In the midst of spiraling ecological devastation, multispecies feminist theorist Donna J. Haraway offers provocative new ways to reconfigure our relations to the earth and all its inhabitants. She eschews referring to our current epoch as the Anthropocene, preferring to conceptualize it as what she calls the Chthulucene, as it more aptly and fully describes our epoch as one in which the human and nonhuman are inextricably linked in tentacular practices. The Chthulucene, Haraway explains, requires sym-poiesis, or making-with, rather than auto-poiesis, or self-making. Learning to stay with the

trouble of living and dying together on a damaged earth will prove more conducive to the kind of thinking that would provide the means to building more livable futures. Theoretically and methodologically driven by the signifier SF—string figures, science fact, science fiction, speculative feminism, speculative fabulation, so far—Staying with the Trouble further cements Haraway's reputation as one of the most daring and original thinkers of our time.

History, Power, Text: Cultural Studies and Indigenous Studies is a collection of essays on Indigenous themes published between 1996 and 2013 in the journal known first as UTS Review and now as Cultural Studies Review. This journal opened up a space for new kinds of politics, new styles of writing and new modes of interdisciplinary engagement. History, Power, Text highlights the

significance of just one of the exciting interdisciplinary spaces, or meeting points, the journal enabled. 'Indigenous cultural studies' is our name for the intersection of cultural studies and Indigenous studies showcased here. This volume republishes key works by academics and writers Katelyn Barney, Jennifer Biddle, Tony Birch, Wendy Brady, Gillian Cowlshaw, Robyn Ferrell, Bronwyn Fredericks, Heather Goodall, Tess Lea, Erin Manning, Richard Martin, Aileen Moreton-Robinson, Stephen Muecke, Alison Ravenscroft, Deborah Bird Rose, Lisa Slater, Sonia Smallacombe, Rebe Taylor, Penny van Toorn, Eve Vincent, Irene Watson and Virginia Watson—many of whom have taken this opportunity to write reflections on their work—as well as

interviews between Christine Nicholls and painter Kathleen Petyarre, and Anne Brewster and author Kim Scott. The book also features new essays by Birch, Moreton-Robinson and Crystal McKinnon, and a roundtable discussion with former and current journal editors Chris Healy, Stephen Muecke and Katrina Schlunke. *Caves and the Ancient Greek Mind*

His most ambitious novel to date, ACCELERANDO is a multi-generational saga following a brilliant clan of 21st-century posthumans. The year is some time between 2010 and 2015. The recession has ended, but populations are ageing and the rate of tech change is accelerating dizzyingly. Manfred makes his living from spreading ideas around, putting people in touch with one another

and leaving a spray of technologies in his wake. He lives at the cutting edge of intelligence amplification technology, but even Manfred can take on too much. And when his pet robot cat picks up some interesting information from the SETI data, his world - and the world of his descendants - is turned on its head.

**Helen of Troy** Open Book Publishers Published to accompany a major exhibition at The Queen's Galleries in London and Edinburgh, this book provides new insights into George IV as a collector. Although George led a life bounded by convention, he was a genuine connoisseur who was able to form an unrivalled collection of paintings, porcelain and furniture. These he presented and displayed in a series of architecturally adventurous spaces. His

acquisitions continue to form the backdrop to royal ceremony, a legacy that is one of the principal pillars of today's magnificent Royal Collection. *The Built Environment* Good Press

Many attack pop culture as a crude 'sexual' and 'celebrity-based' culture that is purportedly bringing about the end of moral values. Renowned semiotician Marcel Danesi adds his signature insight to the debate by delving deep into pop culture through a consideration of symbols. Danesi's treatment of letters, such as the X in 'X-Rated,' the 'i' in 'iPod,' and other such symbols, reveals an ancient mythic structure that blends the sacred and profane dimensions of human psychic life. Danesi takes the reader on a remarkable exploration of the radical

turns in American society, a society in which the search for pleasure and sexual expression often reign supreme. X-Rated! is a fascinating trip through what gives pop culture its secret appeal. *The Perfectibility of Man* Springer

Rifkin delves deeply into the history of Europe--and eventually America--to show how Europeans have succeeded in slowly and steadily developing a more adaptive, sensible way of working and living.

Tuscany is a landscape whose cultural construction is complicated and multi-layered. It is this very complexity that this book seeks to untangle. By revealing hidden histories, we learn how food, landscape and architecture are intertwined, as well as the extent to

which Italian design and contemporary consumption patterns form a legacy that draws upon the Romantic longings of a century before. In the process, this book reveals the extent to which Tuscany has been constructed by Anglos — and what has been distorted, idealized and even overlooked in the process.
