The First-Year Experience Cookbook provides librarians with a series of innovative approaches to teaching and assessing information literacy skills during a student's first year. Featuring four chapters—Library Orientation, Library Instruction, Programs, and Assessment—and more than 60 practical, easy-to-implement recipes, this book compiles lessons and techniques for you to adapt, repurpose, and implement in your libraries.

*Toward a Ludic Architecture* Oxford University Press

Children should know what rights they have, but they should also learn how to appreciate and to use them. To achieve this, schools must allow for a wide range of learning experiences in children's rights education. Children understand and appreciate their rights by using them, both in school and in everyday life. To encourage children to do so, the challenge for the teacher is to create a setting that is governed by the spirit of democracy and human rights. This manual has been designed for teachers who are looking for tools to teach children's rights to students at primary schools. The features of this manual include: nine small projects of four lessons each, for students in their first nine years of school; detailed lesson instructions that can be followed by beginners or used in teacher training; a lesson plan including the key questions and key tasks in each at the beginning of each project description; an approach of task-based learning, focusing on problem solving and learning by example, which supports the pupils in conceptual learning, skills training and the development of values and attitudes.

**The Purchase of the Past** Houghton Mifflin

“*Toward a Ludic Architecture*” is a pioneering publication, architecturally framing play and games as human practices in

and of space. Filling the gap in literature, Steffen P. Walz considers game design theory and practice alongside architectural theory and practice, asking: how are play and games architected? What kind of architecture do they produce and in what way does architecture program play and games? What kind of architecture could be produced by playing and gameplaying?

*The Ultimate Treasure Hunt* Createspace Independent Publishing Platform

Frederick Douglass recounts early years of abuse, his dramatic escape to the North and eventual freedom, abolitionist campaigns, and his crusade for full civil rights for former slaves. It is also the only of Douglass's autobiographies to discuss his life during and after the Civil War, including his encounters with American presidents such as Lincoln, Grant, and Garfield.

The Ultimate Treasure Hunt leads believers into a supernatural lifestyle of Kingdom building. Author Kevin Dedmon captures the heart of witnessing and personal evangelism through his taking-it-to-the-streets ministry where healing, miracles, and

deliverance are regular occurrences. Based on biblical principles and personal testimonies, you will learn how the simplicity of hearing a word of knowledge from God leads you to clues for the treasure hunt. Go ye into all the world, and preach the gospel to every creature (Mark 16:15). Witnessing the love and saving grace of Jesus does not need to be invasive or argumentative; rather, it is a supernatural encounter when God reveals Himself in a specific way. The fun begins when you read the step-by-step guidelines for embarking on a successful, fulfilling treasure hunt.

**Leaving the Sea** IGI Global

"The rules are simple. If you want to travel back in time, you need to be at least eighteen years old. You can only travel within your own lifespan for a maximum of six months. And above all else, you must never, ever, change the past."--Back cover.

**Letters of David Hume to William Strahan** Council of Europe Religion in America, 7th Edition provides a comprehensive yet concise introduction to the changing religious landscape of the United States. Extensively revised and updated to reflect current events and trends, this new edition continues to engage students in reflection about religious diversity. Julia Corbett-Hemeyer presents the study of religion as a tool for developing appreciation of communities of faith other than one's own and for understanding the dynamics at work in religion in the United States today.

**The Next To Last Mistake** jimmy patterson

Socialism is the watchword and the catchword of our day. The socialist idea dominates the modern spirit. The masses approve of it. It expresses the thoughts and feelings of all; it has set its seal upon our time. When history comes to tell our story it will

write above the chapter "The Epoch of Socialism." As yet, it is true, Socialism has not created a society which can be said to represent its ideal. But for more than a generation the policies of civilized nations have been directed towards nothing less than a gradual realization of Socialism.<sup>17</sup> In recent years the movement has grown noticeably in vigour and tenacity. Some nations have sought to achieve Socialism, in its fullest sense, at a single stroke. Before our eyes Russian Bolshevism has already accomplished something which, whatever we believe to be its significance, must by the very magnitude of its design be regarded as one of the most remarkable achievements known to world history. Elsewhere no one has yet achieved so much. But with other peoples only the inner contradictions of Socialism itself and the fact that it cannot be completely realized have frustrated socialist triumph. They also have gone as far as they could under the given circumstances. Opposition in principle to Socialism there is none. Today no influential party would dare openly to advocate Private Property in the Means of Production. The word "Capitalism" expresses, for our age, the sum of all evil. Even the opponents of Socialism are dominated by socialist ideas. In seeking to combat Socialism from the standpoint of their special class interest these opponents—the parties which particularly call themselves "bourgeois" or "peasant"—admit indirectly the validity of all the essentials of socialist thought. For if it is only possible to argue against the socialist programme that it endangers the particular interests of one part of humanity, one has really affirmed Socialism. If one complains that the system of economic and social organization which is based on private property in the means of production does not sufficiently consider

the interests of the community, that it serves only the purposes of single strata, and that it limits productivity; and if therefore one demands with the supporters of the various "social-political" and "social-reform" movements, state interference in all fields of economic life, then one has fundamentally accepted the principle of the socialist programme. Or again, if one can only argue against socialism that the imperfections of human nature make its realization impossible, or that it is inexpedient under existing economic conditions to proceed at once to socialization, then one merely confesses that one has capitulated to socialist ideas. The nationalist, too, affirms socialism, and objects only to its Internationalism. He wishes to combine Socialism with the ideas of Imperialism and the struggle against foreign nations. He is a national, not an international socialist; but he, also, approves of the essential principles of Socialism.

#### **Teaching New Religious Movements** Harper Business

This collection challenges the popular but abstract concept of nudging, demonstrating the real-world application of behavioral economics in policy-making and technology. Groundbreaking and practical, it considers the existing political incentives and regulatory institutions that shape the environment in which behavioral policy-making occurs, as well as alternatives to government nudges already provided by the market. The contributions discuss the use of regulations and technology to help consumers overcome their behavioral biases and make better choices, considering the ethical questions of government and market nudges and the uncertainty inherent in designing effective nudges. Four case studies - on weight loss, energy efficiency, consumer finance, and health care - put the discussion

of the efficiency of nudges into concrete, recognizable terms. A must-read for researchers studying the public policy applications of behavioral economics, this book will also appeal to practicing lawmakers and regulators.

#### Library Media Connection Parallax Press

The book is a case study of how beauty, desire, and bodily experience converge in the work of Jonathan Edwards, using the "kinesthetic imagination" to escape the false dichotomies of modernity.

#### *Religion in America* Brill

Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational

topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**Life and Times of Frederick Douglass** Penguin UK

In this enthusiastic, heartfelt, and sometimes humorous ode to bookshops and booksellers, 84 known authors pay tribute to the brick-and-mortar stores they love and often call their second homes. In My Bookstore our greatest authors write about the pleasure, guidance, and support that their favorite bookstores and booksellers have given them over the years. The relationship between a writer and his or her local store and staff can last for years or even decades. Often it's the author's local store that supported him during the early days of his career, that continues to introduce and hand-sell her work to new readers, and that serves as the anchor for the community in which he lives and works. My Bookstore collects the essays, stories, odes and words of gratitude and praise for stores across the country in 81 pieces written by our most beloved authors. It's a joyful, industry-wide celebration of our bricks-and-mortar stores and a clarion call to readers everywhere at a time when the value and importance of these stores should be shouted from the rooftops. Perfectly charming line drawings by Leif Parsons illustrate each storefront and other distinguishing features of the shops.

Developing Literacy focuses on the reading classroom, rather than the reading clinic, and highlights the relationship between literacy development and child development. Abundant

strategies facilitate assessment and offer useful models for both whole classroom and individualized settings.

The Clay Lion Oxford University Press, USA

Many teens today who use the Internet are actively involved in participatory cultures—joining online communities (Facebook, message boards, game clans), producing creative work in new forms (digital sampling, modding, fan videomaking, fan fiction), working in teams to complete tasks and develop new knowledge (as in Wikipedia), and shaping the flow of media (as in blogging or podcasting). A growing body of scholarship suggests potential benefits of these activities, including opportunities for peer-to-peer learning, development of skills useful in the modern workplace, and a more empowered conception of citizenship. Some argue that young people pick up these key skills and competencies on their own by interacting with popular culture; but the problems of unequal access, lack of media transparency, and the breakdown of traditional forms of socialization and professional training suggest a role for policy and pedagogical intervention. This report aims to shift the conversation about the "digital divide" from questions about access to technology to questions about access to opportunities for involvement in participatory culture and how to provide all young people with the chance to develop the cultural competencies and social skills needed. Fostering these skills, the authors argue, requires a systemic approach to media education; schools, afterschool programs, and parents all have distinctive roles to play. The John D. and Catherine T. MacArthur Foundation Reports on Digital Media and Learning

Planting Seeds: Practicing Mindfulness with Children is the fruit of decades of development and innovation in the Plum Village community's collective practice with children. Based on Thich Nhat Hanh's thirty years of teaching mindfulness and compassion to parents, teachers, and children, the book and enclosed CD cover a wide range of contemplative and fun activities parents and educators can do with their children or students. The activities are designed to help relieve stress, increase concentration, nourish gratitude and confidence, deal with difficult emotions, touch our interconnection with nature, and improve communication. Planting Seeds offers insight, concrete activities, and curricula that parents and educators can apply in school settings, in their local communities or at home, in a way that is meaningful and inviting to children. The key practices presented include mindful breathing and walking, inviting the bell, pebble meditation, the Two Promises or ethical guidelines for children, children's versions of Touching the Earth and Deep Relaxation, eating meditation and dealing with conflict and strong emotions. Also included, are the lyrics to the songs on the enclosed CD that summarize and highlight the key teachings, as well as a chapter on dealing effectively with conflict in the classroom or difficult group dynamics, based on a conference with Thich Nhat Hanh, teachers and students. The accompanying CD has inspiring recordings of all the songs in the book as well as a guided pebble meditation, total relaxation, and children's touching the earth. Beautiful, color illustrations by Wietske

Vriezen Illustrator of Mindful Movements (ISBN-13: 978-1-888375-79-4) accompany the various practices. Any adult wishing to plant seeds of peace, relaxation, and awareness in children will find this book and CD helpful. It is full of wisdom on how to simply be with children and nourish their compassion for themselves and others. Illustrated by Wietske Vriezen Illustrator of Mindful Movements (Mindful Movements – Ten Exercise for Well Being, ISBN-13: 978-1-888375-79-4). Includes 1 audio CD.

**My Bookstore** Modern Language Association

Taking up the idea that teaching is a political act, this collection of essays reflects on recent trends in ecocriticism and the implications for pedagogy. Focusing on a diverse set of literature and media, the book also provides background on historical and theoretical issues that animate the field of postcolonial ecocriticism. The scope is broad, encompassing not only the Global South but also parts of the Global North that have been subject to environmental degradation as a result of colonial practices. Considering both the climate crisis and the crisis in the humanities, the volume navigates theoretical resources, contextual scaffolding, classroom activities, assessment, and pedagogical possibilities and challenges. Essays are grounded in environmental justice and the project to decolonize the classroom, addressing works from Africa, New Zealand, Asia, and Latin America and issues such as queer ecofeminism, disability, Latinx literary production, animal studies, interdisciplinarity, and working with environmental justice organizations.
