Biologic Rhythms in Clinical and Laboratory Medicine JP Medical Ltd

Everyone has heard of nature's "biological clocks", the phenomenon of periodic activity in plants, animals and humans. But what does chronobiology have to do with modern medicine? This book presents in a concise but comprehensive fashion the basic principles of chronobiology and their application to clinical medicine. The chapters are written by specialists in the field; they summarize the physiology, pathophysiology and pathology of the human time structure and outline the application of chronobiologic principles and techniques for diagnosis and treatment.

Head Injuries Springer Science & Business Media

Includes section "Recent publications."

Partha's Fundamentals of Pediatrics Thakur Publication Private Limited

Neev's life is marked with castastrophes; after losing his parents and almost everything he owned, he finds refuge with his friend Aadi in Agra. Living with an old friend in a new house, busy with a new job in a new environment revives him, somewhat. And then, life happens. As he bumps into love and tries to keep running away from it, love follows him as Aashi - a small-town girl with larger than life aspirations and a novel dream. Neev sets out

to fulfil her dream, but he has to pay a coast for it. Either love, or life. What will he choose to let go? When You Became My Life is a story spun by destiny. It is a story of a young boy who takes it upon himself to defeat all odds and be one with love

Compiled Statutes of Montana Springer Science & Business Media

The 17th volume of the "Advances in Neurosurgery" contains a selection of the scientific reports of the 39th annual meeting of the German Society for Neurosurgery, which was held in Cologne from May 8-11, 1988. The first section deals in particular with the long-term results of severe head injuries, as well as with problems of the acute traumatic hematomas and brain edema. The second section covers microsurgical experiences. Attention is focused on the anatomy and operative technique for lesions in and around the jugular foramen and the craniospinal transition. The third section describes the special new results of brain death determination. Beyond this, numerous contributions on clinical and research results were presented in a poster exhibition which was systematically studied in order to give younger neurosurgeons the opportunity for extensive discussion. The volume contains new information which will bring specialists up-to-date on the latest clinical and research developments in the field.
