With the advent of new, inexpensive photographic technology emerging in the United States during the mid-19th century, communication by postcard became a very popular way to exchange travel stories, news, and gossip over the decades. Drawing on a private collection of vintage postcards, this new book features a history of Hollywood, spanning half a century. Exploring Hollywood before and after it became the entertainment capital of the world, these images offer readers a glimpse of some of the city's most interesting places during its Golden Years. Long before motion pictures arrived, when the area was a residential neighborhood of beautiful homes and

lemon groves, Hollywood was just another suburb of Los Angeles striving to become a community. From the familiar sights of Metro-Goldwyn-Mayer Studios and the Chinese Theater, to the horse-and-buggy driven dirt roads and pineapple fields at the turn of the century, Hollywood in Vintage Postcards will guide the curious through the city's progress in the first half of the 20th century.

The Post-graduate Simon and Schuster  
The volume includes twenty-five research papers presented as gifts to John L. Bell to celebrate his 60th birthday by colleagues, former students, friends and admirers. Like Bell's own work, the contributions cross boundaries into several inter-related fields. The contributions are new work by highly respected figures, several of whom are among the key figures in their fields. Some examples: in foundations of maths and logic (William Lawvere, Peter Aczel, Graham Priest, Giovanni Sambin); analytical philosophy (Michael Dummett, William Demopoulos), philosophy of science (Michael Redhead, Frank Arntzenius), philosophy of mathematics (Michael Hallett, John Mayberry, Daniel Isaacson) and decision theory and foundations of economics (Ken Bimore). Most articles are contributions to current philosophical debates, but contributions also include some new mathematical results, important historical surveys, and a translation by Wilfrid Hodges of a key work of arabic logic.

Plotted and planned as a crossroads town along the developing Milwaukee Railroad, Aberdeen, South Dakota was first settled in 1881. With the arrival of the railroad in 1882, Aberdeen flourished. It earned the nickname of Hub City, serving as a railroad junction and agricultural center. Aberdeen's ability to adapt to a changing economy has led to steady growth and has made it the third largest city in the state. Using more than 200 images, authors Tom Hayes and Mike Wiese take the reader on a historic tour of Aberdeen. Drawing on their immense postcard collection, they tell the story of this tight-knit community and the incredible people who are an integral part of its history.

Situated almost directly between Los Angeles and San Francisco, San Luis Obispo was first inhabited by the Chumash and Salinan Indians in 1400 B.C. It took almost 3,000 years before its majestic landscape was encountered by European explorers.
