Antony van
Leeuwenbock is
considered to be the
world's first
microbiologist. Born in
1632, he produced

simple microscopes to
study specimens, both
of which he later
presented to the Royal
Society in London. This
book, three centuries
later reflects research
into Leeuwenhoek's
letters and
observations in early
microscopy and it
compares these
findings with modern
analysis of similar
material.

Microscopical Science*

Palala Press
Part 4 of this popular series on the collection, observation and imaging of freshwater organisms. This volume covers topics that include: digital imaging, producing drawings of specimens by both traditional and digital methods, condenser-less dark-grounds, and improved collection methods. Heavily illustrated.

Radio! Radio! In Print Publishing (UK)

"Indexes to papers read before the Museums Association, 1890-1909. Comp. by Charles Madeley": v. 9, p. 427-452.

My First Microscope (the Concise Companion)

Createspace Independent Publishing Platform

One of a series, this

book on Schools history project provides questions from past exam papers as well as new questions set by actual GCSE examiners. The authors who are all either Chief Examiners or Examiners, have prepared answers and a full mark scheme for each of the questions. They also include their tips on what the examiner is looking for and how to avoid the most commonly made mistakes.

Popular Fallacies Explained and Corrected Pan

Further adventures in the collecting and observing of freshwater organisms. Heavily illustrated, with sections on Diatom cleaning and mounting. Although complete in itself, it is intended as a companion volume to

'The Freshwater Microscopist', also available on this site.

Journal of the Royal Microscopical

Society Letts & Lonsdale

Imagine that you are living in a country that does not recognize you as a citizen in spite of the fact that your people have maintained a continuous existence there for several centuries. If that was not enough of a traumatic experience, consider that because of your racial, ethnic and religious identity other ethnic groups that are fighting the brutal military regime in your country for their self-determination and human rights consider you as "settlers" from a neighboring country. It must be your worst

nightmare when you realize that half of your people (almost 2 million) have been forced to take asylum or refuge outside, and you may be the next in line to seek a way out of this living hell of xenophobia, discrimination, intolerance, racism and bigotry. The victims are the Rohingya people of Burma (Myanmar). Because of their religion, race, ethnicity, color and language they are the most discriminated and persecuted people in our planet. Some argue that they are also one of the most forgotten. The Myanmar military regime has denied their citizenship rights, claiming that they are illegal settlers from nearby Bangladesh who have moved into Arakan during the

British occupation of Burma in the 19th century. Is there any truth to such allegations? Does the military junta apply the same litmus test against all ethnic and religious groups in matters of citizenship? What is the basis for a nation's claim to self-determination? Must a people wander in the wilderness for two millennia and suffer repeated persecution, humiliation and genocide to qualify? How about the rights of a minority community to survive with their culture and traditions intact? Do they need to be 'children' of a 'higher' God to qualify? What makes the children of a 'lesser' God to be forgotten and denied the same treatment and privilege that was

granted hitherto to other nations? For much of its history, Burma has been ruled by military. As has once again been demonstrated recently they are brutal, savage and tyrannical. They have ignored people's verdict in the election and imprisoned leaders and workers of the democracy movement. They cannot be guarantors or protectors of human rights of anyone, let alone religious and ethnic minorities. Do you know that the Rohingyas - face cruel restriction on marriage and those married without government authorization are paraded naked on the streets?- Are restricted from traveling outside their villages?- Have no legal right to own land or property?- Are

restricted from getting education, finding work, getting medical and health care? - Are subjected to land confiscation, forced eviction and destruction of homes, offices, schools, mosques, shops, etc., and face religious persecution on a daily basis? - Are victims of staged riots, forced starvation, arbitrary taxation, extortion, arrest, torture and extra-judicial killings?- Are forced to do slave labor for establishment of government infrastructure, new Buddhist settlements, pagodas and monasteries on evicted lands with the government intent of changing the landscape and demography of Arakan?- Are forced to convert to Buddhism

&/or worship Buddha? Do you know that when it comes to the Rohingya people, the Burmese government doesn't uphold any of the Articles of the Universal Declaration of Human Rights? Nothing can excuse us from the criminal silence that we practice in not voicing our concern about the plight of the Rohingya people. "The Forgotten Rohingya" makes a strong case for mobilizing concerned citizens of our globe to ease their sufferings. The author analyzes origin of the Rohingya people and offers ideas to solve their problem. The author also discusses problems of xenophobia and racism, which are so rampant in this country of many races,

ethnicities and religions. He also analyzes the role of Daw Suu Kyi and failure of Burma's orange revolution.

Stevenston Scientific
Publications

A modern guide aimed at adults and children purchasing and using a microscope for the very first time. Aimed at helping the buyer to choose the right microscope for the age of the intended user and what they may wish to study or simply observe, and then a book to become a complete companion when using the microscope for the first time. Even if the microscope purchased has no handbook, this

book will do it! Explains how to select from all the various microscopes on offer, at the cheapest price and the best quality.

Explains everything required to receive the microscope, set it up, and start using it quickly and without tears. Teaches, without unexplained jargon, all the parts and controls of the microscope, what they do, and how to maximise its use to study both macro and microscopic organisms and objects. Bang up to date! No hype.

Practical information suited to beginners wanting to buy and use a microscope for themselves or as a gift for another adult or younger person.

Deliberately concise with illustrations and images produced from budget entry

microscopes. Covers the use of Monocular, Stereo, Trinocular, Digital microscopes, and Cell phone microscopes and adaptors for cameras and cell phones. Written by an author who pioneered the use of microscopes by non-professionals through founding the popular hobby site for recreational microscopy:
www.microscopy-uk.org.uk

Cyclopaedia of Biblical, Theological, and Ecclesiastical Literature

The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem,

Yvain, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original.

Yvain is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

The American Presbyterian and Theological Review

This volume is part of the New Longman Literature series of modern and classic novels, short stories and plays. Each book in the series provides the

complete, original text;
a section by or about
the writer; and a study
programme and
guidance on keeping a
reading log.
