Histology and Histopathology of the Eye and its Adnexa provides information pertinent to the histopathology of the eye. This book presents a brief survey on the bacteriology and parasitology of the eye. Organized into three parts encompassing 20 chapters, this book begins with an overview of the normal histology of the eye. This text then deals on general pathology, with emphasis on its application to pathology of the eye. Other chapters describe the findings that lead to the pathology diagnosis of the sectioned eye. This book discusses as well the physical injuries in the eye brought about by contusion. The final chapter deals with the complications that may arise during or after any type of cataract operation, extracapsular or intracapsular extraction, discussion of a soft cataract, or after linear extraction. This book is a valuable resource for ophthalmologists and physicians. Postgraduate students specializing in histology and histopathology of the eye will also find this book useful.

"Representation of political power seems to have been necessary at all times in all complex urban societies. To secure order - to construct a certain social, ideological, religious, economic, and cultural stability - seems to be one of the main intentions of representation. When order breaks down or is

threatened, political power comes under threat, and the cohesion of the community is also in jeopardy." "In times of impending change, crisis, or disorder, special effort is required to reassure the community of the rulers' ability to maintain stability. What those in power did to convince the affected communities of their qualities as rulers, that is, their representational strategies - especially in times of change - is the subject of this book, explored through examination of case studies drawn from the ancient Near East. The volume is divided into three thematic parts: "Reestablishment of Order after Major Disruption," "Changing Order from Within," and "Perceptions of New Order."---BOOK JACKET.

andererseits provides a forum for research, commentary, and creative work on topics related to the German-speaking world and the field of German Studies. Works presented in the publication come from a wide variety of genres including book reviews, poetry, essays, editorials, forum discussions, academic notes, lectures, and traditional peer-reviewed academic articles. In addition, we welcome contributions by journalists, librarians, archivists, and other commentators interested in German Studies broadly conceived. As a specifically transatlantic endeavor, we also highlight select topics in American Studies that impact German Studies. By publishing such a diverse array of material, we hope to demonstrate the extraordinary value of the humanities in general, and German Studies in particular, on a variety of intellectual and cultural levels. This issue features sections about German Studies approaches to media literacy, Stephen Dowden's book »Modernism and Mimesis« and the poetics of ambiguous memory.

Work played a central role in Nazi ideology and propaganda, and even today there remain some who still emphasize the supposedly positive aspects of the regime's labor policies, ignoring the horrific and inhumane conditions they produced. This definitive volume provides, for the first time, a systematic study of the Reich Ministry of Labor and its implementation of National Socialist work doctrine. In detailed and illuminating chapters, contributors scrutinize political maneuvering, ministerial operations, relations between party and administration, and individual officials' actions to reveal the surprising extent to which administrative apparatuses were involved in the Nazi regime and its crimes.

The Bees of the World Berghahn Books

The latest book from "the most dangerous philosopher in the West" (New Republic) considers the new dangers and radical possibilities set in motion by advances in Big Tech. In recent years, techno-scientific progress has started to utterly transform our world--changing it almost beyond recognition. In this extraordinary new book, renowned philosopher Slavoj Žižek turns to look at the brave new world of Big Tech, revealing how, with each new wave of innovation, we find ourselves moving closer and closer to a bizarrely literal realization of Marx's prediction that "all that is solid melts into air." With the automation of work, the virtualization of money, the dissipation of class communities, and the rise of immaterial, intellectual labor, the global capitalist edifice is beginning to crumble, more quickly than ever before--and it is now on the verge of vanishing entirely. But what will come next? Against a backdrop of constant socio-technological upheaval, how could any kind of authentic change take place? In such a context, Žižek argues, there can be no great social triumph--because lasting revolution has already come into the scene, like a thief in broad daylight, stealing into sight right before our very eyes. What we must do now is wake up and see it. Urgent as ever, Like a Thief in Broad Daylight illuminates the new dangers as well as the radical possibilities thrown up by today's technological and scientific advances, and their electrifying implications for us all.

Mit diesem Tagungsband erscheinen zum vierten Mal "Usbekisch-deutsche Studien". Die Kooperation zwischen dem Germanistischen Institut der Universität Münster und dem Lehrstuhl für Deutsche Philologie an der Nationalen Universität Usbekistans wird seit 2004 als Germanistische Institutspartnerschaft (GIP) durch den DAAD gefördert. Unterschiede und Gemeinsamkeiten in der Forschungsaktivität verschiedener Universitäts- und Sprachkulturen sowie interkulturelle Aspekte kommen hier zum Ausdruck. Dies entspricht dem weitgefassten Thema der Tagung: "Kontakte: Sprache, Literatur, Kultur, Didaktik".

This unique resource offers an in-depth, comprehensive look at different types of mental health needs of transgender and gender diverse youth, how these intersect with gender identity, gender expression, and sexual orientation, and provides practical information on how to ethically, responsibly, and sensitively care for these patients. *Affirmative Mental Health Care for Transgender and Gender Diverse Youth: A Clinical Guide* begins with three introductory chapters which contain practical information regarding assessment, psychological interventions, and the potential medical and surgical interventions that are indicated for youth with gender identity concerns. The remaining chapters are illustrated by multiple cases build around overarching chapter themes. Each case chapter opens with broad questions applicable to clinical practices, while the cases themselves focus on a particular co-occurring mental health condition. The case chapters are structured with intersectionality in mind, including elements of ethnic, racial, and cultural diversity, and the patients range over the full developmental spectrum, from pre-pubertal children to older adolescents. Chapter cases range in complexity as well, to provide readers with the tools they need to evaluate patients, and to assist in the decision of which presenting factors to prioritize in treatment at which time. Ending each chapter are clinical take-home messages, closing with additional practical knowledge that can be applied to other cases providers may see in their own practices. Written by expert clinicians in the field, *Affirmative Mental Health Care for Transgender and Gender Diverse Youth: A Clinical Guide* is an ideal resource not only for child and adolescent psychiatrists, but for clinicians across all mental health disciplines working with gender non-conforming youth, and who are interested in providing informed, affirmative, and intersectional care.

This classic text, one of the true anchors of our clinical genetics publishing program, covers over 700 different genetic syndromes involving the head and neck, and it has established itself as the definitive, comprehensive work on the subject. The discussion covers the phenotype spectrum, epidemiology, mode of inheritance, pathogenesis, and clinical profile of each condition, all of which is accompanied by a wealth of illustrations. The authors are recognized leaders in the field, and their vast knowledge and strong clinical judgment will help readers make sense of this complex and burgeoning field. Dr. Gorlin retires as editor in this edition and co-editor Raoul Hennekam takes over. Dr. Hennekam is regarded as one of the top dysmorphologists--and indeed one of the top clinical geneticists--in the world. Judith Allanson is new to the book but is a veteran OUP author and a widely respected geneticist, and Ian Krantz at Penn is a rising star in the field. Dr. Gorlin's name has always been closely associated with the book, and it has now become part of the title. As in all fields of genetics, there has been an explosion in the genetics of dysmorphology syndromes, and the author has undertaken a complete updating of all chapters in light of the discoveries of the Human Genome Project and other ongoing advances, with some chapters requiring complete rewriting. Additional material has been added both in terms of new syndromes and in updating information on existing syndromes. The book will appeal to clinical geneticists, pediatricians, neurologists, head and neck surgeons, otolaryngologists, and dentists.

The 4th edition, which published in 2001, has sold 2,600 copies.

This volume presents all the main lectures of the XIXth Congress of the International Organization for the Study of the Old Testament (IOSOT) held in Ljubljana (July 2007). It is a very good sample of the main trends and progress of current biblical research on masoretic tradition, Hebrew philology, textual criticism, literary criticism (especially in prophetic books), ancient Judaism, formation of the collections of Ancient Scriptures, and biblical themes (especially according to the orthodox tradition of interpretation). The thirty-one authors are among the main international figures of current biblical exegesis and their contributions are representative of the study of the Old Testament at the beginning of the third millennium.

andererseits - Yearbook of Transatlantic German Studies BRILL

This book offers an evaluation of female suicide bombers through postcolonial, Third World, feminist, and human-rights framework, drawing on case studies from conflicts in Palestine, Sri Lanka, and Chechnya, among others. *Women Suicide Bombers* explores why cultural, media and political reports from various geographies present different information about and portraits of the same women suicide bombers. The majority of Western media and sovereign states engaged in wars against groups deploying bombings tend to focus on women bombers' abnormal mental conditions; their physicality-for example, their painted fingernails or their beautiful eyes; their sexualities; and the various ways in which they have been victimized by their backward Third World cultures, especially by "Islam." In contrast, propaganda produced by rebel groups deploying women bombers, cultures supporting those campaigns, and governments of those nations at war with sovereign states and Western nations tend to project women bombers as mythical heroes, in ways that supersedes the martyrdom operations of male bombers. Many of the books published on this phenomenon have revealed interesting ways to read women bombers' subjectivities, but do not explore the phenomenon of women bombers both inside and outside of their militant activities, or against the patriarchal, Orientalist, and Western feminist cultural and theoretical frameworks that label female bombers

primarily as victims of backward cultures. In contrast, this book offers a corrective lens to the existing discourse, and encourages a more balanced evaluation of women bombers in contemporary conflict. This book will be of interest to students of terrorism, gender studies and security studies in general.
