Do the crises in our world worry you? The pollution, the violence, the corruption, the apathy? Have you ever wished you could escape? Step through a mirror directly into Middle Earth? Steve Bivans, in his book, *Be a Hobbit, Save the Earth*, argues that we are already there. He examines the problems facing mankind and our planet today through the lens of Tolkien's world and the War of the Ring. The similarities are all around you, and the struggle is indeed very real. Middle Earth faced destruction at the hands of Sauron and Saruman; our world is under attack from the metaphorical Two Towers: Ignorance & Fear, and Poverty & Greed. Saruman-ic, Corporate Capitalism threatens to control and poison our agriculture, education systems, governments, and our common property-both real and cultural. Worst of all, our sense of humanity and hospitality is being sapped and despoiled. If left to continue unabated, the modern Saurons and Sarumans will devour the basic resources essential to our survival: the water, soil, and the very air

we breathe. Our world has lost its 'Shireness.' *Be a Hobbit, Save the Earth* is a guide to bringing our 'Shireness' back, from the bottom up: one Hobbit, one home, and one Shire at a time. Steve Bivans draws positive lessons from Tolkien's works as a metaphorical map, a guide for reconnecting communities, and rebuilding them into sustainable, modern Shires. While our modern challenges seem complicated, nearly impossible, the solutions are really quite simple. The first step on that journey is a change of mind, a transformation from Modern Humans into Modern Hobbits. Only with this new way of thinking can we begin to clean up our scoured Shires: the damage done to our food supply, to our environment, to our communities, and to our political systems. Will that be easy? No, it will not. After all, realizing that the One Ring must be destroyed, was a simple concept, one that even a rustic Hobbit like Frodo Baggins could understand. Carrying it all the way to Mordor to accomplish the mission was another matter, so was cleaning up the Shire when he and his companions returned home. Such it is for us. The situation for our planet is dire; Mordor is at the door and the Black Riders are burning our Shires. What will YOU do? Will you destroy the Ring? Or will you hang on to your 'precioussss'? Do you have to move 'to the country' and live in a hole in the ground? Absolutely not. Moving isn't necessary. Instead, we need to bring Nature into our minds, and into those spaces we call home. We must change our story. We need to remember that we are PART of Nature, not Nature's masters. We need to return to harmony with Nature and with each other, to become what humans were destined to be, builders of gardens and Shires, as Hobbits, not Masters over creatures great and small. You can be a Hobbit, anywhere. Even in a condo in the middle of a city! So buy the book, read it, tell everyone you know

about it, then Be a Hobbit, and Save the Earth!

A tale with many tails, perfect for cat lovers everywhere! Miss Hazeltine is opening a very special school for shy and fearful cats. They come from all over, and Miss Hazeltine gives them lessons in everything, from “Bird Basics” to “How Not to Fear the Broom.” The most timid of all is Crumb. He cowers in a corner. Miss Hazeltine doesn’t mind. But when she gets in trouble and only Crumb knows where she is, will he find his inner courage and lead a daring rescue? Filled with adorable illustrations and ideal for fans of *Disappearing Desmond* and *The Invisible Boy*, Miss Hazeltine’s *Home for Shy and Fearful Cats* is a story that’s perfect for shy and fearful children as it both helps them face scary situations and accepts them just as they are.

[The Plays of Shakespeare: King John. King Richard II. King Henry IV, part 1. King Henry IV, part 2. Henry V. King Henry VI, part 1. King Henry VI, part 2. King Henry VI, part 3. King Richard III. King Henry VIII](#) Knopf Books for Young Readers

The home, an essential part of the American dream, has been beset by troubles since the beginning of the Great Recession in 2007. Whether from an unstable housing economy, ever-rising energy costs, or the environmental ruin of urban sprawl, the origin and variety of these assaults can be bewildering. Surprisingly, some of the answers to many of these modern-day troubles lie in some of humanity's most ancient building techniques.

Earth-sheltered building has existed since the heyday of Skara Brae in Scotland 5,000 years ago, and is used today by people around the world, from the Yaodong of north-west China to the subterranean residents of Coober Pedy, Australia, and even to converted missile silos in America. If you have ever looked at your power bill in stunned disbelief, if you are interested in green building techniques, or if you want your home to stand out (or hide out), then this book is for you. Contrary to popular misconceptions of being cramped, dark, or dank domiciles, earth-sheltered homes come in a number of different styles, incorporating brilliant techniques designed to bring light and air into the home. With *The Complete Guide to Building Affordable Earth-Sheltered Homes*, you will learn about the many different types of earth-sheltered homes and their various advantages, including a life span that can be two to three times longer than that of conventional housing, inexpensive building materials, and reduced maintenance costs.

Additionally, the energy costs of an earth-sheltered home can be as much as 80 percent lower than a conventional homes power costs. The book will also examine the different environmental factors that you need to consider when selecting which style to build and how to begin, and carry out, your

building process. Some of the factors discussed include the different types of soil and how to adjust to them, the level of precipitation and how to manage run off, and how to maximise use of natural light sources. Construction experts and earth-sheltered home builders have been interviewed and their expertise is included in this guide to help you learn how you can create your own underground home. Details of construction methods are found throughout the book, including tips and advice for planning, excavation, flooring, walls, framing, waterproofing, roofing, drainage, and insulation. You will also learn how to pour your own footings and floor, how to dry stack concrete block walls, how to use post and beam framing, and how to waterproof the membranes. With the information provided in this book, you can start planning and building your own earth-sheltered home in no time so that you, too, can benefit from the natural protection of the earth. If earth-sheltered building is good enough for Bill Gates \$136 million mansion, then it just might be good enough for you too.
