 brilliantly

 small-town
 life.
 Somewhere in
 rural North
 Dakota, there

is a fictional town called Owl. They don't have cable. They don't really have pop culture, but they do have grain prices and alcoholism. People work hard and then they die. But that's not nearly as awful as it sounds; in fact, sometimes it's perfect. Mitch Hrlicka lives in Owl. He plays high school football and worries about his weirdness, or lack thereof. Julia Rabia just moved to Owl.

A history teacher, she gets free booze and falls in love with a self-loathing bison farmer. Widower and local conversationalist Horace Jones has resided in Owl for seventy-three years. They all know each other completely, except that they've never met. But when a deadly blizzard—based on an actual storm that occurred in 1984—hits the area, their lives are derailed in unexpected

and powerful ways. An unpretentious, darkly comedic story of how it feels to exist in a community where local mythology and violent reality are pretty much the same thing, *Downtown Owl* is “a satisfying character study and strikes a perfect balance between the funny and the profound” (Publishers Weekly).

The Art and Science of the Perfect

Xeno yearns to have access to The Nth Dimension like The White Boys, famed telepaths who suffered brain damage when they made contact with extraterrestrial intelligence.

Out of work as a bartender since the Shoki Pao dance club mysteriously burned down, Xeno's lackluster lifestyle in the city of Metropa is getting harder to maintain.

The public pill silos that dispense Sunlite, a one-size-fits-all antidepressant, haven't been refilled in months, so the citizens of Metropa turn to designer drugs, like Black Magic, an addictive Sunlite knock-off with terrible side

effects.

Having survived an overdose of Black Magic, and successfully revived by Drinama, a brain implant slipped to him as a Mickey at a job fair, Xeno earns an entry level position as an agent for secret service organization Intellegella. Garry, his handler, introduces Xeno to the industrial version of the black box, allowing Xeno's pineal gland access to SSP-synthetic

sensory perception-with the turn of a dial, along with the Noumenol patch, a skin absorbed drug that stabilizes his vital signs so that he doesn't suffer a cardiac arrest. Xeno's initial mission is to test the black box in the field, under Garry's watchful eye, and to locate Trianne, an ex co-worker, ex pole dancer, ex model, gone missing and showing signs of spontaneous human combustion, an emerging

side effect of Black Magic, and a public safety hazard. All Xeno has to do is bring Trianne back to Intellegella for treatment. It's that simple . . . according to Garry.

The Raffles Affair is a light-hearted murder mystery featuring the elegant former MI6 agent Victoria West. Beautiful former MI6 agent, Victoria West, arrives at Raffles Hotel in Singapore for the wedding of her good friend, Silicon Valley entrepreneur Peyton Latchmore.

Fresh from a gruelling three-month assignment in East Africa, Victoria's plans for a relaxing break come to an abrupt end with the kidnapping of Peyton's fiancée, the charmingly handsome English financier, James Winstanley. Warned not to contact the police, Peyton begs Victoria to help. Reluctantly, Victoria agrees. Immediately it is clear the kidnapper knows too

much to be a stranger, and Victoria suspects one of the wedding guests is involved. Tensions simmer, as one by one their motives are revealed. With only 24 hours to make the ransom payment, Victoria must act quickly. Women's Libation! Abrams Winner in Drink category - André Simon Food and Drink Book Awards 2016 Volcanic Wines takes a novel approach to

the world of wine, using volcanic soil as the overarching theme and link between a wide range of grapes and wine regions. Wine professionals are already deeply attuned to the impact of terroir and soil type on wine characteristics and quality. While consumers tend to rely on grape variety as their main purchasing cue, as the market broadens and general knowledge of wine expands,

terroir now figures more prominently in their thinking. It's more widely acknowledged and understood today that even small variations in soil type can result in dramatically different wines, and that the same soil type can yield a distinctive imprint regardless of grape variety or production region. John Szabo introduces geology, volcanism and the correlation between soil

type and wine composition, with the right balance of science, personal history and commercial considerations . A wide and breathtaking range of photographs highlight how stunning volcanic wine regions are; together with maps and wine labels, the reader is taken on a visual tour of these remote corners of the globe. Volcanic Wines is a well-researched resource on the history,

unique characteristics , wine styles and most celebrated producers in each volcanic region. Personal and anecdotal information helps to humanize the journey, with experiences and discoveries shared in eloquent but accessible, playful prose. *The Curious Bartender's Rum Revolution* Modiphuis Campaign book; compatible with the "5E" edition rules of Dungeons &

Over the last thirty years three countries, Bulgaria, Romania and Moldova have been working hard to escape the legacy of communism. For all three the regimes that took hold after the Second World War affected their wine industries profoundly, with state farms	favouring mechanization and mass production over care and quality. Recent decades have seen a huge switch in attitudes following privatization, with more focus on quality and reconnecting people with the land to rebuild these historic wine industries for today's wine drinkers. Bulgarian wine's fall in sales in the West due to the rising popularity of New World wines,

Moldova's economic crisis at the hands of a Russian ban on Moldovan wine and Romania's need to counter imports from foreign producers as tastes in wine change have forced wineries to rethink their approaches to viticulture and winemaking. Instead of production lines of anonymous wines, makers now focus on creating authentic regional wines using local and

international varieties and modern techniques. In The wines of Bulgaria, Romania and Moldova, Eastern European wine expert Caroline Gilby MW presents the wine stories of these three connected but distinct countries as one who has witnessed the vast changes as they happened. The cultures of the three countries, their complex and troubled histories and their roads to recovery are

profiled here along with details of the geography, climate, grapes grown and, most importantly, the producers working to revive and reinvent their respective wine industries. For those who seek something new beyond the traditional wines of Western Europe or who find New World wines losing their thrill The Wines of Bulgaria, Romania and Moldova is an inspirational

introduction to a wine world waiting to be explored.
