Palliative Care Nursing, Fourth Edition Springer Publishing Company

“This 5th edition is an important achievement; it is a symbol of commitment to the field of palliative nursing, where we have been and where we are going.” - Betty Rolling Ferrell, PhD, MA, FAAN, FPCN, CHPN From the Foreword The aging population has only grown since the first edition of this comprehensive and seminal publication nearly 20 years ago. Based on the need to humanize rather than medicalize the illness experience for patients, this text delves into palliative care beyond the specific diseases affecting the patient. Instead, content focuses on the whole person and family. Palliative patients struggle with chronic, debilitating, and painful conditions, and grapple with the fact that life as they knew it has already passed away. Families and friends reciprocally suffer, not knowing how to help and therefore become the secondary victims of the disease. This is not the challenge of a lone nurse, or a single physician, therapist, or social worker. Rather, palliative and hospice care requires the expertise and unique roles of an interprofessional team to help the patient and family strengthen their resilience, continue to find meaning and purpose in life, and cure what can be cured. Palliative Care Nursing, Fifth Edition, delivers advanced empirical, aesthetic, ethical and personal knowledge. This new edition brings an increased focus on outcomes, benchmarking progress, and goals of care. It expounds upon the importance of the cross-disciplinary

collaboration introduced in the previous edition. Every chapter in Sections I, II, and III includes content written by a non-nursing member of the interprofessional team. Based on best-evidence and clinical practice guidelines, this text presents comprehensive, targeted interventions responsive to the needs of palliative and hospice patients and family. Each chapter contains compassionate, timely, appropriate, and cost-effective care for diverse populations across the illness trajectory. Key Features The expanded new edition offers current, comprehensive, one-stop source of highly-relevant clinical information on palliative care Life-span approach: age-appropriate nursing considerations (e.g. geriatric, pediatric and family) Includes disease-specific and symptom-specific nursing management chapters Promotes a holistic and interdisciplinary approach to palliative care Offers important legal, ethical and cultural considerations related to death and dying Case Studies with Case Study Conclusion in each clinical chapter New to The Fifth Edition: An expanded chapter on Palliative Care incorporates most up to date scope and standards, information on Basic and Advanced HPNA certification, self-reflection and self-care for nurses. A chapter on Interprofessional Collaboration Instructor Resources: Power points and Test bank

Community Palliative Care examines the complex support and information needs of seriously ill patients and their families and will encompass not only the patient’s journey, but that of the family during the illness trajectory and into the bereavement period. The text is divided into three sections- professionals, patients and carers. The first section discusses the roles and contributions made by other members of the primary health care team and

examines the role of the nurse. Section two explores the psychosocial support needed by patients receiving palliative care, and looks at the community palliative care clinical nurse specialist's role in relation to psychological, as well as practical problems surrounding a life-threatening illness. The final section will look at the needs of the family and carers and the support that the community palliative care clinical nurse specialist can offer to the individuals. Included in this segment will be the complex issues faced by carers in relation to the changing roles within the family, children, death and bereavement.

Palliative Care Nursing: Principles and Evidence for Practice John Wiley & Sons

Praise for the Third Edition: "In this comprehensive textbook on palliative care nursing, editors Marianne Matzo and Deborah Witt Sherman succeed in bringing together the heart of nursing and the true meaning of palliative care with the most current evidence-based practice." --GeriPal This fourth edition of a comprehensive text/reference that has been valued by students, educators, and practicing nurses for many years, *Palliative Care Nursing* continues to reflect the fundamental hospice and palliative care nursing competencies--both basic and advanced--that are essential for effective and empathetic care of patients and families. This new edition reflects the tremendous growth of this vital discipline into the mainstream of health care and focuses on palliative care that is responsive to the demand for health care reform in America and globally. It provides the knowledge, scientific evidence, and skills needed by nurses to address the complex physical, emotional, social, sexual, and spiritual needs of patients and families within the context of a changing health care delivery system. With a focus on inter-professional collaboration, the book emphasizes the value of complementary, holistic models in promoting health and wholeness across the illness trajectory, even as death approaches. The book is edited by Project on Death in America Faculty Scholars, who have worked to develop, implement, and evaluate nursing initiatives in palliative care in the U.S. and internationally. With a focus on both quality of life and economic imperatives, interdisciplinary authors describe the management of specific diseases and related physical and psychological symptoms, and care of patients during the dying process. They cover assessment of key symptoms and pharmacological, non-pharmacological, and complementary interventions. Taking a life-span approach, the book includes age-appropriate nursing considerations. Key points at the beginning of each chapter and callouts containing evidence-based information highlight best practices. The text also examines relevant legal, ethical, and cultural considerations and offers case studies with conclusions in each clinical chapter. New to the Fourth Edition: Thoroughly revised and expanded Three new chapters addressing palliative care amidst health care reform, rehabilitation in chronic or serious illness, and post-traumatic stress disorder A conceptual framework table in each chapter identifying the National Quality Forum Domains of Palliative Care and Basic and Advanced Palliative Care and Hospice Nursing Competencies Updated evidence-based callouts that review the highest-quality studies

Palliative Care Nursing Elsevier Health Sciences

This new and expanded edition is aimed directly at the learning needs of student nurses and is unique in that context. Whilst there are many high quality books available for academic study in palliative care this is currently the only one that balances a strong educational focus for developing nursing practice with an understanding of the particular needs of student nurses. The text maintains a sensitive and supportive approach to the key themes of palliative care nursing, but contains important new material of a wide range of initiatives that are impacting on end of life care across the UK. It will provide the reader with a concise, easy to read and learning oriented text that will give advice and direction to the many challenges faced in this most important area of patient care. Each chapter examines a key component of care and new features include: Learning outcomes at the start of each chapter to guide the reader Clinical anecdotes to illustrate the reality and complexity of practice Extensive use of recognisable symbols to guide the reader and improve the usability of the text Competency assessment to help gauge knowledge and progress Reflective points to aid

professional development Reflective activities to enable the student to reinforce learning from practice Links to appropriate clauses of the current 2008 NMC Code of Professional Conduct Quality internet resources relevant to chapter content Self assessment multiple choice tests at the end of each chapter to consolidate learning An extensive palliative care quiz covering the main topic areas of the book to test knowledge. This can be used as evidence with professional portfolios.

Kath Murray has a love for hospice and palliative care and a love for education that is engaging, delicious, and digestible. Her passion is to provide exceptional resources to help nurses, health care workers, and personal support workers provide excellent care for the dying and their family, and to find meaning and value in doing so.

Stepping Into Palliative Care 1 Routledge

"Children's palliative care is an evolving specialty and as such our knowledge base cannot remain static. This book constantly challenges the reader to critically analyze their own practices and beliefs within an evidence-based framework and as such makes a valuable contribution to the growing body of knowledge on this important subject." - Susan Fowler-Kerry, in the Foreword. This book caters for readers from different working environments and levels of experience. It is ideal for paediatric nurses with no specialist palliative care knowledge, and also for palliative care nurses with no specialist paediatric experience. Other healthcare professionals and therapists working with children, young people and their families will also find this book invaluable. It will also be ideal for undergraduate and postgraduate health and social care students, and professionals involved in children's hospices, community services and charity groups. "This book captures not just the rapidly evolving evidence base, but also as many current developments as possible and applies them in a meaningful way to the care of infants, children, and young people living with life-limiting illness, and their families. It offers an overview of contemporary issues and helps to stimulate the type of dialogue that can bring about the actions that will make a real difference for the children, young people and families in our care." - Rita Pfund, in the Preface.

Palliative Care McGraw-Hill Education (UK)

The Oxford Textbook of Palliative Nursing remains the most comprehensive treatise on the art and science of palliative care nursing available. Dr. Betty Rolling Ferrell and Dr. Judith A. Paice have invited 162 nursing experts to contribute 76 chapters addressing the physical, psychological, social, and spiritual needs pertinent to the successful palliative care team. Organized within 7 Sections, this new edition covers the gamut of principles of care: from the time of initial diagnosis of a serious illness to the end of a patient's life and beyond. This fifth edition features several new chapters, including chapters on advance care planning, organ donation, self-care, global palliative care, and the ethos of palliative nursing. Each chapter is rich with tables and figures, case examples for improved learning, and a strong evidence-based practice to support the highest quality of care. The book offers a valuable and practical resource for students and clinicians across all settings of care. The content is relevant for specialty hospice agencies and palliative care programs, as well as generalist knowledge for schools of nursing, oncology, critical care, and pediatric. Developed with the intention of emphasizing the need to extend palliative care beyond the specialty to be integrated in all settings and by all clinicians caring for the seriously ill, this new edition will continue to serve as the cornerstone of palliative care education.

Palliative Care Nursing at a Glance Radcliffe Publishing

"...this is an excellent book that is interesting, easy to read and very useful for health care professionals." *Palliative Medicine* This innovative interdisciplinary textbook reviews current research and examines the evidence base for palliative care practice. Focusing on palliative care for adults, the first three sections use a novel framework - the trajectory of life-limiting illness - to cover key issues including: What happens to people as they become ill How individuals cope as they near death and are dying How families and friends deal with bereavement and loss The final section addresses contemporary issues in nursing and inter-professional working. The book contains helpful overviews and is written in an informative and reader-friendly style. *Palliative Care Nursing* is essential reading for post-qualifying nursing students and all nurses and health/social care professionals who provide care to people with advanced illness and those who are near the end of life.

Palliative and End of Life Care in Nursing Oxford University Press

Palliative Care Nursing: Caring for Suffering Patients explores the concept of suffering as it relates to nursing practice. This text helps practicing nurses and students define and recognize various aspects of suffering across the lifespan and within various patient populations while providing guidance in alleviating suffering. In addition, it examines spiritual and ethical perspectives on suffering and discusses how witnessing suffering impacts nurses' ability to assume the professional role. Further, the authors discuss ways nurses as witnesses to suffering can optimize their own coping skills and facilitate personal growth. Rich in case studies, pictures, and reflections on nursing practice and life experiences, *Palliative Care Nursing: Caring for Suffering Patients* delves into key topics such as how to identify when a patient is suffering, whether they are coping, sources of coping facades, what to do to ease suffering, and how to convey the extent of suffering to members of the health care team.

Palliative Care, An Issue of Critical Care Nursing Clinics of North America, E-Book Open University Press

Palliative care is an essential element of our health care system and is becoming increasingly significant amidst an aging society and organizations struggling to provide both compassionate and cost-effective care. Palliative care is also characterized by a strong interdisciplinary approach, and nurses are at the center of the palliative care team across settings and populations. The sixth volume in the HPNA Palliative Nursing Manuals series, Social Aspects of Care provides an overview of the financial and mental stress illness places, not just on the patient, but on the family as well. This volume contains information on how to support families in palliative care, cultural considerations important in end-of-life care, sexuality and the impact of illness, planning for the actual death, and bereavement. The content of the concise, clinically focused volumes in the HPNA Palliative Nursing Manuals series is one resource for nurses preparing for specialty certification exams and provides a quick-reference in daily practice.
