A major dimension of modern Jewish life has been the revival of conscious political activity on the part of the Jewish people, whether through reestablishment of the State of Israel, new forms of diaspora community organization, or the common Jewish fight against anti-Semitism. Precisely because contemporary Jewry has moved increasingly toward self

The Challenge of Slums Routledge
 A Vital, Living Judaism Can Be Found When the Voice of the Past Engages Modern Experience "[This] synthesis of tradition and modernity is not a philosophy meant to serve as the platform for a new movement or institution, but a process of living experience among individuals and communities that choose to adopt its angle of vision. It is a process that

demands constant introspection and renewal and cannot be branded or co-opted by any formal or official frame of reference. It stands separate from all expressions of institutionalized Judaism, as it never knows what new forces it will absorb as it moves into the future." —from the Introduction Dr. David Hartman, the world's leading modern Orthodox theologian, presents his own painful spiritual evolution from defender of the rule-based system of Jewish law to revolutionary proponent of a theology of empowerment, one that encourages individuals and communities to take greater levels of responsibility for their religious lives. In this daring self-examination, he explains how his goals were not to strip halakha—or the past—of its authority but to create a space for questioning and critique that allows for the traditionally religious Jew to act out a moral life in tune with modern experience. In achieving this synthesis of tradition with the sensibilities of contemporary Judaism, Hartman captures precisely what creates vitality in living Judaism and charts the path to nurture its vitality forever.

Kinship and Consent Routledge

From billboards, print advertisement and the Internet through to TV spots, advertising uses various channels to convince the potential customer to buy a certain product or brand. Companies use advertising that is an omnipresent form of modern popular culture, as a communication tool to promote their brands and products to a mass audience in order to generate sales. Therefore, the message within the advertisement has to be as persuasive as possible to ensure that among other things pleasurable emotions and ideas are awakened in the consumer that are supposed to be linked to the product and brand to fulfill its mission - increase sales volume. Within this thesis interdisciplinary approaches for deciphering messages of selected car advertising were used. Multiple methods and paradigms such as cultural studies, media communication, semiotics, and psychoanalysis, were applied in order to analyze TV spots and print advertisements from a variety of angles. The results reveal that archetypes, symbols, and mythical narratives are a permanent feature of contemporary car advertising.

"Stress," "burn out," "mental overload": the twentieth and twenty-first centuries have witnessed an unrelenting expansion of the meaning of fatigue. The tentacles of exhaustion insinuated themselves into every aspect of our lives, from the workplace to the home, from our relationships with friends and family to the most intimate aspects of our lives. All around us are the signs of a "burn-out society," a society in which fatigue has become the norm. How did this happen? This pioneering book explores the rich and little-known history of fatigue from the Middle Ages to the present. Vigarello shows that our understanding of fatigue, the words used to describe it, and the symptoms and explanations of it have varied greatly over time, reflecting changing social mores and broader aspects of social and political life. He argues that the increased autonomy of people in Western societies (whether genuine or assumed), the positing of a more individualized self, and the ever expanding ideal of independence and freedom have constantly made it more difficult for us to withstand anything that constrains or limits us. This painful contradiction causes weariness as well as dissatisfaction. Fatigue spreads and becomes stronger, imperceptibly permeating everything, seeping into ordinary moments and unexpected places. Ranging from the history of war, religion and work to the history of the body, the senses and intimacy, this history of fatigue shows how something that seems permanently centered in our bodies has, over the course of centuries, also been ingrained in our minds, in the end affecting the innermost aspects of the self.

Labyrinth: An Essay on the Political Psychology of Change Bloomsbury Publishing USA

A comprehensive and revealing compilation of essays analyzing the varied dimensions of national identities and nationalisms across world regions and through time. The pervasiveness of nationalism, its many manifestations over the centuries, and the widely scattered way it has been studied make it a particularly difficult subject to approach and explore. ABC-CLIO offers the finest comprehensive reference available on an essential topic in modern world history. Across four volumes, Nations and Nationalism: A Global Historical Overview covers all aspects of nationalism, in all parts of the world, from the time of the French Revolution to the present day. Nations and Nationalism helps students, researchers, and other interested readers explore national identities and nationalistic movements in historical context. Organized chronologically, its four volumes combine thematic essays on different characteristics of nationalism

with case studies of key historical developments involving specific nations at specific times. The encyclopedia focuses on Europe, Latin America, Africa, and Asia, with featured coverage of nationalist cultural creations, including literature, music, symbols, and mythologies.

The Fatal Environment Mark Twain Media
This eBook edition of "Imperial Germany & the Industrial Revolution" has been

formatted to the highest digital standards and adjusted for readability on all devices. The book was published in 1915, after the First World War began. Veblen considered warfare a threat to economic productivity and contrasted the authoritarian politics of Germany with the democratic tradition of Britain, noting that industrialization in Germany had not produced a progressive political culture. Imperial Germany and the Industrial Revolution is in major part a study of the deviations in cultural and social growth between the English and the German. It deals with the consequences those differences created in social, economic and other domains. Veblen here describes, through the study of German culture, historical and social aspect, how it came to forming of the Third Reich, even before it was formed. He suggests that the Germany's autocracy was an advantage compared to democratic countries. After it was censored during the war, it was later released and it represents a substantial contribution in its sphere of influence.

Thorstein Veblen (1857-1929) was an American economist and sociologist. He is well known as a witty critic of capitalism. Veblen is famous for the idea of "conspicuous consumption." Conspicuous consumption, along with "conspicuous leisure," is performed to demonstrate wealth or mark social status. Veblen explains the concept in his best-known book, *The Theory of the Leisure Class*. Within the history of economic thought, Veblen is considered the leader of the institutional economics movement. Veblen's distinction between "institutions" and "technology" is still called the Veblenian dichotomy by contemporary economists.

Biological Membrane Vesicles: Scientific, Biotechnological and Clinical Considerations Part 2 IAP

Originally published in 1974 and with a new introduction for the 1981 edition, this book is a clear and vivid history of the role of organized labour in the politics of Nigeria. It covers the period from the first General Strike of 1945 to the civil war and reintegration of the country. As well as providing an analysis of the characteristics and attitudes of Nigeria's wage earners, this study is concerned with their place in

the wider political and social life of the country. The attempts of the trade unions to create a representative central labour organisation are considered, as is the internal structure of the unions themselves. The book also examines the relationship of the Unions with the political parties of the first Republic and later with the Military Government. The influence of the trade unions in the determination of wage rates is analysed. The book concludes with an overview of trade unions in other parts of Africa with which the performance and characteristics of organized labour in Nigeria are compared

The Challenge of Slums presents the first global assessment of slums, emphasizing their problems and prospects. Using a newly formulated operational definition of slums, it presents estimates of the number of urban slum dwellers and examines the factors at all level, from local to global, that underlie the formation of slums as well as their social, spatial and economic characteristics and dynamics. It goes on to evaluate the principal policy responses to the slum challenge of the last few decades. From this assessment, the immensity of the challenges that slums pose is clear. Almost 1 billion people live in slums, the majority in the developing world where over 40 per cent of the urban population are slum dwellers. The number is growing and will continue to increase unless there is serious and concerted action by municipal authorities, governments, civil society and the international community. This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes. The Global Report on Human Settlements is the most authoritative and up-to-date assessment of conditions and trends in the world's cities. Written in clear language and supported by informative graphics, case studies and extensive statistical data, it will be an essential tool and reference for researchers, academics, planners, public authorities and civil society organizations around the world.
