**Comprehensive Curriculum of Basic Skills, Grade 5** The Princeton Review  
 Educators are facing increasing demands and challenges due to the current emphasis on student growth and teacher accountability. Academic or instructional coaches can work with teachers to help them develop ideas, methods, and strategies for facing and successfully conquering these challenges leading to increased student achievement. Using scenarios and scholarly resources, the book follows one coach's journey from her first day as an instructional or academic coach through her development to an experienced coach who is prepared to help new coaches. The discussion of the theoretical basis for teaching and learning provides the basis for examining various approaches to coaching, methods of data collection and analysis, the components of teacher evaluation systems, and methods for implementing these ideas into the K-12 educational setting. This book is a must read for all coaches and teacher leaders!

This book is for education leaders who do not accept the that the

underachievement of African American, Latino, Indigenous, low income and other vulnerable student groups is inevitable. *Where Equity Lives: Shattering Systemic Inequity in Schools and Districts* is the result of 25 years of studying over 300 schools and districts struggling to overturn the longstanding pattern of underachievement of the same demographic groups. This book is a reveal of the five most common systemic inequity traps identified through the Study of Studies that help explain historic achievement patterns. The authors lay out achievable paths of possibilities for education leaders to reverse decades of underachievement. Actionable insights are shared through real-life stories of schools and districts that struggled with and took action to address each of these traps. Chapters contain equity hooks—easy to remember cues of complete, complex, and nuanced leadership takeaways. Online templates are available for teams of leaders to apply the guidance from each chapter to your school system so that vulnerable students arrive at the spot where equity lives, that magnificent place where demographics no longer predict achievement.
